Thread: [\[TuT\] on how to trace people in omegle and chatroulette](#)

centron - April 8, 2011, 2:42 pm

this tut is going to show you how to trace people's location on omegle and chatroulette by getting their ip address.

step one

download a program called wireshark. you can get it here

<http://www.wireshark.org/>

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Capture.png[/IMG]

once you have that downloaded, install it and open it.

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Capture2.png[/IMG]

step 2

go to where it says capture and click on your interface.

you will now see something like this

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/3.png[/IMG]

step 3

open up your web browser and go to omegle(or chatroulette). open up anothe

tab and go to this site <http://www.whatismyip.com/tools/ip-address-lookup.asp>

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Capture4.png[/IMG]

now go back to omegle and start a video chat.

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Capture5.png[/IMG]

while you are chatting, youll notice that a bunch of blue lines will start showin up in wireshark. those are the packets that are being sent from your pc to the stranger on omegle's pc. in wireshark notice where it says destination. under it the blue lines will have either your your ip address or the strangers ip address. right click on any blue line that doesnt have your ip address under the destination and click manually resolve address.

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Untitled7.png[/IMG]

a little box will show up. copy the numbers.

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Untitled8.png[/IMG]

go to your web browser and paste the numbers in the the what is my ip tab.

[IMG]http://i182.photobucket.com/albums/x71/frm_rupert/Capture9.png[/IMG]

and presto! you have their location. us ip's will give you more info than foreign ip addresses

-CheapLive- - April 8, 2011, 2:48 pm

Aww Nice Tutorial Thanks a lots

RockyTheIV - April 8, 2011, 3:14 pm

Looks good, trying it out right now.

snake_escape - April 8, 2011, 3:17 pm

Nice tutorial..Should post in the tutorial section to get some more views

Kendama - April 8, 2011, 3:50 pm

Can anyone confirm this works?

amg64 - April 8, 2011, 3:53 pm

sounds good,gonna try now,thx ^_--

centron - April 8, 2011, 4:44 pm

ok, can someone move it for me please?

Boxing - April 8, 2011, 4:46 pm

Wow... how awesome would it be to get in Omegle and say... hey bro, you live in Ohio. They'd be like WTF STALK.

centron - April 8, 2011, 4:49 pm

(Apr 8, 2011 02:48 PM)-š???- Wrote: [\[CITE\]](#) Aww Nice Tutorial Thanks a lots
im just trien' to contribute. im glad you like it ;)

yea people freak out lol, then they disconnect

2_H8 - April 8, 2011, 7:47 pm

Nice TuT! Keep it up! ;D

Have to make more characters..

bigtt - April 20, 2011, 9:24 am

Thanks man.

I tried and it worked.

******** - April 20, 2011, 9:16 pm

Whoa! Awesome tutorial. Thanks a lot. Btw, nice chick in the chat box! ;) But think she's fake -_-

centron - May 14, 2011, 8:00 pm

ya shese a vid. i have a funner time on chat sites with vids than with my webcam. people will do all sorts of crazy things if a hot chick tells them to. if i tell them they tend not to listen

Yaco - May 14, 2011, 8:11 pm

wow, never thought of this, even though I use wireshark from time to time.

Thanks mate.

Zyzz - May 14, 2011, 8:23 pm

This is awesome, thanks so much :D.

happy45 - May 16, 2011, 12:14 am

Very nice TuT, I will try this soon !! Thanks for sharing

N3me\$!s - May 16, 2011, 12:23 am

hey nice work

thanks for posting!!!

asaggynoodle - May 17, 2011, 7:56 am

You have made me a better stalker my friend hahahha..

bhrooklyn - May 17, 2011, 8:17 am

nice tut.

not using omegle :P

? (P)(h)(x) ? - May 17, 2011, 8:26 am

Thanks for the great tut man :D That's cool :D

M4RZV1N3T - May 17, 2011, 8:34 am

Not a thing i didn't know, but nice tut anyways. This may help some people out.

robin 2 - May 17, 2011, 9:21 am

Aww Nice Tutorial Thanks a lots

bozon - May 17, 2011, 10:07 am

thanks for the tutorial but it wireshark doesn't work for me :(

when I click on the interface from the list it says

"The capture session could not be initiated (failed to set hardware filter to promiscuous mode)."

Mr. Anderson - May 17, 2011, 11:52 am

Awesome tut! Thanks for this, I will use it!

Headwiki - May 17, 2011, 12:11 pm

Nice, good to know

25 chars

× Jii × - May 17, 2011, 12:18 pm

Nice TuT !

Thanks alot ++ ^^

Restart - May 17, 2011, 12:36 pm

Trying it now thanks for this, good detailed explanation.

ImASmurf - May 17, 2011, 1:17 pm

Nice tut!

But when i got IP, most of the times the IP is from google =(

Any idea how that comes?

Giga - May 17, 2011, 2:31 pm

I tried that before, and it worked then, I saw your tut and I wouldn't work. There aren't any incoming UDP packages like in your screenshots. And I've selected the coorent interface.. So the stranger's IP won't show.. Any ideas?

In overall, nice tut

cool2bu - May 17, 2011, 3:10 pm

This is very nice, thank you. Ive been wondering how to do this for a while, now i know! thanks!

Loop - May 17, 2011, 3:20 pm

Nice tutorial, thanks a lot. ;D

Charles - May 17, 2011, 3:33 pm

Very cool tutorial. adds to bookmarks for later reference

Thanks

King_Cooper - May 17, 2011, 3:40 pm

Would this work with MSN or something like that as well?

centron - May 22, 2011, 9:20 pm

idk man I've never tried it with msn. feel free to test it out and let us know the results. if u want

Chamomile Tea - May 22, 2011, 9:27 pm

That's just amazing, thanks for the tutorial.

Abzfire - May 23, 2011, 2:11 am

Looks pretty nice and detailed, love how you added pictures. Ill read of this later thanks.

Ph03.nix - May 23, 2011, 8:47 am

Wow, I didn't know this is possible.

Anyways big thanks for sharing, it's a nice tut.

HCleaner - May 23, 2011, 8:54 am

good tutorial for taking IP.

Mr.AHMET - July 12, 2011, 4:25 am

haha awesome that's my first "HACK" if you want to call it thank you :)

Amnesia - July 12, 2011, 4:42 am

hello nice tuto and programe thank you man

Nice pic ?

metzntrix89 - July 12, 2011, 5:58 am

nice tut with pics man!!!! thanks.

cheerz!!! ?

E?!M - July 12, 2011, 7:14 am

Thanks dude Great tutorial :)

opx1230 - July 12, 2011, 7:25 am

nice tested confirm its work fine
the only thing
what you can do with ip?
nothing
99.9% from the users use fuckin routers
final result
you cant use metasploit
or any thing else
to get them

Coachip2.0 - July 12, 2011, 7:27 am

yes,but metasploit is inefficient ;)

Gruv3r14 - October 11, 2011, 7:25 pm

Lol, My friend told me someone was talking to her on omegle and told her, her address, and I just knew it was from this.

adrianpip2000 - September 21, 2012, 5:55 am

Nice guide, man. Will definitely try this out soon.

Dimeblade - September 22, 2012, 9:50 am

Amazing Tutorial. Thankx for the post. :D

archyand360 - September 23, 2012, 11:49 am

Awesome tutorial, vouched as i have it working now?

tantenoa1 - September 23, 2012, 12:34 pm

haha tried it and works ! :)
had some hours of fun with it ;)

Its Jeans - June 16, 2014, 7:57 pm

I have been trying this for a while and cannot seem to track down the other persons IP. Does this method still work?

Mr. Black Hat - June 16, 2014, 8:14 pm

Maybe its because you gravedug a post from 2011. Things have changed a bit.

sheheryar19 - June 16, 2014, 10:49 pm

Damn nice tutorial, really like the layout! super easy too follow.

savaging - June 16, 2014, 11:15 pm

nice tutorial bro looks pretty good im going to try it :)

Silence - July 19, 2014, 4:55 pm

I think things have changed by now. Or else Omegle is really stupid to still have this exploit in their system. I think the other person makes now connection with the Omegle server first and continues its way from the Omegle server to you, which will show Omegle's webserver IP instead of the one your talking to. Im still looking a way to get around this.

Edited - July 19, 2014, 6:34 pm

Nice looking tutorial. Haven't tried yet but looks straight forward. :]

notbad - July 19, 2014, 6:37 pm

nice tutorial bro looks pretty good im going to try it :)

EliteSlayer - July 19, 2014, 9:41 pm

Thanks for sharing the Tutorial.

~ Slayerz

DaRkYY-new - August 26, 2014, 10:06 am

It's funny seeing all these people saying it's a great tutorial. I mean, it is, but it is not working any more since Omegle changed a few things now.

Doncano - October 30, 2014, 2:32 pm

does omegle really connects users directly to each other ? I though it all went through some central omegle server...

Simply™ - October 30, 2014, 2:42 pm

Can someone PM me and help me out? When I open it I get this:

<https://gyazo.com/16f5c408373c14b31c138884fdb5167>

?Criminal - October 31, 2014, 12:44 pm

(Oct 30, 2014 02:32 PM)Doncano Wrote: [\[CITE\]](#) does omegle really connects users directly to each other ? I though it all went through some central omegle server...

Still works only for video chats due to the packets being too big too be routed via TCP text chat is routed via the server it self but the video chat is direct connection via UDP.

badgersm8 - October 31, 2014, 2:30 pm

looks good probably try it out eventually thanks.

Cyber Striker - November 8, 2014, 9:32 am

Setup a PHP logger and ask the person to click on the link. ;)

WhiteNigga - November 9, 2014, 9:16 am

very nice tutorial. big thanks for this

iphone5s - November 9, 2014, 10:26 am

Nice Tut Man Will check it out very soon thanks for this

prabhatec - November 10, 2014, 10:12 pm

awesome tutorial thnx for the help mate :)

thunderdick - December 27, 2014, 2:37 am

I wonder how easy it would be to write a script to automate the process so your not having to copy and paste and pause wireshark blah blah im just lazy but it would be a good hack to try and script

BeginnerWannaLearn - February 1, 2015, 12:05 pm

does this work on mac? :D i dont have very capable pc at the moment so just using my mac, and wondering if this works on mac
