Thread: Robotic Process Automation [Paying for Leads]

banonkiel - *June 8, 2025, 12:57 pm*

Good day everyone, hope you are having a great day.
Edit: to make it clear, I'm looking to get hired and not to hire people.

A couple of friends of mine are deeply invested in this field.
They are currently providing professional Development and Operational for multiple companies and they are looking for more clients/customers.

I'm looking to lend them a hand and maybe help them land a couple of gigs.
We're interested in both Short and Long-Term projects.

What we can provide?
- Developing processes from scratch with extremely high standards in terms of best-practice and documentation.
- Upgrade existing processes to their standards and write their documentation.
- Maintain existing projects from Operational Capacity.
- Creation/Maintenance of third-party tools/platforms that can help/assist Development, Operations and Customers.

Currently, we are mostly using UiPath, but we might be open to using other solutions if the right chance is provided.
Some of them have experience with tools like Power Platform (PowerApps / PowerBI / PowerAutomate)

If you are in interested in this service or know someone that could use said service, contact us.
As mentioned in title, I will pay for ACTUAL leads that convert.

Contact me on Telegram @banonkiel or Discord (in signature) or Onsite (PM/Convo)

You're in Buyers Bay where people post what they want to buy.

You're looking for Service Offerings to sell a service.

Good luck with this.

to buy.

You're looking for Service Offerings to sell a service.

Good luck with this.
Which isn't technically wrong since I'm buying leads as well (?)
Couldn't determine which section would be more accurate.

Sending this to the top.

Just freed up some space and looking for leads to replace them.
Still willing to pay for actual leads that convert.
