Thread: [Just cracked my first WEP](#)

Crimson - April 6, 2011, 4:32 pm

Just cracked my first Wi-Fi router password.

:D I feel accomplished :D

Diabolic - April 6, 2011, 4:37 pm

Well done mate, What software did you crack it with ???

Crimson - April 6, 2011, 4:38 pm

I used backtrack. :D

It was pretty easy to use.lol

It was pretty easy to use.lol

Now get a alpha card and crack the town with wepbuster lol.

My friend has alpha card and it pwns networks.

Blackpear~A.k.A~Blue - April 6, 2011, 5:09 pm

Now learn ARP poisoning :)

Crimson - April 6, 2011, 5:10 pm

One step at a time guys, lol one step at a time.

KR LTD. - April 6, 2011, 5:11 pm

Nice job, as you said, one step at a time.

Diabolic - April 6, 2011, 5:19 pm

Did you run backtrack on your PC and get into the networks around you cause I would love to do this :).

Crimson - April 6, 2011, 5:20 pm

I did it on my laptop because I still wanted to be on my desktop, and yes.

iMario - April 6, 2011, 5:21 pm

Good Job. Your a Haxor Now.

Diabolic - April 6, 2011, 5:21 pm

Do you have a link where I can download backtrack from ???

MySocksAreWet - April 6, 2011, 5:23 pm

<http://www.backtrack-linux.org/>

It's freeware.

OP, good job. I just used it last weekend to borrow some internet when mine was out.

Priizim - April 6, 2011, 5:24 pm

LOL it's Alfa but, Yes by far the best as it has more range even without using a longer usb cable.
@ OP you used on laptop because you still wanted to be on your tower? Use bt4 in a vm :)

Diabolic - April 6, 2011, 5:30 pm

Why would you use it in a VM ?

White Hat - April 6, 2011, 7:03 pm

Never attempted to crack any Wi-Fi passwords, don't find the reason to unless I really need to.
Congratulations tho :D...

Crimson - April 6, 2011, 7:19 pm

Priizim I don't have a tower because I have a brand new touch screen that has everything built right into the monitor, and second I was testing it out booting it from a flash drive.
and I I'm also running my Rat and shit so I was like the less on my new computer the better :P
