its a minecraft site and it has the ability for users to upload a files for the gallery of screenshots of the world.

could i upload a shell and then get admin ect?

i basicly want to fuck these people over for stealing

Mudkip - April 5, 2011, 2:29 am

PM me the site.

Ill see what I can do.

id rather have some guidance so i know how to use shells. ive been wanting to know for some time.

i understand i should add that line to make it look like a jpeg but then what do i do from there and what shell should i use?

could you explain how to use a shell and which one i should upload?

i dont get how you use the shell after its uploaded.
