Would anyone mind giving me tips and resources on how to get a dox? I know to use google, but there has to be some sites that will do a reverse on the email or phone number. I have found some sites but all reviews say that all the sites are horrible and have hidden fees.

The DDoSer X v2.0 is infected. The other 2 look normal, but still wouldn't trust from a non trusted member. If you opened them, you might want to get your computer checked out here
