Thread: [\[VB2008\] \[Your 2nd program\] Advanced Web Browser \[Codes, Screen shots, Download\]](#)

BETAhkr - August 11, 2009, 3:17 pm

I made a post a few days ago called "[VB2008][Your 1st program] Web browser"

It was just to teach some beginners some basic stuff to get them going a bit in Visual Basic 2008.

Well someone said to me "There's plenty of them, Make yours more advanced"

So I did...

This is how to create a Advanced Web Browser in Visual Basic 2008.

[You may download the source at the bottom of the page, Send it out, Use the code, I don't care... Enjoy!]

I want you to do a few things to your form1 as soon as you open a new project.

Do all your basic work such as the properties, the form name, make sure you stretch your form out all the way (It's a web browser), etc.

Add 1 Combobox, 6 buttons or pictures, 1 MenuStrip, 1 ToolStatusStrip, 1 timer.

Go to the bottom of your form you will see your toolstatusstrip.

Click on it and you will see a little box pop up on the side

click that and add a progress bar.

Your form1 should look like this.

[IMG][http://i28.\[censored\].com/fuqo7k.jpg](http://i28.[censored].com/fuqo7k.jpg)[/IMG]

&

[IMG][http://i25.\[censored\].com/2627fi0.jpg](http://i25.[censored].com/2627fi0.jpg)[/IMG]

--

Label your buttons or pictures what each one is.

Back, Forward, Refresh, Stop, Home, & the far right button is Go.

Take 1 tab control and make it the same size as your form 1.

It should look like this.

[IMG][http://i27.\[censored\].com/wb5f2e.jpg](http://i27.[censored].com/wb5f2e.jpg)[/IMG]

--

Now go to the menu strip and your going to make 3 rows.

1. File 2. Shortcuts 3. About.

In row 1 (File) put 4 options in this order.

Add Tab

Remove Tab

Website Properties

Exit

In row 2 (Shortcuts) put 12 options in this order.

Youtube

Myspace

Hackforums

Facebook

Tagged

Hi5
Bebo
Yahoo
AOL
AIM
Google
Wikipedia

In row 3 (About) your only going to have that row "About"
Do not add options to this.

--

Now lets put some code into our buttons or pictures.

Back button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).GoBack()

Forward Button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).GoForward()

Refresh Button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Refresh()

Stop Button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Stop()

Home Button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Navigate("hackforums.net")

Go Button:

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Navigate(ComboBox1.Text)

[IMG]http://i25.[censored].com/2qte4xw.jpg[/IMG]

--

Lets put in some code in to MenuStrip now.

Go to the 1st row file and add these codes

File - Add Tab

Code Dim Browser As New WebBrowser

TabControl1.TabPages.Add("New Page")

TabControl1.SelectTab(int)

Browser.Name = "Web Browser"

Browser.Dock = DockStyle.Fill

TabControl1.SelectedTab.Controls.Add(Browser)

AddHandler Browser.ProgressChanged, AddressOf Loading

AddHandler Browser.DocumentCompleted, AddressOf Done

int = int + 1

CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).GoHome()

File - Remove Tab

Code If Not TabControl1.TabPages.Count = 1 Then

TabControl1.TabPages.RemoveAt(TabControl1.SelectedIndex)

TabControl1.SelectTab(TabControl1.TabPages.Count - 1)

int = int - 1

End If

File - Website Properties

Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).ShowPropertiesDialog()

File - Exit

Code Me.Close()

Lets put code into row 2 now (Shortcuts)

Shortcuts - Youtube

```
Code CType(TabControl1.SelectedTab.Controls.Item(0),  
WebBrowser).Navigate("www.youtube.com")
```

Shortcuts - Myspace

```
Code CType(TabControl1.SelectedTab.Controls.Item(0),  
WebBrowser).Navigate("www.myspace.com")
```

Shortcuts - Hackforums

```
Code CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Navigate("hackforums.net")
```

Shortcuts - Google

```
Code CType(TabControl1.SelectedTab.Controls.Item(0),  
WebBrowser).Navigate("www.google.com")
```

Shortcuts - Wikipedia

```
Code CType(TabControl1.SelectedTab.Controls.Item(0),  
WebBrowser).Navigate("www.wikipedia.org")
```

You will get the idea of adding more shortcuts (If you want)

No need for me to put the code in for all of them

Especially since you can download the project at the bottom.

Now row 3 (About)

Double click on "About" and add this code.

--

Now go to your timer1, Add in this code.

Code MsgBox ("Put the About me of the program in here")--

Now open your code and right under Public Class Form1

Put this whole code.

Code Dim int As Integer = 0

```
Private Sub Loading(ByVal sender As Object, ByVal e As  
Windows.Forms.WebBrowserProgressChangedEventArgs)  
    ToolStripProgressBar1.Maximum = e.MaximumProgress  
    ToolStripProgressBar1.Value = e.CurrentProgress  
End Sub
```

```
Private Sub Done(ByVal sender As Object, ByVal e As  
Windows.Forms.WebBrowserDocumentCompletedEventArgs)  
    TabControl1.SelectedTab.Text = CType(TabControl1.SelectedTab.Controls.Item(0),  
WebBrowser).DocumentTitle  
    ComboBox1.Text = CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).Url.ToString  
End Sub
```

Then double click on your form1 to get to your Form1_Load

Enter in this code.

Code Dim Browser As New WebBrowser

```
TabControl1.TabPages.Add("New Page")
```

```
Browser.Name = "Web Browser"
```

```
Browser.Dock = DockStyle.Fill
```

```
TabControl1.SelectedTab.Controls.Add(Browser)
```

```
AddHandler Browser.ProgressChanged, AddressOf Loading
```

```
AddHandler Browser.DocumentCompleted, AddressOf Done
```

```
int = int + 1
```

```
CType(TabControl1.SelectedTab.Controls.Item(0), WebBrowser).GoHome()
```

It will look like this.

[IMG]http://i28.[censored].com/2uszazb.jpg[/IMG]

Now add your icon, Save your project, Build it.
And now you have an Advanced Web Browser that was coded in
Visual Basic 2008.

Here is the download for the source.

"I uploaded with MediaFire.com which scans files for a virus before uploading it"

Code

Endeavour - August 11, 2009, 6:29 pm

Wow, really good work man, I just started learning some VB not that long ago, and I'm sure this can get me off to a good start.

+rep if i could :P

tylerdav44 - August 11, 2009, 10:24 pm

how well its detailed you just taught ppl how to do it right there nice work man

BETAhkr - August 12, 2009, 10:22 am

Come on people, Comment on this, This is a great tutorial!!!

degger - August 14, 2009, 3:06 pm

awesome man, well explained + good pics. NICE work dude. Good for beginners like me!

DrSponge - August 14, 2009, 3:44 pm

Very nice :) good work

starstruckedsam - August 14, 2009, 5:21 pm

great work! im new to VB. i created my own browser but wasn't able to get certain codes. this helped me finish it.

BETAhkr - August 15, 2009, 1:21 pm

Thank you to all 3 of you.

EMIN?M - August 22, 2009, 5:46 pm

Great work dude helped me alot

BETAhkr - August 22, 2009, 7:48 pm

Well, You made me this sig, And I helped you with the web browser...

Lets call it even? lol. :)

Security-Root - August 23, 2009, 2:22 am

Nice Webbrowser! Keep It Up :)

the gost - August 23, 2009, 4:24 am

this so great mate keep it up

BETAhkr - August 23, 2009, 12:47 pm

Thanks to both of you above me ^^

SgtPunishment - August 31, 2009, 9:54 am

I found this tutorial, and i've completely updated my current browser, and my god it looks amazing

now, but my only question is, how do I get the ToolStripStatusLabel1 to update like from "Loading..." to "Done" once the web page has finished loading?

Oh yeah, how can I use cut / copy / paste / select all with this browser? as well as Open and Save... ? I had it on my previous browser, but I can't use it on the advanced one made by this amazing tutorial

BlueMelon - August 31, 2009, 10:03 am

Well, on the Go or enter or w/e button.

ToolStripStatusLabel1.text = "loading..."

double click the webbrowser (default should be documentcomplete)

Add

ToolStripStatusLabel1.text = "Done!"

KiiNG - August 31, 2009, 7:07 pm

I am very new to VB.NET and I just downloaded your copy for now (I will attempt to make my own soon) and I was wondering if I have to convert "Advanced Web browser.sln" to .exe ? thanks

- KiiNG ;

hacker-007 - September 1, 2009, 2:46 am

thanks for upload an good work(:

XIX - September 5, 2009, 7:22 pm

How to you make the tab box, maximize too when you maximize the browser?

Black Art - September 5, 2009, 7:24 pm

Yeah this is a really good tutorial thanks for the effort and good job! ?

BETAhkr - September 5, 2009, 7:44 pm

XIX, Just stretch your form all the way, It should fit your computer screen.

zer0cool - September 8, 2009, 4:06 am

very nice tutorial, thank you

BETAhkr - September 8, 2009, 5:33 am

Thanks, If you take the time and put a lot of work into it, It can be an amazing web browser.

BETAhkr - September 24, 2009, 2:51 pm

LOL, I got mad thanks for this post, no reps, lol, what the hell! :(

D0ggyD0gg - November 13, 2009, 4:19 am

Dude the link

<http://www.mediafire.com/?sharekey=5a00dce134c3035cd8f14848abf485dde04e75f6e8ebb871> isnt working the file isnt there

i just finished your first tut and my VB crashed so now im pissed and just want to download the files ok i finished this browser and i wanted to see if u had an even more advanced tutorial for this. i want to add more stuff to make it alot better looking.

TheBlackMarket - November 13, 2009, 2:04 pm

Nice work m8! Keep It Up! =D xD

BETAhkr - November 19, 2009, 10:53 pm

Ok, I will have to make a new one and upload it to #, I will do it ASAP.

Sorry for the inconvenience about mediafire, They got shitty lately.

Euras - November 23, 2009, 5:43 pm

brilliant tutorial!!!! thanks alot!

BETAhkr - November 24, 2009, 1:46 am

No problem, Thanks for the credit, The new source download will be added soon, Sorry, I've been busy.

zombe888 - November 24, 2009, 6:51 pm

WOW dude this is VERY AWESOME thank you, I give you +rep in words I cant give rep :(

BETAhkr - November 28, 2009, 12:53 am

Thank you, I will have another post up soon with the source code again.

Sepultra - November 28, 2009, 12:58 am

can u make a istealer ?

August - November 28, 2009, 12:59 am

Good start man, if you guys want i can give u guys some more advanced features u can add !!

BETAhkr - November 28, 2009, 1:41 am

NEW ADVANCED WEB BROWSER SOURCE CODE DOWNLOAD HERE:

<http://www.#/?d=PB8ACNCP>

Please Read the READ ME.TXT that comes in the .rar download.

Thanks.

-BETA.

iceblitz - November 29, 2009, 1:02 pm

Thanks i finally finished my browser but i tweaked some aspects and added a design to it

[IMG]<http://i437.photobucket.com/albums/qq99/masternm34/screenshot.jpg>[IMG]

The-One - November 29, 2009, 1:12 pm

Nice, good explained.

ROBOSTEIN - November 29, 2009, 1:23 pm

@iceblitz

Whats up with the "Phish" option??

FrenchcoreRadio - November 29, 2009, 1:25 pm

show it in action pelase :)

iceblitz - November 29, 2009, 3:09 pm

(Nov 29, 2009 02:23 PM)ROBOSTEIN Wrote: [\[CITE\]](#) @iceblitz

Whats up with the "Phish" option??

well I made alot of tool espically phishing tools, when my browser is complete it will have links to all my software ect and the phishing stuff i made, paypal, runescape, world of warcraft, facebook ect.

BETAhkr - November 29, 2009, 4:58 pm

Yes, My own personal browser I use many different tools and programs that I made and added right in and multiple different options such as opening notepad, or MSPaint, Etc for quick access to files you might need to use a lot.

Keep up the good work Blitz.

h3cker.me - November 30, 2009, 5:22 am

Thanks a lot mate! It works perfectly, heres my browser guys:

[DELETED]

BETAhkr - June 22, 2010, 2:38 am

Don't download h3cker.me's "browser" there is no scan and his rep is -5, Please post virus scan's of any program in the same post where you post the link for your program, I don't need any virus's going around in my threads, Thank you.

Panagiota - June 22, 2010, 7:09 am

Thanks for sharing Man!

Good work!

Braco Asshole - June 22, 2010, 9:19 am

That's a nice tutorial BETAhkr. You could've used GeckoFX Engine and make it more "Advanced" too.

Please lower your "bump" posting.

Zer[o] - June 22, 2010, 9:30 am

this is kinda asking for rep:

(Aug 11, 2009 11:18 PM)BETAhkr Wrote: [\[CITE\]](#) Thank you for your opinions, I deserve more rep than I get, But I don't mind since I'm here to help people, Not get rep.

Thank you and I hope your enjoy!

but on topic it is very detailed and a great share

BETAhkr - July 4, 2010, 8:50 pm

If I wanted rep I'd say "Hey, Give me rep! :)", I was just stating a fact because around the time this came out, I also had about 20 other helpful self made tutorials.

Dawncore - August 30, 2010, 11:28 am

thanks man helped alot but where can i get the images from o_O ??

Imperialz! - August 30, 2010, 12:19 pm

Thanks, can you re-upload the source? Its not there :\

alexalex246 - August 30, 2010, 1:24 pm

Nicely done tut, i really like the buttons for home and stuff, you make it yourself?

XiX Eb0y XiX - August 30, 2010, 1:27 pm

Another HQ tutorial thanks for this.

Gamertag - *August 30, 2010, 5:27 pm*

Great work dude, helped me a lot, thanks.

Rue - *August 30, 2010, 5:35 pm*

ROFL where's the advanced part?
