How much are you paying per add? I am in the process of developing a tool more or less for this; it's going to automate using dating apps on iOS & android. on a tool to automate

Is your tool progressing well?

It's been done for a while. Just been using it privately and sold access to a few close acquaintances. The profit off of the accounts/adds we're getting are far more than anything else. Ended up ditching Android version due to enhanced security for some apps on the Android version preventing spoofing locations and stuff but the iOS automation is working perfectly.

It's a shame not to make it public, it's interesting, but it's nice to see that it's still possible to break [BRAND NAME REMOVED]

It's not really "breaking" [BRAND NAME REMOVED]. Just simply automating phones, then extracting the session token to be reused later.
