Howdy!

So I have this Joomla administration thingi..
What exactly can you do with this?

<http://www.europa-irc.de/administrator/index.php>

Thanks in advance!

Greetings

scan with acunetix to check if is vulnerable to (sql,xss,etc).

That appears to be the admin login panel. Knowing the location of the admin panel alone will not help you, but if you can manage to find a vulnerability in the site and obtain the credentials, this page is where you would login.

You will have no use for this unless you have the login info.

100th post! WOOT!
