Lol? Are you serious? I can show the file if you want, its a .zip file with 2 zips in it, in one there are 1000 Tutorials, in the other there are 20 E-Books.

Oh wait i see the problem, in the .txt file there is a command that tells you how to erase your computer HDD and all your AV picked it up and taught it was an auto execute, .txt files are not viruses.

Even in nederlands, in die .txt file staan codes voor het leegmaken van je PC het vernietigen van je Harddrive etcetera, waarschijnlijk heeft je AV Het opgepikt als een auto-execute. Een .txt file is GEEN Virus :)
