Thread: [\[FREE\]\[Source/Release\]HWID System by KoBE\[Incl: PHP files/VB.Net Project\]](#)

TLF-KoBE - April 9, 2011, 11:09 am

-Notice: Don't use SPAM. It wont work..

Edit: I've added the download link to the thread. Thank you to everyone that provided feedback. If you have any issues with this, you can PM me but I'd prefer you reply to this thread in case anyone else is having the same issue.

I've been crazy busy lately and figured since I have some spare time I am going to release my HWID System for free. The reason being is because I don't have enough time to add more features (better encryption/VB Admin app) If you have any questions/comments post them here. I spent a good deal of time on this, so I'd appreciate it if you didn't leech this and slap your name on it calling it yours. Other than that, use it as you wish. Just remember where you got it from.

Since posting the [original thread](#), I've added:An admin page with user management

Ability for user's to change their login password

Features included:

Easy to implement

To use the system in your project it only takes 4 lines of code.

Unique Key

Each user is given a unique key to use in their programs. What it does, is encrypt their HWID and then sends it to the server. Before that, the key is salted with a Master key to prevent decryption by intercepting the message.

Message from server encrypted and Unique

After validation, the response from the server is encrypted to prevent crackers from gaining access to your program. Each response from the server is Unique preventing crackers from sending fake response to the program (ie redirecting traffic via hosts file)

Web Based System

Once logged in, you can add/remove HWID's instantly with immediate effect.

VB.Net Project

@zaabz - April 9, 2011, 11:10 am

That would be really awesome to get my fingers into :) I would love the source :)

xn3dx - April 9, 2011, 11:11 am

please bro i beggin you can i have this to my crypter i will also give my crypter free :)

Grieve™ - April 9, 2011, 11:11 am

id lovee the source. this looks aweomse!

Deceptive - April 9, 2011, 11:12 am

Would like to review over this source, login systems are my favorite. :)

Internap. - April 9, 2011, 11:15 am

Wow mate i would love to use this in my scabox ;-) but i am online with phone so cant download ;-)
can u send it via mail for.me ;-) thx alot

D??t? - April 9, 2011, 11:16 am

nice thread really i need HWID source. please

thank you so muchh

E.T - April 9, 2011, 11:18 am

Good idea and good project,
Please pm me with the project files :D

TLF-KoBE - April 9, 2011, 11:23 am

xn3dx.. your PM box is too full. Delete some stuff then PM me.

Everyone else that's posted should have a PM by now.

RiperFish - April 9, 2011, 11:26 am

Thank's fo the share, Rating added :).

ShadowGh0st - April 9, 2011, 11:28 am

Nice bro, looks great hit me with link?

tw0n - April 9, 2011, 11:28 am

I would love to see the source to this, looks excellent. Thanks.

millsrock - April 9, 2011, 11:28 am

I would like a copy of this please

MasterShake - April 9, 2011, 11:31 am

I would love the code. What did you code it in?

Hell Guardian - April 9, 2011, 11:32 am

i would love to check this login system Can you send it to me?

Zher0 - April 9, 2011, 11:32 am

Would love a look at this, thanks!

TheDubWubCub - April 9, 2011, 11:34 am

looks pretty cool! Great job! :D

Emilnerd - April 9, 2011, 11:34 am

Source please? : D

love it : D

Hodgy - April 9, 2011, 11:34 am

This looks really really nice.

Do you mind sending me a download link?

Thank you!

SkyyRaiden - April 9, 2011, 11:36 am

Hey man I would really like this. If I could get a copy I would really appreciate it.

Bullet Proof Jr - April 9, 2011, 11:37 am

Id love this.

pl0x pm mehh

TLF-KoBE - April 9, 2011, 11:43 am

(Apr 9, 2011 11:31 AM)MasterShake Wrote: [\[CITE\]](#) I would love the code. What did you code it in?

Php and VB.Net, could be easily added to a C# project as well.

Everyone should have PM's by now. If you posted and didnt get one then PM me.

GoldenPhe0nix - April 9, 2011, 11:50 am

Can i please have this. Thanks in advance. Am already itching to get my fingers on this.

Pentagon - April 9, 2011, 11:54 am

Could i get this ? Would be really usefull to me.

Thanks

Oeno - April 9, 2011, 11:58 am

can i have the link please ? thanks

treehuger9000 - April 9, 2011, 11:58 am

Hey i need this PM ME <3!

Thanks!

RDCA - April 9, 2011, 12:04 pm

Ill take this, thanks a lot bro. See you on sf a little bit later maybe.

eXperienc3 - April 9, 2011, 12:05 pm

can i have the source pls ?

thanks in advance :)

Parkour - April 9, 2011, 12:05 pm

Can i have this source code?

Deceptive - April 9, 2011, 12:08 pm

Making a server emulator for this now.

bevjones - April 9, 2011, 12:09 pm

WOW this would be great if you could send me the source.

Thanks

TLF-KoBE - April 9, 2011, 12:11 pm

(Apr 9, 2011 12:04 PM)RDCA Wrote: [\[CITE\]](#) Ill take this, thanks a lot bro. See you on sf a little bit later maybe.

No problem. I'll most likely be on Sf. I thought about releasing this on there too but nobody really uses the coding section there.. everyone pretty much uses HF.

(Apr 9, 2011 12:08 PM)TheMist Wrote: [\[CITE\]](#) Making a server emulator for this now. Sweet. Let me know how it goes.

chester1997 - April 9, 2011, 12:15 pm

Can I have one thanks I will credit you.

Angry Asswipe - April 9, 2011, 12:19 pm

I'd love to see this source, been looking for something good.

Pming d;

YceBoy2k11 - April 9, 2011, 12:22 pm

Can I have this please? Thank you.

Psychotic - April 9, 2011, 12:23 pm

I would love the source thank you .

Doctor07 - April 9, 2011, 12:32 pm

Thankyou very much, i have been waiting along time for this! :D

(Apr 9, 2011 11:12 AM)TheMist Wrote: [\[CITE\]](#) Would like to review over this source, login systems are my favorite. :)

Same here bro! :D ?

BravoTwoZero - April 9, 2011, 12:47 pm

Can I have this please?

And the login panel is Ajax right?

Thankyou and Grand Release

TLF-KoBE - April 9, 2011, 12:51 pm

(Apr 9, 2011 12:47 PM)BravoTwoZero Wrote: [\[CITE\]](#) Can I have this please?

And the login panel is Ajax right?

Thankyou and Grand Release

Yeah. The login panel is Ajax.

Grey Hat - April 9, 2011, 12:53 pm

Very high quality post you have here, well done. I am impressed.

I hope you like apples.

CAN I GET IT? pming you it now...

Gook - April 9, 2011, 2:32 pm

can i have this :x? looks nice.

-oNeiL

DvS - April 9, 2011, 2:54 pm

Will be PMing you, thanks!

the dweeb - April 9, 2011, 3:10 pm

Would really like to study this, by any chance I could get the download link? ;D
Thanks, and nice share!:))

Kosmiik - April 9, 2011, 3:57 pm

This looks really awesome, can you PM the download link?
I would love to implement this in my project. Also I love how easy it is to use and also the web admin feature!

CaZzUaLLv3x - April 9, 2011, 4:44 pm

i like the web panel. ipod conpatable

Mark? - April 9, 2011, 4:48 pm

i would love this, seems epic

Aeonhack Archivist - April 9, 2011, 4:54 pm

This sounds really nice. Thanks for offering something like this for free.

Cryptography - April 9, 2011, 5:09 pm

Lol, Alright. I wanna see the source for more info.

Southern Proper - April 9, 2011, 5:49 pm

Can you pm me the files :) Thanks.

Hodgy - April 9, 2011, 8:02 pm

This is really nice, I'm adding it to my project, Credits will be given to KoBe.

/dev/null/ - April 9, 2011, 8:03 pm

Can I get this please waiting for pm =)

0dayleet - April 9, 2011, 9:13 pm

May I have the source?

It looks very interesting, good work!

AirKode - April 9, 2011, 9:20 pm

Nice to see a proper HWID system :D. Would love to have it

.Accursed - April 9, 2011, 9:36 pm

Can i have the source Please? thanks

matanong - April 9, 2011, 9:55 pm

This is what I was looking for a HWID system for my apps
can you pm me the download link?

Coleak - April 9, 2011, 10:26 pm

Looks really good! Can i get a copy please?

Thanks in advance.

DubIsLife - April 9, 2011, 11:10 pm

Wow this sounds very interesting and I think this is my first post I usually just sift through the forum when I have the time. Please, I would love to use this!

(Apr 10, 2011 02:00 AM).Accursed Wrote: [\[CITE\]](#) Can i ask sir?

Where do i upload the .sql file?

On the Root Folder?

Upload it into you MySql Database... I would recommend using somethin like phpMyAdmin.

Thanks to those who vouched and gave feedback. Everyone should have a link by now. I'm glad people are finding this useful!

SancheZ - April 10, 2011, 8:32 am

Nice..too bad i am not developing yet though but from the way i see it...Good work u did here...

But really pming you right now for source..gonna need it pretty soon..(just a hunch)

fredde_jason - April 10, 2011, 8:40 am

This sounds great! I would love the source code ?

SteamSales - April 10, 2011, 8:42 am

i wanna review this, thanks.

Vazity - April 10, 2011, 8:42 am

Can i have a copy just PM me plz :)

RANDOWN - April 10, 2011, 8:45 am

Good Work Keep it and almost needed it !

supa - April 10, 2011, 8:52 am

Could i have a copy.

Also why ask people to reply on the thread?

TLF-KoBE - April 10, 2011, 9:00 am

(Apr 10, 2011 08:52 AM)supa Wrote: [\[CITE\]](#) Could i have a copy.

Also why ask people to reply on the thread?

To make people at least attempt to say thanks for the work I put it. It also self s the thread so more people can see it and take advantage of it. If I didn't have anyone respond to this thread and just left the link, I bet there wouldn't be half as many people posting in this thread. In another day or so I will most likely put the link in the OP.

PURP - April 10, 2011, 9:01 am

I would like to look at this if you don't mind :)

ayteh - April 10, 2011, 12:26 pm

can i get the source thanks., and God Bless ^_^

TLF-KoBE - April 10, 2011, 1:27 pm

Thank you to everyone that provided feedback. I've put the link in the OP now. If you have any issues please put them in this thread.

syrenen11 - April 10, 2011, 1:37 pm

Thank you very much for the share. I'm slowly working my way into VB. So, I'm getting a lot of sources/TuTs so I can learn all of them. It's just too overwhelming to get everything though at once. So, I'll work in sections. Again, thanks for the share man, hope to learn a lot from this. (Especially with the PHP files)

-Syrenen

Aeonhack Archivist - April 10, 2011, 2:46 pm

Thanks for sharing. I will hopefully learn from this.

Scaliber - April 10, 2011, 3:38 pm

at first i wanna say this guy is 1000% legit, helped me everytime i asked something would rep him more then 64136+
this is the best,i implemented this to my program ofc. (crypter)

ty for being KoBE

-Gilles

Dex - April 10, 2011, 5:45 pm

This looks really nice! Good job!

DublsLife - April 10, 2011, 7:09 pm

Any luck on the SPAM issue because I get "Nope" everytime I try even though ive done it all right :/
good luck and any suggestions on a webhost?

TLF-KoBE - April 10, 2011, 7:27 pm

(Apr 10, 2011 07:09 PM)DublsLife Wrote: [\[CITE\]](#) Any luck on the SPAM issue because I get "Nope" everytime I try even though ive done it all right :/
good luck and any suggestions on a webhost?

Still no... I havn't had time to look at the php side and figure out why it's not encrypting/decrypting correctly.

Police 10-13 - April 10, 2011, 9:15 pm

How do i use this lmao...

I've added myself into the DB with my encrypted password from my other MySql tables etc, but it wont let me login

Irion - April 10, 2011, 10:02 pm

Ah ah, I don't know why suddently people release HWID systems when I'm just about to release mine. Anyway, overread the thread, and for SPAM I know why it's doing this, it's because all you

poor people using free webhost to host a login system (?) don't know that SPAM is sending some kind of "end of file". I've noticed this before, if I remember well it's a tracker they include at the bottom of each page. This is why this can't work on SPAM.

And man, all this 1 key only thing is ridiculous. Well, compared to those posting HWID system where the HWID is stored in a .txt, this is good... But honestly I don't suggest anyone to protect their applications with this. This more of a fun project, or something that can give ideas to others. But can't say it's safe.

You know I must look like the horrible dickhead because you spent time into this, and you release it for free very nicely. I don't want you to take any offence in what I say, I think you're cool for being nice to others.

It's more for members that will use this in their "sup3r ub3r crypt3r" very soon (and I know they will), and their application will end up on forum next door within the next day. So... read it, understand it, take ideas from it. But don't use if you wanna be safe :p

But I like the way you wrote the client side, PHP isn't that yet, it's highly vulnerable to XSS injections.

TLF-KoBE - April 10, 2011, 10:26 pm

(Apr 10, 2011 10:02 PM)Irion Wrote: [\[CITE\]](#) You know I must look like the horrible dickhead because you spent time into this, and you release it for free very nicely. I don't want you to take any offence in what I say, I think you're cool for being nice to others.

But I like the way you wrote the client side, PHP isn't that yet, it's highly vulnerable to XSS injections. You have a lot of valid points. I pretty much learned PHP while I was making this so I'm sure there are a lot of vulnerabilities. I agree this is crackable, but combined with a good obfuscation it will at least make it difficult and thwart average leechers. As stated in another thread of mine, adding RCA to this would make it much more secure but I don't plan on taking this any further. No offense taken.. Thanks for the feedback. Oh and thanks for clearing up the SPAM thing. I've never used it and doubt I would of had time to check it out.

(Apr 10, 2011 09:15 PM)JeffreyS2 Wrote: [\[CITE\]](#) How do i use this lmao...

I've added myself into the DB with my encrypted password from my other MySql tables etc, but it wont let me login

Did you import the .sql file i provided?

Irion - April 10, 2011, 10:40 pm

You're welcome, don't thank me. It's very nice you take it this way and reply so politely. I really appreciate this. I think you mean RSA? If so, yeah it'd be much more secure all of a sudden, but a little more complex to do.

Well, the problem is that the key is stored as a string, and it's easy to deobfuscate a string (even if the rest of application isn't deobfuscated, you usually have the strings). So once you got key & variation indicator, simply encrypt a response, and reply to it correctly. This way, you don't even need to patch the application and you have a generic crack for all applications protected with this system. This is why it isn't good to use static keys.

And for the PHP file, just apply a html entities filter as well as mysql real escape to all your inputs, will prevent the most basic XSS injections.

Nice share ?

TLF-KoBE - April 11, 2011, 11:35 am

(Apr 10, 2011 10:40 PM)Irion Wrote: [\[CITE\]](#) You're welcome, don't thank me. It's very nice you take it this way and reply so politely. I really appreciate this. I think you mean RSA? If so, yeah it'd be much more secure all of a sudden, but a little more complex to do.

Nice share ?

Yeah that was a typo, I meant RSA. As for the escape characters, isn't that what addslashes(); does? And as far as cracking, the example project I gave really I guess isn't the best either, because using an if then statement to check for access is easily reversed as well. ???

Stenography - April 11, 2011, 11:45 am

awesome man thank u ..
25 ?

ShadowHelper - April 11, 2011, 3:21 pm

On the test project it always says nope to me I Can't seem to get it working I have paid hosting. I replace x.Key = "" with my secret key and put my HWID in the database but its not working

This is the error I'm getting on check.php
[12-Apr-2011 02:25:43] PHP Fatal error: Call to undefined function mcrypt_decrypt() in /home/shadowhe/public_html/HWID/check.php on line 69

TLF-KoBE - April 11, 2011, 5:34 pm

(Apr 11, 2011 03:21 PM)ShadowHelper Wrote: [\[CITE\]](#) On the test project it always says nope to me I Can't seem to get it working I have paid hosting. I replace x.Key = "" with my secret key and put my HWID in the database but its not working

Which version of PHP are you running? If you aren't using PHP 5 I would suggest upgrading. That error is because you don't have Mcrypt installed. See this link for more info.

<http://php.net/manual/en/book.mcrypt.php>

D4rKn3s5 - April 11, 2011, 8:13 pm

Thanks I need this for an upcoming project I'm working on.

The download link is posted at the bottom of the thread.

.Accursed - April 13, 2011, 7:50 pm

yow you missed something a .PHP file
index.php

TLF-KoBE - April 13, 2011, 7:57 pm

(Apr 13, 2011 07:50 PM).Accursed Wrote: [\[CITE\]](#) yow you missed something a .PHP file index.php
I didn't include it... if you want you can use a simple redirect to login.php

or

change it to index.php and replace the 1 instance in both usercp.php and login.php

cri96906 - April 14, 2011, 2:01 am

For me don't work :(I have created a member in the DB and now i can't login to my site..

(Apr 13, 2011 07:57 PM)KoBE Wrote: [\[CITE\]](#) I didn't include it... if you want you can use a simple redirect to login.php

or

change it to index.php and replace the 1 instance in both usercp.php and login.php
Renamed it but when i logged in there is an Error:

Code Warning: mysql_fetch_assoc() expects parameter 1 to be resource, boolean given in /home/mtvripni/public_html/hwid/index.php on line 56

Warning: Cannot modify header information - headers already sent by (output started at /home/mtvripni/public_html/hwid/index.php:56) in /home/mtvripni/public_html/hwid/index.php on line 77

PM me your site so I can take a look.

lorens13 - April 17, 2011, 9:14 pm

Gonna use this for my future project,thanks for this:)

epicdamn - April 25, 2011, 7:06 am

I get this errors

Now I get these

I don't know if I'd go that far. For the HWID errors, add the reference System.Management. For the other errors, either try reloading the project or c/p the code into a new project.

iDev. - April 25, 2011, 11:55 am

This would be a great tool to implement in future projects thanks in advance.

epicdamn - April 25, 2011, 3:03 pm

got it kobac thanks,but anytime I try to login,it says nope and im not using SPAM,im using my own webhost

? ? ? ? ? I ? - June 11, 2011, 4:44 pm

How would i go about implementing it?

nazarinlaw - June 12, 2011, 3:17 am

Sorry If i say wrong?

Login Credentials is not working mate....

I tried guest:changeme But nothing worked..

Please help me....

Sorry, username/passwords have been reset. Should work now.

nazarinlaw - June 12, 2011, 2:41 pm

Thanks Mate Works Great on Your Website...

Also Upload and done everything Like you Did

But this error will Popup

Code Warning: mysql_fetch_assoc(): supplied argument is not a valid MySQL result resource in /home/ nazar/public_html/hwid/login.php on line 56 Warning: Cannot modify header information - headers already sent by (output started at /home/ nazar/public_html/hwid/login.php:56) in /home/ nazar/public_html/hwid/login.php on line 77Did I

Miss Anything..?

Thanks KoBE

ii_SNiPEzZ_xX - *June 13, 2011, 9:07 am*

what am the four lines of code mate?

Catchitbaby - *June 13, 2011, 11:33 am*

thanks for this wonderful code

and i have same question how i can enter and save hwid into database becaause in current script there is two column's only name and email address

d3v1l401 - *June 13, 2011, 12:27 pm*

i love you,i was searching the PHP files like this!

TLF-KoBE - *June 15, 2011, 9:14 pm*

I'm no longer supporting this. They links will remain there but don't PM me asking to help set this up. Unless I know you, then you can. :D
