Thread: [Premium SMTP servers 100% inbox \(lowest price\)](#)

csclus - April 5, 2011, 9:49 pm

I am selling Premium SMTP servers 100% inbox rate for viral marketing or whatever you will do with them.

INBOX SMTP: \$10(updated)

- I will make you a demo test before purchasing. After purchasing you can pick up any random server and test it and in case it doesn't work I will replace it and give you even 1 as bonus. (the test must be made immediately after purchase not after you use the servers).
- All the "INBOX SMTPs" reach your inbox and are worldwide. The BULK SMTPs also can reach your inbox but the percentage is not 100%.
- If you want SMTPs from a specific country there will be a double charge.
- All the servers are "virgin" never used before for spamming. Also I do NOT resell them.
- Minimum buying quantity is 20 servers but for large quantities I will make discounts.
- This is a limited offer, the prices may change in the future, so hurry up because these are the cheapest prices on the market.

Only ecurrency is accepted for payment: perfectmoney(PM) / webmoney(WMZ) ... contact me for details.

I reserve the right to refuse service to anyone for any reason.

Because I wanna retire from this business, my tools are for sale:

[Most powerful SMTP scanner](#)

[Most powerful Mass Mailer](#)

... limited copies as always

gonna retire so smtp sales will be available only till the end of this year

inboxing depends on a lot of things and dont just think you will get 100% inbox rate because your using an inbox smtp prices are reasonable though

that's correct, but prior selling I will make a test and the emails will go inbox. I'm not making tutorials about how to send to inbox, I am just selling tested 100% inbox smtps.

copland - May 30, 2011, 1:15 am

you will never get inboxed at gmail and many other providers when you send eg. more than 10000 emails per day ?

Many email provider checking:the amount of msg within a specified time frame

sender mail id (anybody@domain.tld)

sender IP address

RDNS (the sender IP should resolve to "domain.tld")

DomainKey

the email subject

the email content

... and many others^^ ?

and of course they check these information on blacklist, greylists ... etc.

Anyway, good luck w your sales! ?

Facebook marketer - May 30, 2011, 3:22 am

csculus sorry to hijack your thread abit but i'll respond to copland

free smtps (hotmails yahoo mails and gmails) are one of the best ways to spam,

bear in mind however you need the kit to send them (mail mascot is a good choice)

its a simple case of having numerous free smtps and numerous proxys and rotating the smtps and proxys. (bare in mind you can only send 100 mails per gmail account per day).

also changing keywords in the title and text is a must

is that the result of a short google search? no offense but I dare to say that you don't spam too much. most of the reasons enumerated by you are not important in a successful inbox campaign. of course if you use newbies tools to send emails you wont have any success rate. but this is not a lesson of inboxing, it is just a sale thread. I will prove that my messages reach inbox and if yours don't, it won't be my fault.

jabmaster - May 31, 2011, 7:26 am

I think it is a good price for the service.

skyheaven11 - June 4, 2011, 12:14 pm

I am interested, please send me your MESSenger, My email is faladswift@yahoo.com you can also add me so we can do business together ASAP. waiting your response

hdanap - June 27, 2011, 3:45 pm

MEGA VOUCH FOR THIS SELLER. As soon as you pay thru LR, your get the merchandise(SMTP) . He tested them before sending.

Very good seller. If you need SMTP, this is your man

DaChamp - June 27, 2011, 9:12 pm

I have PMed you my MSN. I can be a HUGE buyer and would REALLY like to get this going. I need some help to start but I promise I can buy all of your servers.

Thanks!

csclus - June 28, 2011, 1:57 am

I have thousands in stock and coming every day, so it will be very difficult to buy them all, but I still appreciate your good intentions ?

sshd - June 28, 2011, 2:05 am

OP do you have smtp's like this : S0106003065fb8258.fm.shawcable.net i need many smtps but only this hostname : *.shawcable.net , if you have please pm me asap!

csclus - June 28, 2011, 2:35 am

this is almost impossible. you can get this type of smtps by 2 ways: either bruteforcing or hacking that domain. Bruteforcing on a big smtp provider is almost impossible because after some failed attempts, they will put a filter on the bruteforcing ip. Hacking it is also almost impossible so both solutions dont worth the waste of time. I suggest you buy regular smtps which do the same job (sending messages into inbox) and forget about same domain smtps, especially if you wanna buy only few smtps.

hdanap - July 2, 2011, 12:52 pm

Best seller ever and good guy, bought 5 smtps and gave me 7 as repeat customer. I recommend CSCLUS.

U THE BEST

bioshok2010 - July 5, 2011, 12:58 pm

fast seller bought 5 smtps and gave me 9 . I recommend CSCLUS

GOOD SELLER THANKS MAN

DaChamp - July 5, 2011, 4:51 pm

Bought 10 SMTPs, Atomic Mail Sender, and an RDP. Pain in the ass to get LR, but still trying to get things up and running with AMS and my offers.

pozpoz - July 6, 2011, 12:47 am

can i buy through paypal ? i have done many transactions with paypal already D:

csclus - July 6, 2011, 2:29 am

sorry, but I wrote very clearly that I accept only LR.

pozpoz - July 6, 2011, 4:03 am

:\ ow well so sad :C i was interested though...

csclus - July 6, 2011, 4:47 am

buy LR from an exchanger or post on this forum an exchange thread.

natostanco - July 9, 2011, 1:36 am

how many emails can on of yours server send in a day?

csclus - July 9, 2011, 4:37 am

there is no sending limit on the servers but a good spammer will know how many emails to send per day and per servers to keep them up and running for a long time.

dorobadoski - July 10, 2011, 6:27 pm

introdistrict - July 14, 2011, 4:26 am

I also need one. Let me know via pm please

csclus - July 14, 2011, 11:09 am

it's written very clearly that the min order is 5 smtps.

introdistrict - July 14, 2011, 6:33 pm

is there any way to test it?

csclus - July 15, 2011, 9:04 am

I test them all before you make the payment. I send a test message to your email address so you can see it's delivered into the inbox folder. Also you will be able to check the headers to see that the smtp I'm selling you is the same as the one used to send the test message. After you will make the payment I will give you the login details from each server.

jellybean - July 15, 2011, 9:07 am

i still think free smtps (hotmails yahoo mails and gmails) are one of the best ways to spam... but the prices here are really reasonable.

csclus - July 15, 2011, 11:14 am

with gmail, yahoo, hotmail and so on, you cannot send spoof messages. with my smtps you can.

shabalshabal - July 17, 2011, 10:07 pm

its cool, do you still have them

please i want to buy , i have pm you, but my id is lordwill5@yahoo.com

csclus - July 18, 2011, 8:49 am

for those who haven't read my post carefully:

the minimum order is 5 inbox smtps, 5 x \$3 = \$15

please don't ask me to sell to you 1 smtp for \$2 or something like this because I have to deny it. I have thousands of smtps in stock and coming everyday so I'm providing large quantities of premium smtps and the prices are not negotiable. Thank you!

not technically true you can with hotmails

csclus - July 18, 2011, 9:28 am

free email providers don't allow spoof headers. but if you insist please send me a spoof email from your hotmail account with the following header:

From: support@microsoft.com

Reply-to: contact@your-reply-is-bullshit.com

thank you ?

p.s. to send messages from another account in hotmail you have to verify that it belongs to you

introdistrict - July 18, 2011, 6:41 pm

do you accept alertpay? Im willing to buy

csclus - July 19, 2011, 8:11 am

csclus - October 11, 2011, 9:32 am

I updated the prices because few users used my services to scam people. They were buying the min quantity from me and then they were trying to resell the same smtps to other people for a higher price. That was ok, I had nothing against them. The problem is that they were selling the same servers to all which is against my policies. Once a client buys smtps servers from me, they are deleted from my database. With higher prices those scammers won't try to resell my services.

Because of this, I don't know if I'm gonna continue offering smtp services in the future or not. I'm sick of scammers and low-life kids! I added a poll so if you want my smtp servers in the future, please vote!

Can phpmail be used on the servers to spoof the email, if so will they still go to inbox.

csclus - December 5, 2011, 6:54 am

(Dec 5, 2011 07:08 AM)Meth Wrote: [\[CITE\]](#) Can phpmail be used on the servers to spoof the domain name, if so will they still go to inbox.

is that a question or an answer? if it's an answer then I believe you don't know too much about spamming.

php mail is sending messages using the sendmail service. all the messages will be sent using the same ip. just like you would use only one smtp.

for a successful email campaign with high inbox rate you must use many smtps and almost unique content.

only a n00b would compare spamming using php mail with spamming using smtps.

yes, if you wanna send 100 emails then use a php mailer or buy 1 smtp.

Meth - December 5, 2011, 7:06 am

Jesus christ I was asking a simple question, can these be used to spoof an email to appear from a different sender with a 100% receival rate. No need to start flipping out.

No I'm not some 1337 spammer, hell I dont even need it for spamming. Hence how my question has nothing to do with spamming. I'm not educated in this area clearly, calm down.

csclus - December 5, 2011, 7:18 am

I started my reply with "is this a question or an answer".

the reply I gave was in case you posted an answer which I considered it inappropriate.

but since it was a question I apologize ;)

and to answer your question, to send spoofed emails you must use a open relay smtp (in case you are sending via smtp) or to configure sendmail to send spoofed headers (in case you are using php mail)

all my smtps are open relayed and yes, they can send spoof headers, so the receiver will get the email from anyone you want

csclus - March 20, 2012, 4:46 am

I updated the terms:

- min order is for 20 smtp servers and discounts are available only for 100+ smtps.

Do not ask for 1 demo smtp. I make all the tests before you make the payment.

I'm not selling smtps for kids who send 10k emails daily or to n00bs who want to send millions

emails/day using 1 smtp. Don't waste my time and neither yours. Contact me only if you know what to do with the smtp servers because I don't have the time and patience to explain you the inboxing techniques.

I updated the terms few months ago, read the whole thread. Min quantity is 20.

gamingneeds - November 4, 2012, 11:02 pm

I would love to buy these daily but don't have LR. If someone wants to buy some together with me and can accept my PayPal and then pay OP with LR, I can buy these everyday.

Contact me via PM so we can work out a deal.

Thanks!

unfortunately I don't accept other method than LR due to the high risk of fraud, especially paypal. If your funds are not stolen, I'm sure you can find a way to exchange the money via a legit exchanger approved by LR. I don't suggest you to exchange on this forum cause there are so many skids around. After you get the funds in your LR account send me a PM and we can make the deal. Btw, I suppose you already read my terms so you know that the min quantity for an order is 20 smtps. No exceptions.

sent you a PM with my contact details, no LR id. As I already wrote at the beginning of this thread, you will make the payment only after the smtps are tested.

So, for anyone interested in buying, don't ask for my LR id first.

Thanks for that but... I wasn't posting to you but another possible buyer. My message was actually pretty clear I was looking for a 3rd party to work with. Not you directly.

csclus - November 7, 2012, 2:09 am

I tried to give you some hints especially that you need them on a daily basis as you said. I believe it's easier to deal directly with the provider than trying to find a third party to work with. IM campaigns / spamming or whatever you wanna do with the smtp servers, require a lot of them daily so I don't see a reason for you to look for a JV. But anyways good luck finding a partner.

You are definitely right. The problem is being in the US, LR is hard to get especially without paying a crazy fee to exchange. Even with exchangers, most can't deal in \$X,XXX sums... they only do

smaller deals so it would be hard to maintain a consistent supply of LR from a legit exchanger.

That's why I was trying to find someone who could obtain it easier, maybe by bank transfer that didn't cost them anything since maybe they live in a country that allows a free transfer.

Thanks for the follow-up though. I definitely would 'rather' deal directly, but living in the US makes it costs 30%+ more. :(

ThanksI believe it's logical that chronologically the first post is older than all the others following, so if I wrote in the next posts that the min quantity is 20, I don't see any reason for you to ask that question.

But anyways, for the last time ... MIN ORDER QUANTITY IS 20 (twenty) SMTPs.

I will also repeat some other rules:

I make all the tests, as I already explained, so don't be a smart @ss and try to convince me to give you 1 smtp for "testing purposes".

Don't contact me unless you have the money in your LR account. Please save your time and mine as well.

I know it's bad news for the poor children, but these are my terms and I won't make any exception!

Thank you!

urk - December 2, 2012, 11:38 am

I just remembered today that I posted in this thread. Sorry for the late response.

Logical?

Isn't it logical to update the original post instead of having the potential buyer have to read 10+ pages of your thread? I wasn't sure if you had changed your mind because you updated your original post around the same time you posted the 20 minimum post. I am not sure if the "poor" comment was directed at me or not but I wanted to buy 5 originally because I have never dealt with you before and have been scammed on this board by l33t/ub3r for far less.

I am not sure why you got upset over a simple question. Its my fault, I should of known by your signature that you had some issues.

no, I'm not upset and I can even understand that you had some past unhappy experience dealing on this forum, so that's the reason I told you to read my whole thread, every page, every comment. If you'd do that you wouldn't have any doubts about my way of doing business. And just as a quick hint, next time before starting a deal with someone on this forum, be sure you checked his previous usernames, trading history, if there is any report on him or any suspicion activity regarding scams, his previous threads / post to decide if he's a LQ or a HQ member. Most of the times LQ members / poor kids are scammers.

Cause I hate working with poor kids I set the min order quantity to 20 smtps, which is still a small amount of money for an experienced spammer.

So good luck in the future and pls be sure you're well documented next time before contacting me for a deal.
