Thread: [\[UPDATED\] Taking "TWO" users under my wing. \[UPDATED\]](#)

Ninjury - April 5, 2011, 4:44 pm

I am willing to take one member of HF under my wing, and can enjoy all the activities I do online anonymously...

Things to be done:

Hacking in general:

Exploiting anything and everything possible:

Social Engineering the impossible.

and much more..

Requirements..

Skill: No specific skill set needed.

You must own a vpn from: <http://perfect-privacy.com/>

Why? The location ability works perfectly for what we will be doing.

Note: (You do not have to have it to apply)

If I think of anymore needed requirements I will let you know.

For the one of whom I take in with me to do such illegal activity will have the same reward as I every time.

Why I am doing this? Because having two people is a lot better than 1, especially when it comes to social engineering.

Post your application below

UPDATE: Will have a voting thread to determine it.

Social Engineering is sadly not hacking. That's only fooling someone into doing something for your profit.

I'm personally reading some college study guides and course books used to teach someone a portion/fraction of the knowledge required for a computer science, electrical engineering, and computer engineering degree, with computer engineering being the degree I will attempt to obtain in the future. I doesn't feel skiddish at all to read and gradually start to understand the concepts.. but what would a skiddy know about distinguishing skiddies from experts? (Lol. That's a joke. Shocked? Me too.)

Long version.

Spoiler ([Click to View](#)) This seems interesting. Most likely I won't be picked from the group here, but, uh.. *Distracted by Adult Swim*.

Seems like listing my name and age is pointless, considering it has nothing to do with hacking.

Skills, huh? When it comes to computers, I know Windows software inside and out. Currently getting used to Linux. I've dabbled in pretty much every method of hacking, so it's pretty easy for me to learn whatever is necessary if I want to. I know HTML, learning Python, along with JavaScript. Just opened the door to the coding world, really. Although I'm pretty fluid with Windows CLI. As for things along the lines of social engineering, I've got a smooth personality, and voice. You know Berry White? Yeah, that's my voice.

I'm lying. But it's smooth.

I've also got an unquenchable thirst for knowledge. It's gotten pretty bad lately, procrastinating school work to study programming languages.. Anyways.

I've already got two VPN's. As for time, I take classes from my home, so I can literally be on whenever.

To be honest though, I'd like to hear some more information on what this little partnership would consist of. You should PM some details, I'd appreciate it. Because depending on what exactly goes

down, I may want to withdraw my application to help someone else get this position. I'm pretty capable of learning on my own, especially with the help of HF. But this just sounds fun, I've always wanted a friend to do this kind of thing with.

Anyways, you've got my 'application', so hit me up. Hell, I'm even down for just becomin' bros.

Tl;dr - Sounds fun, I'm capable, let's kiss with tongues.

How often can you be on: I can be on perhaps 4-6 hours daily.

Are you able to get the VPN if so, when? I have a few VPNs/Proxies. Only if it really is needed.

ZainZilla - April 12, 2011, 5:43 pm

Edited my last post with the given application.

TastesLikePink - April 12, 2011, 5:47 pm

Alias: TastesLikePink

Age: 18

Skills: I am new to hacking in general, just started to pimp some free wireless internet off my neighbor and I would like to get more involved in the world of hacking. I have some experience with social engineering, I find it rather easy to manipulate people to get what I want, and persuading them to do things. I learn new things very fast, and I will pick up on almost anything rather quickly.

How often can you be on: I can be on anytime thats not 8 am - 12 pm, and I'm busy Monday/Tuesday from 1:30-5, but besides that I can be on whenever

Are you able to get the VPN if so, when? If you accept my application i can buy it immediately :D I look forward to hearing a reply

I have reviewed all the apps above this point.

I have specifically chosen those of which I feel are acceptable.

I have chosen over 10, and I will choose more possibly tomorrow.

I will be narrowing the test down to 10 users of which I will be personally testing.
