Hey guys.

I've used this for about 5 days, and I can only say 1 word.

BEAUTIFUL!

There's a setup and a readme.

Readme contains how to install it, and the keys for making the program pro.

READ IT!

It's so easy, it might lag a bit, but when you're done using it, your computer will be a lot faster!

or <http://www.sendspace.com/file/dvcce1>

Cheers out!

I think this is right section, since it removes spyware, virus and such.

Oh damn.

I searched for SystemCare and nothing was found.
