3. Anti VM
4. 5 Minutes delay (300 seconds)
5. File Pumper
6. Use Certificate
7. Use Extension Spoofer
8. Upload Custom Icon

Normal version Support x32 and x64 Files
We check detections regularly. We're doing a FUD update. All new update FUD [Windows Defender bypass Guaranteed.]
Bypass Windows Defender guaranteed.
every build is unique
Compatible Compatibility with all .net / native x86/x64 tools, example: #, loki, venom, redline, async, quasar, xworm, xloader, azorult, lummac2, vector, origin logger, formbook, snakelogger ...

Advantages: Cheap stub and refuds happens everyday.

Update and Detecting

Everyday updating Normal/Public version
Private version we are giving one file (after detect you need buy again.)

Private Stub
The native Stub is used for evading those who wants to run in any computer without needing .NET dependencies, runs even on Windows 7 x64. High-end shared stub that bypasses Windows Defender well and other antivirus, has good quality features and can be used for Rat's, stealers, and other tools

Note: Native x64 - no dependencies

Example of compatible tools: Any .NET/C++ x86/x64 payload.

Advantages: Sophisticated and less people uses due to the price, can not be considered a private stub but this can be considered a very quality stub.

price per public crypt =10$

private Crypt =20$
