How to portforward through uTorrent

Hello and welcome to my tutorial on how to portforward through uTorrent, this tutorial is in my own words and has not been copied from another post.

Let's start off on what is uTorrent?

Well a uTorrent is a p2p software where u can download things such as movies, games and music. You can download uTorrent by googling uTorrent download in google. If you can't be ask to google it [Click Me](#) and install uTorrent.

Yay you have downloaded uTorrent :D Now to the tutorial on how to portforward on uTorrent! This can be used for ANY game such as rats, rsps ect ect.

1) Open uTorrent

2) Go to Preferences (On top of uTorrent)

3) Go to the Tab on the left side of page opened and click the tab 'Connection'

4) You will see 5 Numbers and it should say 'Listening port' in Blue text and under it it says 'Port used for incoming connection' just type the port you want to open and go over and click apply and ok.

5) Now go to 'Options' and go to 'Set up guide' and untick bandwidth and type in the the portforward number you did for number "4".

6) Now make sure the box is ticked next to the current port: (0:random) [PORT HERE] ☐ <- Tick that box.

7) Run test

8) If you see a big green tick that port is now opened and close utorrent and restart it and check the settings again if it's changed redo untill it's the same

9) If it shows a Yellow tick it means that port can't be opened or theres something wrong with your uTorrent. But you should open any Port you want.

10) now go to [Click Me](#) and type the port u entered for uTorrent and if it says SUCCESS that port is opened for your rat if it failed, try using a different port! :)

Thank you for reading my tutorial on how to Portforward on uTorrent!

- Anthony

The Hacktivist - April 6, 2011, 10:54 am

I did what you said mate shame i haven't got a rat to test it on. I opened port 81 :)

The Hacktivist

fckpro - April 6, 2011, 10:55 am

It has been written many times. It doesn't portforward your ports tho...)

?c??????-????? - April 6, 2011, 10:59 am

Yeah but it portforwards your game or rats or what ever D:

apt-get money - April 6, 2011, 11:24 am

Too bad , my ISP Blocks my uPNP'ed ports after two - Three days.

so yeah , i have to use a VPN wich will eat my bandwidth.

astros - April 6, 2011, 11:58 am

ok nice post and thnx

BUT i have a little problem, i ve done all steps, (the tick was yellow) but

when i test it on "canyouseeme" says that is open

>I start cybergate rat, and when i select my port to listen says that this port used by another program (utorrent probably)

What can i do? if somone knows , help me

sorry if my English is not good :(

sorry if my English is not good :(

first open cybergate , then Utorrent.

?c??????-????? - April 7, 2011, 3:45 pm

Yeah i had that problem aswell when i was doing uTorrent portforwarding and i couldnt fix it so i thought i'll just portforward from my router and it's easy and portforwarding through utorrent can mess up ur victims when that port cannot be opened again. I lost 10 Victims because i used uTorrent portforward but i released this post for people who can't get in the router or there mum and dad won't let them open a port for a rat or something. :)Im here to help and post topics for new beginners of hackers. I just recently joined HF and im hopefully to become a known member. :) Getting L33T Soon :)

reyreyhbk1 - April 7, 2011, 4:35 pm

Thats pretty cool :) gonna link this to all my friends

Tizen - April 11, 2011, 7:36 am

Nice Mate, Good to see you contributing to HF ;) keep up the good work.

?c??????-????? - April 11, 2011, 7:37 am

Thanks mate, Keep the comment guys. ;)

?¢?????-???? - October 30, 2011, 3:04 am

Thanks for the feed back guys, Keep it going ;)

Serkan313 - February 1, 2012, 2:28 am

Nice work but didnt work for me :(I had the green tick on uTorrent but when i tryed so see if it was open it said:

Reason: Connection timed out

sarsin - February 23, 2012, 2:14 pm

Couldn't forward my ports for ages and this worked. Cheers! Keep up the good work!

?¢?????-???? - February 24, 2012, 3:52 am

Thanks for the feed-back but this thread is old lol, I started this when I joined HF X'd

uglykidjoes - July 7, 2012, 4:12 am

very good tutorial worked like a charm thanks

Edit. I checked ports and got success so I made a server with darkcomet and ran it on myself and I didn't connect so I checked ports again and got error ports closed. I tried with both utorrent open and closed still same.

~GUT-FIGHTER~ - July 7, 2012, 4:34 am

You have to forward your port from your router's settings. Your guide only lets uTorrent use the opened port for communicating, that's not called port forwarding!

Rock3r™ - July 7, 2012, 5:46 am

Nice tutorial mate. But remove the text asking for rep. People may report it. It is not allowed here.

Strongarm - July 7, 2012, 10:25 am

I have heard that this just send alot of traffic to the selected port's way, so the computer/router think its open.

But im not sure.

Infinity. - July 7, 2012, 11:41 am

Are we suppose to ask for rep? Anyways thanks for this tutorial , doesn't work on me and didn't got a single victim..

?¢?????-???? - July 9, 2012, 7:29 am

I made this thread like a year or something, I'll edit it now though.

mastermansachin - July 9, 2012, 8:10 am

I did what you said mate shame i haven't got a rat to test it on. I opened port 441

?¢?????-???? - July 9, 2012, 8:23 am

(Jul 9, 2012 08:10 AM)mastermansachin Wrote: [\[CITE\]](#) I did what you said mate shame i haven't got a rat to test it on. I opened port 441

Go to <http://www.canyouseeme.org/> and type the port you portforward which was 441? If it says success or anything in green letters than it worked.

bayyak - March 26, 2013, 3:59 am

Thanks a lot mate,ive always tried million ways to portforward but none worked, but this one did.. thanks again

Dyck - March 26, 2013, 11:00 am

Quite a decent tut but i've seen some clearer ones, the text was too big + images would be helpful for some people..

Also advanced firewalls/AV's Block this within 5 mins,

Good tut though Cheers pal :')

Bewbs - March 27, 2013, 2:15 pm

Awesome tut,helped me alot :D :D :D

?¢?????-????? - April 4, 2013, 11:23 am

Lol no problem. :)

To/ Everyone

I won't be making more tutorials as I don't really go on HF no more.

????? - April 4, 2013, 11:55 am

Do i need my router password to portforward this way at all ?
