if you put a package of hundred hacking tools in one download link that means that is probably backdoored.

**[B]iishop** - August 10, 2009, 8:28 pm

Dont demand rep cause then you wont get it. Simply say rep if you like it. And if the person finds it useful the well rep you.

agreed.

**Demented** - August 10, 2009, 8:44 pm

Yes, Sorry MoBreez but I'd have to agree with most of our members here. 83MB of Crypters is quite alot. No one knows what's in there. If you'd post maybe the best 2 In a pack, that'd be good. But 83MB is pretty crazy. No one can actually rep+ you because know one knows what's inside. If you post one good crypter, the best working one, then sure. Everyone would be thankful.

Yeh this is a virus, Go fuck yourself mowarez 30% warning level. 55 posts. :).

**bernardo11** - August 10, 2009, 9:06 pm

This is a virus... GFY

**Padawan** - August 10, 2009, 9:07 pm

Post a virus scan of it...To be honest, I don't trust low post count. Just be cause of security reasons. I could see people not trusting me cause I have low posts. So don't take it hard.

**Demented** - August 10, 2009, 9:13 pm

I mean post count doesn't really matter, but it does show your active, and dedicated.

30% Warning Level, I don't think anyone can trust you.

**S I U I L I L Y** - August 11, 2009, 12:34 am

HaHa, Imma bind with 34 crypters then imma bind the crypters to the crypters then imma take those crypters and shove it up your..

But seriously we don't need that many!

**MyNameIs940** - August 11, 2009, 1:30 am

Thanks for the share (Even though theres a virus in it), but it's a waste because they are all detectable.

**MoBreeze** - August 11, 2009, 2:37 am

Hey Noobs if u dont want to download then don't no one is begging

Reason I have 30% Warning is because I didnt give credits to origional poster and noobs on here moan like a little babys to Mods

Now if you dont want to download then fuckin dont Im getting tired explaimng my self to bunch of 12 year olds

Reason I made up this pack is for 2 reasons

1 all the cryptors out there people charging money for  
2 1 of my VIP's has requested a Cryptor and as I have no clue about cryptors I just made 1 pack out of all the ones I could find

All you guys do on here moan like a little bichis like nuns on the day out..... FUCKIN GROW UP!!! for fuck sake

I have jhelped few members from this site and non of them had any problem with me helping em they even treusted me with theyr CPAnel login

so to all who think Im trying to GTFO

and reason I Posted all of them is becausde I dont fuckin know what people like some might like black dick some might like white

wtf do I look like nostradumbass?

Dont want it downt download it

[img][http://ricomoss.files.wordpress.com/2009/01/retards\\_we\\_all\\_know\\_one.jpg](http://ricomoss.files.wordpress.com/2009/01/retards_we_all_know_one.jpg)[/img]

Think its a virus and Im that dumpb to post it on hackers foryums then fuckin go for it

**Anxiety** - August 11, 2009, 9:37 am

If they are public they are most likely not FUD so why post it here?

**tornado103** - August 11, 2009, 9:54 am

Just make a new RAR/ZIP with all the best FUD crypters.

Make it legit and clean.

And you will get your +REP and you wont need to gtfo.

Simple.

Take away the Good from the Shitty,  
give us the good.

**Yin** - August 11, 2009, 10:16 am

You guys are all fucking retards. -sigh-

Like I post in a million threads, leave the poster alone. He just collected any crypters he could find. Does the title say FUD? No.

No one's begging you to download it, no one's gonna kill you if you don't download it. If you want it, you download it. Of course they'd have detectable shit. They're not FUD anymore. When you download, only use the crypters you WANT. It's not too hard to understand, really.

**gtpaokara** - November 18, 2011, 7:30 am

**010010** - November 18, 2011, 8:31 am

Half the software is probably binded with something extra added in.

**Zalg0** - November 29, 2011, 12:35 pm

Warez is not allowed.

You are leaking private crypters?
