Thread: Looking for 1-3 serious partners to launch memecoins together.

flyingduck - *September 14, 2026, 11:05 am*

Hey everyone,

I'm not looking for spectators, dreamers, or people who need to be convinced to take action.

I'm looking for people who can actually execute.

What matters to me:
Strong marketing instincts
Excellent social skills / community building Understanding of crypto, memecoins and online culture
Ability to create attention and move people Fast execution — ideas are worthless without action
Ability to contribute something tangible, not just opinions Some level of financial skin in the game
Reliability and consistency

I'm especially interested in people who are strong at marketing, X/Twitter, Discord/Telegram, content, community, partnerships, memes, networking or growth.

You don't need to be an expert at everything.
You do need to be exceptionally good at something useful.

Not interested in:
People who constantly talk but never execute
Broke people looking for someone else to fund everything People who don't understand crypto or online communities
Partners who disappear when things get difficult
* "I have an idea" with zero execution behind it

The goal is simple:

Find a small, competent team -> launch fast -> market aggressively -> test ideas -> iterate -> scale what works.

No corporate bullshit. No giant team. No endless meetings.

I'd rather work with 2 killers than 20 mediocre people.

DM me with:
1. What you're good at
2. What you've actually built/launched/marketed
3. What you can bring to the table
4. Your level of experience with crypto/memecoins
5. Why I should work with you

I'll ignore generic "interested" messages.

Show me what you can do.

Tempting if I had time to dedicate.
I thought you'd have this all on hermes anyway

HerrWinston - *September 15, 2026, 5:25 am*
This is a really interesting concept, meme coin launching can get very profitable at current times and wish you all the best. I know if you find a few other skilled members this can turn out in crazy profit from what I see and hear from others.

Good luck with this!

you can join whenever you want, i'll keep you in the loop about the progress.
and yes, i use hermes but there are levels to it in terms of scaling.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hey I'm interested in being partners for this. I've done this before and got basically everything you're looking for. I'm good at setting up technology, crypto, memecoins, online culture, and scaling up fast.

What I can bring to the table:
I have essentially unlimited AI tokens so I've been using hermes agent almost every day. I have everything tuned optimally. No problems with browsing the web or signing up for stuff. Subagents, AI memory, custom code, you name it. As mentioned, I've been in parterships launching memecoins before. This was back before AI was a thing so advertising was mainly on 4chan /biz/ and reddit and done semi-automatically. Now days all this stuff would just be done with AI. Website creation, community management, ideas, code, whatever. I'm honest and will not try to rip anyone off. I can

definitely share AI tokens with the group as long as nobody abuses this and runs up a billion tokens an hour reselling them.
