Thread: [\[Release\]Simple C# Calculator Source](#)

**ZiiDoN** - April 10, 2011, 5:33 am

Sup Guys I was bored so i just decided to code a C# Simple Calculator as i didn't see many coded in C# on hackforums. Its got the basic functions. Add, Subtract, Times, Divide and a few extra functions which are 'Answer' Which Copys the answer in the answer box and puts it into input1 also it has 'clear' which clears all boxes. I could add more functions if any of you need the code for a project.

~Derp

Everyone is copying Mr.Predictable, or whatever his name is. Quit using a copy of his signature please. I've seen it happen a lot on this forum.
