Thread: Looking for Shopify Theme Suggestions!

totalcontrol123 - *October 13, 2024, 3:48 am*

Hi everyone,

I'm looking for some help finding free paid Shopify themes. My online store could really use a better theme, but right now money's a bit tight. If anyone knows where I can find one or if there's an AI app that can create custom themes, I'd love some suggestions!

Also, does anyone here run their own store? Whether it's dropshipping, print-on-demand, or something else, I'd love to hear about your experiences!

Thanks in advance!

(Oct 13, 2024 04:14 AM)php Wrote: *[CITE]* You can start by setting up a local environment to customize Shopify themes. Using a base like Shopify's Dawn theme allows for extensive modifications tailored to your needs. Additionally, AI tools such as Claude 3.5 Sonnet with cursor.sh can enhance your design process, but be mindful of the telemetry data they collect.

Useful ResourcesShopify.dev - Themes Overview:
This comprehensive guide covers theme architecture, Liquid templating, and best practices for developing and customizing themes.

Dawn Theme (GitHub):
Shopify's starter theme, perfect for building or customizing your store with a modern design approach.

Online Store 2.0 Migration:
Learn how to make your theme more modular and maintainable with the features introduced in Online Store 2.0.

Shopify CLI:
A powerful command-line interface tool that helps you preview, test, and share themes efficiently in a local environment. Learn more about Shopify CLI.

Theme Inspector:
Use this tool to optimize your themes by analyzing performance and identifying areas for improvement. Find out more about Theme Inspector here.

thank you for your responce. i found some templates online, i went with gemini fashion, its quite a nice layout. im very new to all of this dropshipping and print on demand so i will look into all that info for sure.

I've thought a lot about building a Shopify Print on Demand store, but I always chicken out.

what makes you want to chicken out ?

my project is unique in a way. i am the owner of a 4200 nft collection which will launch next year. im putting 420 of the characters on merch items. if you own one of the 420 you will get 10% from sales which feature your character. an active utility for investors. i just lack promotional skills.
