Thread: [\[SXB\] Real working EXE Binder](#)

SaLiXeM - August 9, 2009, 4:40 am

With this program you can join 2 exe files into each other without AV detection! Also you can change exe icon to any icon you like.

Note: unzip the file before using it.

To be sure that the file is clean, here is the virustotal scan:

<http://www.virustotal.com/analysis/198a5a78276b85ee4ccc5c8f663e2589537ce6be8b00688dfb02db973f109d55-1249818279>

(just 3 unknown anti viruses know this as a trojan but it is not true)

I agree. This looks a little fishy

and you shouldn't scan virus total, use No Virus Thanks

Omerta - August 9, 2009, 7:52 am

you should have scanned it at Spoiler [\(Click to View\)www.novirusthanks.org](#)

½ **Hacker** - August 9, 2009, 7:56 am

WOW THIS WORKS GREAT!!! will keep this for future use, not a virus, scanned with BitDefender 2009 Antivirus, none found, and FUD compile! thx!! oh and gives you a kool option to change the icon also!

SaLiXeM - August 9, 2009, 8:12 am
