If you don't care about your education or future-proofing yourself ahead of life, then you should by all means use ChatGPT for everything. Don't even bother trying to understand what it says, just copy paste it and give it to the teacher. I'm sure they'll be none the wiser.

The AI is not meant to do you work for you.

It’s meant to assist you getting it done faster and in some cases for essays it can help you lengthen what you’re trying to say and think outside the box not to write the whole essay for you.
