Pangolin is an automatic SQL injection penetration testing tool developed by NOSEC. Its goal is to detect and take advantage of SQL injection vulnerabilities on web applications. Once it detects one or more SQL injections on the target host, the user can choose among a variety of options to perform an extensive back-end database management system fingerprint, retrieve DBMS session user and database, enumerate users, password hashes, privileges, databases, dump entire or user's specific DBMS tables/columns, run his own SQL statement, read specific files on the file system and more.

Database Support

Access: Informations (Database Path; Root Path; Drivers); Data
MSSql: Informations; Data; FileReader; RegReader; FileWriter; Cmd; DirTree
MySql: Informations; Data; FileReader; FileWriter;
Oracle: Inforatmions (Version; IP; Database; Accounts); Data; and any others;
Informix: Informatons; Data
DB2: Informatons; Data; and more;
Sybase: Informatons; Data; and more;
PostgreSQL: Informatons; Data; FileReader;
* Sqlite: Informatons; Data

At present, most of the functions are directed at MSSQL and MySql coupled with Oracle and Access. Other small and medium-sized companies are using DB2, Informix, Sybase, PostgreSQL, as well as Sqlite which isn't so common.

<http://teu-informatico.blogspot.com/2010/01/pangolin-professional-edition.html> hey and its not

cracked looks free

Hydra - April 12, 2011, 4:23 pm

Looks clean, I opened it and it opens and works fine. Thanks BUT! He might have binded it to the free version since there is no need of Cracking it b/c its free..

antrax_lovedie - April 12, 2011, 4:24 pm

Not binded. It's Virus FREE i want just to repair my rep :(

this is an Sql Injection tool

hich - May 12, 2011, 8:19 am

@antrax_lovedie : Thumb up bro, it's clean, and it's the PRO version.
You really deserve a +rep as it's very rare to find.

deluxesurfer1 - June 15, 2011, 1:07 pm

Thanks , i test the pro version,

sanakin - July 28, 2011, 5:46 am

hahaha free edition detect keyword proffessional not hahaha stupid cracker

Rok93 - November 13, 2012, 3:10 am

Thanks! I like it :)

It is better for dumping than Sqlmap or Havij
