Thread: [Tutorial] Own'z Crypter 2.2.6 & Cybergate + Scan Tutorial *UPDATED*

fireflyyy - *November 28, 2010, 3:27 am*

Own'z Crypter 2.2.6 & Cybergate Tutorial + Scan

Atention!! This is ONLY for Own'z Crypter Users!!?

P.S.--> I Use always same Pictures for Cybergate becuse the Settings are always the same, only change on Own'z Crypter'Z but sometimes Settings on Cybergate Change!?

This is my New Tutorial for Own'z Crypter and Cybergate, and it will make it FUD and Fully Slave Restart
You Will Need own'z Crypter and Cybergate 1.07.5
Own'z Crypter 2.2.6 can be Found Here https://hackforums.net/showthread.php?tid=774486

Installation--->
[IMG]http://img534.imageshack.us/img534/7458/installationx.png[/IMG]

IMPORTANT!!
If you want add fake error Click on "Message" and add it, you can only add Fake error here, Answer's is on FAQ.

Anti-Debug--->
[IMG]http://img27.imageshack.us/img27/9049/77844115.png[/IMG]

Create Server--->
[IMG]http://img528.imageshack.us/img528/8705/createserver.png[/IMG]

Own'z Crypter 2.2.6--->
[IMG]http://img832.imageshack.us/img832/9427/zcrypter226.png[/IMG]

Note: Changing Icon and Cloning File helps make it FUD

Startup's Description:
All Startup's Have Persistant!

Startup 1-->standard startup normal this use name msnua.exe and dont use the name you write in Cybergate.
Startup 2-->startup strong 1 key, normal method and this use your server name you write in cybergate
Startup 3-->heavy startup, this make 2 key, one normal, another with reflection asembly this use too your server name you write in cybergate

The Drops:
Spoiler (Click to View)1 • HKCU Droop To Path: \Microsoft\MSN Messenger\msnua.exe •
2 • HKLM Droop To Path: \Application\Data\Microsoft\IdentityCRL\production •
3 • HKCU Droop To Path: \Application Data\Microsoft\SystemCertificates\My\Certificates •

Test's in Diferent OS Complete... Thanks to nelec??

Update for 2.2.6

I tested the version 2.2.6 of Own'z in different os, that's my result.
tested with Cybergate 1.07.5 ; in all case (exept in x64), the server works ; I've tested the possibility of restarting the server

WINDOWS XP SP3
Spoiler (Click to View)Startup1 + 3DES + Compressor => restart OK, REG OK
Startup2 + 3DES + Compressor => restart OK, REG OK
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 32bits With UAC
Spoiler (Click to View)Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 32bits Without UAC
Spoiler (Click to View)Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => restart OK, REG OK
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows Vista 32bits With UAC
Spoiler (Click to View)Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows Vista 32bits Without UAC
Spoiler (Click to View)Startup1 + 3DES + Compressor => KO no record in REG, so restart KO
Startup2 + 3DES + Compressor => KO no record in REG, so restart KO
Startup3 + 3DES + Compressor => restart OK, REG OK

Windows 7 64bits With UAC
no test because no change in changelog

Conlusion :
To work in all case, use startup 3

NOW IF YOU WANT BIND FILES TO YOUR SERVER

Now To Bind Your Server With Another File Just Add it with Own'z Tool'z

Go to Own'z Tool'z and on BINDER add the server and the files you want to bind... then go to "Options" Set Your Settings... Then "COMPILE"

if you have any question see in FAQ BEFORE POST...

FAQ

Q: Can i Check Option "Melt File" on Cybergate's?
A: No, Becuse it have error's with compatibility, and that answer can be applied too for "Google Chrome Passwords", "UPX Compress" and "Delayed Execution"

Q: Why I cant put Error Message in crypter unlike the cybergate?
A: Becuse when Victims Restart they will see always that error, unlike Cybergate,, becuse on cybergate at slave restart dont show again the fake error

Q: Cybergate's Anti-Debug can be all checked?
A: Yes...is not all anti-debug working with crypter, like anubis... but no problem, they run normal... no errors...

Q: Why i cant Bind a file with cybergate, and ownz crypter? Why Only with Own'Z Tool'Z??
A: Becuse if You add with ownz crypter section or Cybergate, when slave's restart it will open always the Binded File... so "Not Recomended".

Q: Wath Settings i should not use in tab "Options Startup" on Own'z Crypter?
A: You Should not Use the "Kill Firewall" and "Disable Restore Point" becuse it makes it DETECTABLE in RUNTIME

Q: The Crypter is Compatible with 32&64 Bits?

A: Yes!!

Q: Can i Put change icon on Ownz Crypter?
A: YES!!

Q: The Crypter Had Persistent Function to Prevent slave's Delete Server?
A: Yes, All Startup's have Persistant(Startup 1, 2 and 3)

Q: Taskmanager shows it as Form1 in the Window list, and on process show's our named Server in Cybergate, is That Normal?
A: c6p0 Fixed This Problem

Q: Does "USB Spread" and "Block Anti Sites" work with this?
A: Yes it Works Now with 2.2.6!

Q: Does the uninstall feature of cybergate still work when im using injection with ownz crypter?
A: No, unfortunately no... BUT HAVE ALWAYS A SOLUTION you can update server with A Diferent MUTEX and Still the 2 Servers, but only one will be active, the last updated.

If your question isn't in FAQ... Post here your FeedBack and i will assist you... Thanks

Special Thanks go to:c6p0<--Click to see the profile

Tolibon - *November 28, 2010, 3:32 am*
Thanks so much for this bro <3333

shifa786anjum - *November 28, 2010, 3:48 am*
great job let me check:)
hye kindly explain witch startup opt is better? startup1 , startup2 , or startup3 ,??

fireflyyy - *November 28, 2010, 3:56 am*
(Nov 28, 2010 04:48 AM)shifa786anjum Wrote: *[CITE]* great job let me check:)

shifa786anjum - *November 28, 2010, 4:32 am*
yes i have seen bro
but i mean by pic tutorial for noob

sorry i m not ordering just asking
anyways u did wander-full job

fireflyyy - *November 28, 2010, 4:36 am*
yeah, but remember, Own'Z CrypteR is For Expert not for n00b!

this is just a tutorial very explicit for people have dificulties, Understand??

shifa786anjum - *November 28, 2010, 4:41 am*
yeah u r right :)
too shortt

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
    <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.

JIT Debugging
To enable just-in-time (JIT) debugging, the .config file for this
application or computer (machine.config) must have the
jitDebugging value set in the system.windows.forms section.
The application must also be compiled with debugging
enabled.

For example:

<configuration>
<system.windows.forms jitDebugging="true" />
</configuration>

When JIT debugging is enabled, any unhandled exception
will be sent to the JIT debugger registered on the computer
rather than be handled by this dialog box.
Use A proxy to login with Own'Z CrypteR!

efkariux - *November 28, 2010, 5:04 pm*
You should really make a tutorial about what settings to use on darkcomet 3 to be able to FUD crypt your server with ownz crypter <3

thanx,

efka

r3m1x - *November 28, 2010, 7:25 pm*
thank you! this is awesome! btw, does anyone know if there is a binder that does something similar but with .jpegs? or .gifs? is this possible?

kingfisher - *November 28, 2010, 8:43 pm*
thx for this you really helped me..

Vort2 - *November 29, 2010, 5:48 am*
firefly how will I use a proxy to login to Own'z crypter? any directions?

I know to use a proxy only to enter to websites

Mohammish - *November 29, 2010, 8:08 am*
Lovely... Thanks alot for this guide!

fireflyyy - *November 29, 2010, 10:35 am*
(Nov 29, 2010 06:48 AM)Vort2 Wrote: *[CITE]* firefly how will I use a proxy to login to Own'z crypter? any directions?

use the same method...
change in settings in your browser...

Risheng - *November 29, 2010, 11:15 am*
I LOVVEE YOU ! :D Thanks a lot !

keezy619 - *November 29, 2010, 4:55 pm*
Auto EOF unchecked usually lets me crypt my file

mordred111 - *November 29, 2010, 6:48 pm*
Thanks for the tutorial. What file do I put in the clone file option?

byron675 - *November 29, 2010, 6:49 pm*
I need help with ownz crypter i followed his tut and had all the settings he had but i did it once and it workd but then when the slave/slave shuts down there computer i loose them as a slave, i think its because a verification pops up asking if they want to run that file how do i remove this to wear it opens automacticly without verification? just private message me or post below to help me(:

Arsi - *November 30, 2010, 1:10 am*
Thanks so much for this bro

BeGLethal - *November 30, 2010, 9:47 am*
I may have a realy stupid question but if you own a .com website is there any way to use this as a server instead of no-ip ? if your using cybergate...
thanks in advance

fireflyyy - *November 30, 2010, 9:52 am*
(Nov 30, 2010 10:47 AM)BeGLethal Wrote: *[CITE]* I may have a realy stupid question but if you own a .com website is there any way to use this as a server instead of no-ip ? if your using cybergate...
thanks in advanceLol, a WEBSITE??
no, I think no...

BeGLethal - *November 30, 2010, 10:09 am*
(Nov 30, 2010 10:52 AM)fireflyyy Wrote: *[CITE]* Lol, a WEBSITE??
no, I think no...little bummer haha i'll stick to no-ip then but just wondering apart from your own IP an no-ip are there any other options

matz - *November 30, 2010, 8:34 pm*
nice crypter...
its work and FUD =)

Jasabi - *December 1, 2010, 3:47 am*
i dont understand... did everything stated in the tutorial and yet my server always gets corrupted and doesnt load on my victims pc!
i dont know what im doing wrong. using cybergate with all the correct settings.
can anybody help?
Edit: just tested it on a victims pc and it seems to just be crashing when i upload and run it

morgan150 - *December 1, 2010, 3:49 am*
Thanks mate! nice tutorial! :P came in handy ;)

Cybomber - *December 1, 2010, 1:36 pm*
Thanks for the tutorial. I'm using cybergate. I'm kind of new to crypters and have a couple of questions if anyone could help me out.

What does the file clone do exactly and how do I use it? I'm assuming it does something like copy

the info of a legit program or something? Does this have any use other then for looks? Like what if I'm just installing a new server on a slave I already have? Any reason to use this option?

Also what's the stuff in the Own'Z Tool'Z section? Can I just ignore that stuff for now?

c6p0 - *December 1, 2010, 1:41 pm*
dont forgets !

with free version cybergates .
examples:
password recovery detected by UAC and uac block cybergate ...
not fault my crypter you loose your server .

for cybergates bypass uac with all functions i recommend you buy it!

Cybomber - *December 1, 2010, 2:02 pm*
I have a paid version of cybergate. When I try to crypt a file using this tutorial I get "Erreur : Attempted to read or write protected memory. This is often an indication that other memory is corrupt. - 4:34:05 AM"
Any idea what this is from?

UPDATE- seems like this problem cleared up after a reboot of my computer. Now my problem is that the server didn't work on the one client I tried it on.

KaLaMiiTy - *December 1, 2010, 4:10 pm*
i use this to fud my server but my victims cant connect.

Jasabi - *December 1, 2010, 10:27 pm*

Firefly? can u bypass the UAC?

ryuji296 - *December 2, 2010, 9:09 pm*
another problem is the start up problem... its not working...

DBag4Life69 - *December 2, 2010, 10:05 pm*

Ohh my god.
I found this tutorial, and I would like to use this crypter to follow this, but for some reason the password is too hard to get.
I don't know what the deal is, but the guy who put the password on there didn't explain clearly.

I need help finding the password, or I just need someone to please PM me the password, you choose.
I would prefer some help in FINDING the password, but it'd be faster to just tell me.

ryuji296 - *December 3, 2010, 5:21 am*
There's a reason why they put that kind of password.
And that is, separating the ones who worth it and doesn't

sorry for the double post... i can't delete the other 1 bcuz of insufficient rights...

ryuji296 - *December 3, 2010, 5:23 am*
There's a reason why they put that kind of password.
And that is, separating the ones who worth it and doesn't

gammatester - *December 3, 2010, 5:25 am*
thank you man.

really helped me a lot :)

tristan6100 - *December 3, 2010, 5:31 am*
This isn't working on win7 x64, very nice tut btw

fireflyyy - *December 3, 2010, 8:05 am*
(Dec 2, 2010 07:38 PM)byron675 Wrote: *[CITE]* Firefly? can u bypass the UAC?
My answer is "Yes".
But isn't on crypting!
is by creating a simple UAC auto-de-activate or buy Cybergate

tcrwt1 - *December 3, 2010, 11:00 am*
Still can't seem to get this to crypt from Win7 64 bit... is this likely to be changed any time soon?

EDIT: Also, it won'y connect after crypting... it connects fine prior to being crypted, but afterwards nothing happens...

yoyoatw - *December 3, 2010, 2:38 pm*
Are you going to make the DarkComet 3.0 Tut yet?

fireflyyy - *December 3, 2010, 3:49 pm*
Yes, When i get time man! I'm Very busy with make a new computer for me, now i am buying part's of CPU... XD
but i will do it for Cybergate.
For Dark Comet i will do it if i have time!
ok?

byron675 - *December 3, 2010, 5:28 pm*

well first off all own'z crypter isn't for noobs (no offence) so if you cant crack the pass you probebly shouldn't use is ;)

(Dec 3, 2010 07:09 PM)matz Wrote: [CITE] this is my problem....
im use version 2.2.6still have that same problem it was told it was fixed by c6p0 but it still doesn't work but its not a big deal if you infect someone who doesn't know anything bout computers they still dont know what to do they dont even know they are infected xD

btw when slave restarts its also shown as Form1 in task manager...
hope this gets solved that would be great ;)

shifa786anjum - *December 4, 2010, 5:11 am*
lolzz Own'z Crypter updated 2.2.7

byron675 - *December 4, 2010, 8:50 am*
Has anybody figured out how to bypass UAC?

SHARB - *December 4, 2010, 9:28 am*
I was trying my Server file in my Friend Pc but i get this error can help?

when you open server file you get this warining !

Ty in advance
make an update sir needed it badly LOL ^_^

Walking Hell - *December 7, 2010, 9:55 am*
tobad i cant get this to work on 64x systems :/

klex - *December 7, 2010, 11:18 am*
not working with 2.2.9 on win xp x32

tcrwt1 - *December 7, 2010, 12:04 pm*
Not sure what to do about this:

String reference not set to an instance of a String.

Help would be much appreciated.

EDIT: Somehow retried and couldn't get this error again. Never mind.

OKAY, new problem.

when I want to bind my crypted server, this somehow makes it detectable by 5/16, when the original server, when crypted, was 0/16. anyone know why this is? Should I crypt again after binding? I am only binding to a harmless help.exe...

Dark Randy - *December 7, 2010, 8:45 pm*
does this also apply to ownz crypter 2.2.9 also?

saru4141 - *December 7, 2010, 11:31 pm*
It's not working for me, can some body help me out, i am using 2.9 Own'z crypter!!

eXpLoD - *December 8, 2010, 2:42 am*
So i made the settings just like in the image,i got 30 downloads and i saw only 1 connection which vanished after 1 minute..

Fallenbot - *December 8, 2010, 8:11 am*

Very useful tutorial mate. It'll help many people who having problems with it.
