Thread: LimeRat lime rat?

SOMEBORED21 - *December 12, 2024, 2:16 am*

Has anybody used Limerat, if so is it good.
Where can one find guides for how to use it. Every Rat is quite different and as someone who doesnt have a lot of programming knowledge it is difficult to understand.
I have basic understanding of python but that's it.

I have experience with LimeRat, I like the NYAN-x-CAT tools, it is a more or less stable and open source RAT, and it would be interesting to see someone taking up this project again :(

Yes. i got hacked a few years ago and the hacker liked me so he showed me what he was using (limerat) since then ive been interested in rats etc.
Where can one find a guide on how to set it up and use. would be appreciated cheers

Interesting story, but there are few tutorials about it and most people charge for simple knowledge:
[Video: https://www.youtube.com/watch?v=Gr-jSWaKLUE]

You only need an IP:DNS provider, use ngrok or localtonet or something like that.
