Thread: [\[Project\]Let's make an open HF project - Ideas/Suggestions](#)

BaussHacker - April 13, 2011, 10:01 am

Well out of boredom I have come to one conclusion. Why not try make an open source project here at Hack Forums? It could maybe bring up a lot interest in already active members in this section and forum, but maybe also new members or visitors. If the interest is good, then it could be a success, but it needs peoples to understand what it's about and that they are interested in it all. We're not talking a small project, but something really nice and useful. Right now the plan is just an open project, but I will be updating this thread, when peoples find out more they want and once we have got to a start of the project.

Post any ideas and suggestions for the project. What should it be? Name? Requirements? VB or C#? Post anything on your mind that it could be.

The project it self will be an open project and everybody would be able to contribute to it, but it's not for leeching purpose, but for learning. Remember that, so if you join you have to contribute your self also, but you will be able to learn from others and you can maybe learn them something also.

If you got any questions make a reply or PM me :)

Suggestion list: (List of all suggestions so far)

Spoiler ([Click to View](#))

AIO (DDOS, Bruteforce, Email spammer, SMS spammer etc.)

Language C#

Language VB.NET

Desktop HF User CP

HF browser with the gecko engine

website builder

Rdogg112 - April 13, 2011, 10:04 am

No idea on what it could be, but language should definitely be C#.A

BaussHacker - April 13, 2011, 10:08 am

(Apr 13, 2011 10:04 AM)Rdogg112 Wrote: [\[CITE\]](#) No idea on what it could be, but language should definitely be C#.A

I would prefer C# also, but let's see what the interest is going for.

?BlueAce™ - April 13, 2011, 10:10 am

well.. if in case u need a VB.Net programmer.. hit me up.. i will gladly help.. ?

BaussHacker - April 13, 2011, 10:11 am

(Apr 13, 2011 10:10 AM)BlueAce_Pragy Wrote: [\[CITE\]](#) well.. if in case u need a VB.Net programmer.. hit me up.. i will gladly help.. ?

I don't need. It's an open project where all contribute and we make something. ?

hazza0999 - April 13, 2011, 10:11 am

If it's an open project between us all, would it not make sense for it to be in VB? I mean do more

people use VB then C#?

Ethereal - April 13, 2011, 10:12 am

(Apr 13, 2011 10:11 AM)hazza0999 Wrote: [\[CITE\]](#) If it's an open project between us all, would it not make sense for it to be in VB? I mean do more people use VB then C#?

C# is more widely used outside of HackForums.

The languages are interchangeable, we can easily convert the project both ways(SharpDevelop, anyone?).

BaussHacker - April 13, 2011, 10:13 am

(Apr 13, 2011 10:12 AM)Ethereal Wrote: [\[CITE\]](#) C# is more widely used outside of HackForums.

The languages are interchangeable, we can easily convert the project both ways(SharpDevelop, anyone?).

Even .NET Reflector can convert the languages, so peoples could just convert the codes from one language to another, if it's not the language they like the most. ?

hazza0999 - April 13, 2011, 10:14 am

True, after seeing this i might begin to step up from VB to C#, but more people could join in from here?

Edit: You've answered my question before i got to post it :D <3

YceBoy2k11 - April 13, 2011, 10:17 am

I'm looking forward for this.. I can help with both VB.Net and C#.. We just need a good idea for a project :)

Pussy Cat - April 13, 2011, 10:19 am

I'll 100% join, I'll prefer VB.NET though

Rdogg112 - April 13, 2011, 10:19 am

i use this , <http://www.developerfusion.com/tools/convert/vb-to-csharp/> , also supports Python and Ruby.

Modestep - April 13, 2011, 10:20 am

I prefer VB.net because i am good at it, but at the other hand i will learn c# and that isn't so bad. My only question for now is: what would we make?

BaussHacker - April 13, 2011, 10:24 am

(Apr 13, 2011 10:20 AM)dudesons123 Wrote: [\[CITE\]](#) I prefer VB.net because i am good at it, but at the other hand i will learn c# and that isn't so bad. My only question for now is: what would we make?

Anything. A game, an emulator, an application. Whatever peoples are interested in. That's why it's an open project. ?

Rdogg112 - April 13, 2011, 10:25 am

We could go for an AIO tool: DDoS, Email Spammer, SMS Spammer, Bruteforcers etc.

100th post wooo.

Modestep - April 13, 2011, 10:29 am

(Apr 13, 2011 10:24 AM)BaussHacker Wrote: [\[CITE\]](#) Anything. A game, an emulator, an application.

Whatever peoples are interested in. That's why it's an open project. ?We could make multiple things, maybe a form and then with buttons on it and each button is for a project, maybe we can make a HF browser with the gecko engine, or something for PM's. Count me in, and i have hosting.

BaussHacker - April 13, 2011, 10:33 am

Okay, so everybody who is in so far make a reply or post. I will be making a list of users up for it.

Ingenuity - April 13, 2011, 10:33 am

I could definitely join, but I hardly know C# (definitely not well enough to write a proffessional app)

Rdogg112 - April 13, 2011, 10:35 am

Im in, put me on your list(if this is going to be C#, VB.NET is too easy)

siimon00 - April 13, 2011, 10:35 am

Hm, I think this sounds like a really great idea and I will definately participate in it! :)

I would prefer the project to be written in C#, but again; it doesn't really matter as one could just convert the program to their needs.

My idea for the program would be: A special HF App; like a Desktop HF User CP, that allows you to view your inbox, your threads, your posts.

in the application you would have the opportunity to select a favorite Section / subforum and that section could be in the side updating very often so you would constantly be able to view whats going on right there.

^tell me what you think, and I will gladly participate; even if it's not my idea that's going to be used!
?

-Siimon ?

ident - April 13, 2011, 10:37 am

AIO (DDOS, Bruteforce, Email spammer, SMS spammer etc.)

some of us are a bit more grown up and knowledgeable to want to make kiddy shit.

BaussHacker - April 13, 2011, 10:39 am

(Apr 13, 2011 10:37 AM)ident Wrote: [CITE](#) AIO (DDOS, Bruteforce, Email spammer, SMS spammer etc.)

some of us are a bit more grown up and knowledgeable to want to make kiddy shit.

Then what's your suggestion? ?

You can't complain as long you don't put any effort :P

colorless - April 13, 2011, 10:43 am

I'm not really sure I've been sitting on this page for 5 minutes contemplating what to suggest and all I came up with was a website builder.

A simple easy way to create a website like drag and drop sort of like dreamweaver and Go-live but without any complications + it will be free.

Once the layout is complete have the program convert it to html/php/ (if we get really far java and sql)

I think this project would be nice because it gets everyone involved from web developers, programmers, even to the graphics crew.

BaussHacker - April 13, 2011, 10:46 am

(Apr 13, 2011 10:43 AM)colorless Wrote: [\[CITE\]](#) I'm not really sure I've been sitting on this page for 5 minutes contemplating what to suggest and all I came up with was a website builder.

Sounds interesting. With custom highlight etc. ?

Rdogg112 - April 13, 2011, 10:47 am

(Apr 13, 2011 10:46 AM)BaussHacker Wrote: [\[CITE\]](#) Sounds interesting. With custom highlight etc. ? Actually sounds interesting, we should adopt this idea.

HSPSoftware - April 13, 2011, 10:48 am

I would also join if someone came up with an idea (always the hardest right?)

My C# is a little stiff. I do not prefer either one of C# and VB as they are, as stated earlier, almost the same anyway.

- Hmm I guess I would feel stupid if I didn't try to give an idea myself.
Even though this is HF I think that it shouldn't be something directly hacking related. We have enough of that stuff anyway.

The problem is to make a big enough project that everyone can contribute to, and also at different levels.

Maybe some kind of chat system with desktop clients, file sending, encryption, online chat (login to chat online with everyone else even though they may be on desktop client), user profiles, maybe even webcam and all that stuff...

I think it would be fun and challenging to do. We would however need some servers but getting money for a VPS wouldn't be that hard would it? I would be happy to donate a couple of dollars each month if people used it.

Yup that's right. It could be anything as long as people are enough interested :)

Slayer - April 13, 2011, 10:55 am

Hoping to see the best from this :)

Well I have another idea... Why don't you try to make some kind of messenger? Only for HF users.

colorless - April 13, 2011, 10:56 am

If you'd like to make the web site designer I'd love to help anyway I can.

I know a little vb.net, java, c++, and php.

Not an expert in any of them but I do know 5-8 chapters in each book I have on them :)

siimon00 - April 13, 2011, 10:58 am

I actually think that this is a great idea! :)

-We could even implement this with my idea too! ? (I know I'm being selfish xD)

But anyways I think that's a pretty neat idea!

-Siimon ?

Modestep - April 13, 2011, 11:05 am

We can make a binder, that's not necessarily malicious, and i would learn alot from it. My ultimate goal would be to make a crypter

Uncol Dolan - April 13, 2011, 11:06 am

I can make stuff in .net ;) PM me with details ;)

Pussy Cat - April 13, 2011, 11:07 am

I'd like to join too ? I'm won't be very helpful in C#, but I'm good at VB ?

Vysse - April 13, 2011, 11:12 am

How about something that actively checks your PC for some of the commonly used viruses on HF. This could promote safer sharing on the forum. I doubt I could be much help to this other than knowing how most every virus installs and where to look. I wouldn't know how to tell if a.exe is a virus or if b.exe is a virus however. Just know what to look for manually.

StaTiX - April 13, 2011, 11:14 am

it could be everything in one package

crypter , brute forcer ,sms bommer , ddoser ,AV , RAT , binder .etc

you get the point

Ethereal - April 13, 2011, 11:16 am

You know who you can ask if you hit any issues.

Modestep - April 13, 2011, 11:16 am

And we can use alot of the functions that vb has, like My.Computer.**** and SystemInformation.UserName. I think that alot of user dont know about these. And they're fun to mess around with, and i am sure there are more of them

Uncol Dolan - April 13, 2011, 11:17 am

(Apr 13, 2011 11:12 AM)Vysse Wrote: [\[CITE\]](#) How about something that actively checks your PC for some of the commonly used viruses on HF. This could promote safer sharing on the forum. Nice idea, since 80% of viruses go to APPData, it can check whole APPData everytime you open .exe file :)

Vysse - April 13, 2011, 11:17 am

I am sorry but if you guys make this I and probably many others will not help in the least bit... not everything is bout destroying everyone's internet/pc life ya know...

(Apr 13, 2011 11:17 AM)iMadafaka Wrote: [\[CITE\]](#) Nice idea, since 80% of viruses go to APPData, it can check whole APPData everytime you open .exe file :)

Some go other places as well... the main thing to watch is your registry and also watch for injection to vbc.exe for non .net viruses. Then you have to also watch the temp folder.

StaTiX - April 13, 2011, 11:20 am

(Apr 13, 2011 11:17 AM)Vysse Wrote: [\[CITE\]](#) I am sorry but if you guys make this I and probably many others will not help in the least bit... not everything is bout destroying everyone's internet/pc life ya know...

well i only gave him an example , it can be anything in the package

av , or something wich detects outgoing connections
or a chat service

Obi-Wan Cannabis - April 13, 2011, 11:26 am

That's an awesome idea but I think we should do something that a community like ours never done before! Something really BiG.

I can help with VB.NET and a bit C#...

Redeemz - April 13, 2011, 11:29 am

Code it in C# or VB6 So there are no dependencies Also I'm interested mark me down!

ident - April 13, 2011, 11:30 am

(Apr 13, 2011 11:29 AM)dwart420 Wrote: [\[CITE\]](#) Code it in C# or VB6 So there are no dependencies Also I'm interested mark me down!

You really are a first prize idiot

DFTCHE - April 13, 2011, 11:32 am

This is a very nice idea but I can't code.

I can do the GUI or other GFX

ident - April 13, 2011, 11:34 am

(Apr 13, 2011 10:39 AM)BaussHacker Wrote: [\[CITE\]](#) Then what's your suggestion? ?

You can't complain as long you don't put any effort :P

Put effort in for what though? In theory it's a nice idea. All it will amount to is an application compiled with code samples from around the internet.

Vysse - April 13, 2011, 11:36 am

(Apr 13, 2011 11:29 AM)dwart420 Wrote: [\[CITE\]](#) Code it in C# or VB6 So there are no dependencies Also I'm interested mark me down!

Na I think we should code .Net so we have because thats the best programming language ever....

-_-....I swear if this guy helps the project will = fail....

(Apr 13, 2011 11:34 AM)ident Wrote: [\[CITE\]](#) Put effort in for what though? In theory it's a nice idea. All it will amount to is an application compiled with code samples from around the internet.

They both have dependencies, fuckwit.

C# - .NET

VB6 - COM/CodeJock

Gonzo - April 13, 2011, 11:46 am

TBF this will fail unless you come up with a unique and useful idea, stuff like a HF browser has been done (poorly) so many times, and unless you have the team and skill to compete with Google / Mozilla, etc then that should not be an idea.

An AIO tool, might be nice if you pulled it off in a good way. Considering there is so many of these out there.

Not rippin on you, I think this is a very good idea, but only if you have a good idea to develop on.

raamee - April 13, 2011, 11:49 am

Better develop an operating system. If you create that, you are DON>

Vysse - April 13, 2011, 11:52 am

Regardless I like the idea...

Even though I'm shooting at my own idea (or at least some part of it), Vysse is right... I know a lot of people have done it.

The problem I see with an AV however is just that it would never keep up. We have lot's of skilled people in here, but seriously. It wouldn't! The multi billion dollar companies is fighting hard, and we are a small group of people who work for free...

HEY! I know it's been done before but why not develop a file sharing protocol? Something like bittorent... Just for the fun of it?

Oh and the thing about an OS... would be so cool ,but It wouldn't really include more than a few people as it's quite complex.

Vysse - April 13, 2011, 12:20 pm

(Apr 13, 2011 12:18 PM)siimon00 Wrote: [\[CITE\]](#) Well, then we could try making it ourselves? :)
-I'm not saying that my idea have to be the one we use, I'm just talking for my case, because I personally think that many people could draw benefit from this program rather than an AV; there are so many free AV's already..

-Siimon ?

Nah this AV would target things specifically used on HF like blackshades.... and also only be available to HF members... and your idea isn't a bad idea as a program just not that huge of a project that needs a team plus it has been part way done...

(Apr 13, 2011 12:20 PM)HSPSoftware Wrote: [\[CITE\]](#) Even though I'm shooting at my own idea (or at least some part of it), Vysse is right... I know a lot of people have done it.

I think any developer on HF would be ok with the fact that people can protect themselves from the virus they are making and selling or giving away on HF... I personally would not want HF members (even the ones I hate) to be infected with something I made just for respect for this community...

siimon00 - April 13, 2011, 12:24 pm

Yeh you might be right. I just still think that the program could be made bigger than what you make it sound like ?

-Regardless, I'll still participate in the project, as I'd like to get the opportunity to try to work in a team and develop my skills that way :)

so to me it really doesn't matter, I just don't think that an AV is the way to go neither :)

-Siimon ?

I like the idea of the sharing protocol mate.

About the OS I started coding one with a friend some days ago (check my threads)...

HSPSoftware - April 13, 2011, 12:29 pm

(Apr 13, 2011 12:16 PM)DragonHunter Wrote: [\[CITE\]](#) why don't u guys make a class library with alot of functions etc... would come in handy someday if it has alot of stuff in there and everybody could put some of ther own code in there

Just make an SVN project to make it opensource and let people committ to the project
Dragonhunters idea isn't bad either. It could have all those "stupid" functions that you never get right...

On the other hand it would be big to include in our files after a few hundred commitments... But then again, we could just have it seperated so we could take out the classes we wanted to.

siimon00 - April 13, 2011, 12:30 pm

Yeh I know about that cosmos thing..

I took a look at it myself, and it was pretty easy.

the thing is though; not many people here would be able to get all drivers working and let it go on the internet and so on..

I for sure don't :)

-Siimon ?

Obi-Wan Cannabis - April 13, 2011, 12:31 pm

And I, to some extend, agree on this too.

but this would be more of a collection of functions and classes than it would be a project :)

-Siimon ?

Modestep - April 13, 2011, 12:33 pm

We could make something like a filesharing program, i upload a .mp3 and an .avi. And then baussshacker can download it, see a description, etc and see that i have uploaded it. Sort of a way to share awesome stuff

Vysse - April 13, 2011, 12:35 pm

-Siimon ?

Ya I also like the idea of this... maybe we could make a site for HF Coders (only those who are approved by people we choose to approve members) can add and get classes and functions.

Hell Guardian - April 13, 2011, 12:35 pm

Finally! It's about time :D

I think you guys should make an AIO!

And will have The Best Binder/Crypter/USG ... EVER!!

Why ? because simply the best minds of HF Will be working on it!!

And i think it should be made In VB.net so i can help you because iam not into C# :P

Edit:You guys should make a group And call it something like HF Team!

HSPSoftware - April 13, 2011, 12:38 pm

-Siimon ?

Yeah that's right of course... Didn't actually think about that aspect.

iCrack™ ... Cool project ;)

Anyone thought about something like TrueCrypt? It's done before, just for the fun of it...

I know I'm just spamming ideas, but you other guys (and girls?) should do the same thing too, so we can get some input to the discussion. This is like the brainstorming stage, so freak out! ?

(Oh gosh I hope it get's to something more "serious".)

iWhizKid - April 13, 2011, 12:43 pm

Make an anti-keylogger, i actually don't have any idea about its working process but code it you beasts. It will be an awesome Thing.

I'll suggest you guys to make some thing related to anti-hacking.

siimon00 - April 13, 2011, 12:53 pm

(Apr 13, 2011 12:38 PM)HSPSoftware Wrote: [\[CITE\]](#) Yeah that's right of course... Didn't actually think about that aspect.

(Oh gosh I hope it get's to something more "serious".)

Actually I am spamming my ideas ?

And I kinda agree with Vysse about that website thing! It would be cool! :D

but back On topic: I like the idea of a thing like truecrypt, and yes I know about it :)

but an anti keylogger has been made before, and I don't think that it would take that long time, and need a whole crew of coders as the only thing that needs to be done is encrypt your keystrokes ?

what about a HF File sharing thing. like with torrents only this is for us ?

I like the idea of a custom File transfer protocol as well ?

-Siimon ?

iWhizKid - April 13, 2011, 12:59 pm

Oh come on dude, make some thing that every one can use not only HF members.

Make a coding wikipedia lol.

siimon00 - April 13, 2011, 1:07 pm

(Apr 13, 2011 12:59 PM)Invincible Wrote: [\[CITE\]](#) Oh come on dude, make some thing that every one can use not only HF members.

They are just going to join us anyway... The forums are only open to reading if you register.

By the way, don't get good ideas out there I'm new here and don't want to be locked out of the project just because you set some limit to circumvent that fact about people creating accounts for one purpose! ?

Maybe this thread even spawn a couple of projects? :o

siimon00 - April 13, 2011, 1:15 pm

(Apr 13, 2011 01:15 PM)Invincible Wrote: [\[CITE\]](#) HF Project doesn't mean only for HF. It means HF

members will make it.

Well you're right :)

-But then give us some ideas? :)

-Siimon ?

BaussHacker - April 13, 2011, 1:16 pm

(Apr 13, 2011 01:15 PM)Invincible Wrote: [\[CITE\]](#) HF Project doesn't mean only for HF. It means HF members will make it.

Yup that's what I meant. It might also bring interest outside, if peoples are interested enough.

wir - April 13, 2011, 1:17 pm

I like the "file sharing" idea too

Tht sound very useful to me

FEL1X - April 13, 2011, 1:17 pm

There where tons of this projects.

Sadly, in most cases, always fail.

gl.

siimon00 - April 13, 2011, 1:19 pm

I actually think you're right.

I allready have some ideas for my next project ?

But yeh, people will just join anyway.

but come on guys? I mean, I gave some suggestions, SPAM DAMMIT SPAM! ?

No seriously, I actually hope that this gets into a more serious event ?

-Siimon ?

iWhizKid - April 13, 2011, 1:24 pm

Aah I don't have any idea in mind at this time, if i got any i'll surely suggest here.

If you want to make an HF only project and you know PHP you can design a Mybb plugin which help us hide a link from users untill they post in our thread. Like typing the link between [hide][[/hide] tags. It will surely decrease the post here and Pm me shit and load on hf servers and thread will also be active/live. I know its one man project but its still helpfull for HF and many other forums with mybb installed.

wir - April 13, 2011, 1:25 pm

Whats about an HF vb.net/c# IDE?

with faster debugging than vs10
And build-in haching funktions

ident - April 13, 2011, 1:31 pm

(Apr 13, 2011 01:25 PM)wir Wrote: [\[CITE\]](#) Whats about an HF vb.net/c# IDE?

And build-in haching funktions
Or a custom compiler using the same CLI ;)

xFic - April 13, 2011, 1:58 pm

How about a massive code-base type application that allows users search through other peoples snippets/sources and submit their own?

Maybe it could store everything in an online database that's made downloadable and can be opened and browsed through with another application.

Ingenuity - April 13, 2011, 2:17 pm

I like all the ideas, but most of all a webbrowser (webbrowsers are my difinite forte :P)

ident - April 13, 2011, 2:20 pm

Why not just make a gooey interface in Visual Basic and sell it for money?

Pussy Cat - April 13, 2011, 2:23 pm

I liked the idea about a library with lots useful functions ?

Tuxx95 - April 13, 2011, 3:15 pm

we should do C# AND vb so nobody is left out :P
and the library idea is pretty awesome

siimon00 - April 13, 2011, 3:17 pm

(Apr 13, 2011 03:15 PM)tuxx95 Wrote: [\[CITE\]](#) we should do C# AND vb so nobody is left out :P

I'll say it again.

The library ain't no bad idea, but the problem is that it wouldn't be a real code project, it's just a collection of functions.

We should create some cool application instead! ?

-Siimon ?

Cody8295 - April 13, 2011, 3:19 pm

(Apr 13, 2011 02:20 PM)ident Wrote: [\[CITE\]](#) Why not just make a gooey interface in Visual Basic and sell it for money?

And maybe we can trace the killers IP address?

OT: I think it's a bad idea.

Tuxx95 - April 13, 2011, 3:23 pm

-Siimon ?

ahhh you are right my first thought was a rat but thats already been done and is rather unoriginal what is we looked into the asp.net (website coding) side of things?

Ingenuity - April 13, 2011, 3:53 pm

IMO, if we do create something, it should be non-malicious...

Mapex - April 13, 2011, 4:04 pm

Why not try to write a .NET based scripting language based on Perl or something?

We could include things like a built in regex operator (Perl's =~). We could write a virtual machine, have each line interpreted into C# and compiled or have it interpret each line, put each instruction onto a stack and try to execute the code inside of the virtual machine.

Tuxx95 - April 13, 2011, 4:58 pm

what if we made a portable compiler? that would actually be rather helpful

Redeemz - April 13, 2011, 5:33 pm

(Apr 13, 2011 11:36 AM)Vysse Wrote: [CITE](#) Na I think we should code .Net so we have because thats the best programming language ever.... -_-.....I swear if this guy helps the project will = fail....

LMFAO ident your an asshole but so right...

I can't beat that logic. no reason to defend myself i suck!

apt-get money - April 14, 2011, 1:36 am

Im not the best .NET Coder/Programmer , but i can understand simple pieces of codes and get errors out of them.

If you need anything just contact me.

BaussHacker - April 14, 2011, 2:47 am

I will close this now and make a thread for the actual project choosing.
