Thread: Unix DES Decrypt help

iGazzy - *December 6, 2010, 9:04 am*

Hello,

I am wondering how to Decrypt. I know that there's a site Crypo that does it for you but I cannot figure out how to tell which code is which so I can try to decrypt it..

I was told these codes were Unix DES and I cannot find a way to decrypt them.

If you could tell me a site or help me if here is a way with Crypo, that would be perfect. Or even if you could decrypt them for me, that would be appreciated.
