Are you sending the CRYPTER, so i can crypt by myself or do i send you my File to crpt
Is the $45 for monthly subscription?
Finally, how often do you fud the crypter, to avoid detection by window defender and anti viruses?

Good luck with sales, perhaps tell more about what language it's coded in, and what methods it uses =)

$45 is for the whole crypter, so you can crypt whenever you want. I offer a vouch/test crypt to see if it's compatible with your program.
I don't refud the crypter, hence the price tag.

I want you to use my xloader file, for the vouch/test
Let me know once you are ready
