Thread: [\[Project\]Let's make an open HF project - Developement\[C#\]](#)

BaussHacker - April 15, 2011, 2:19 am

Okay the project has now been running for some few days.

First it was to make suggestions etc. Then I created a thread where you voted for which project it should be.

These 3 projects was the one which had most votes: (It will be C# as stated in the other thread).

Chat (Like msn, yahoo etc.)

Botnet

Filesharing app

Now the developement of the project will start and we have to choose between those 3 which one to make. If you want to join the actual developement, then PM me and I will give you my msn.

Thank you to all who's interested.

I will be updating this thread everytime something new is added or there is some useful informations. You can still come with suggestions etc. You can also go in/out of the project anytime you want.

?

medinjo - April 15, 2011, 2:20 am

I'm interested but I don't code in c#.. Anyway making a big HF botnet would be cool xD

I vote for that!

BaussHacker - April 15, 2011, 2:24 am

It's not vote for it anymore. When peoples add my msn I will invite them to the developement chat and we decide which one to make.

qqhf - April 15, 2011, 3:23 am

I'll help develop the chat application if you want.

ShootMeh - April 15, 2011, 6:27 am

Just curious, I'm not a C# coder, however I'm currently learning. Was wondering if I could maybe join and watch the development, maybe it'd help me in my learning process.

Ingenuity - April 15, 2011, 6:33 am

Because languages like C# and VB, etc are cross-compatible (such as when you compile a C# dll it can be used in VB and Vica Versa), do you think that any VB coders would be able to join the project?

BaussHacker - April 15, 2011, 7:11 am

Yup. You can still join, the codes can also be converted there is a lot tools for it etc. Just PM me and I will give you my msn.

Numair - April 15, 2011, 8:47 am

I am interesting in joining this and creating a File Sharing App. Some of my question i need answer.

1. I am VB Coder, can i still join i have just little bit of experience in C#
2. What type of File sharing app, you want to make P2P or LAN Communicator.

Hoping to be get joined. :-)

Doctor07 - April 15, 2011, 8:48 am

This Chat application, somehow only available to L33ts & Ub3rs that are registered on HF. That would be sick.

s3v3red - April 15, 2011, 10:45 am

That would be sick.

No point in discriminating, the money in your pocket does not determine your skill

Ingenuity - April 15, 2011, 11:05 am

No... if non l33ts/ub3rs are gonna write it, then fuck making it only for l33t/ub3r.

ident - April 15, 2011, 11:08 am

why do you have to be l33t or ub3r. I never can quite understand this concept. Most l33t Ub3r are actually diabolical coders.

hxkd - April 15, 2011, 11:08 am

Make a chat program, you sort out features and shit, show someone and get them to make a GUI while you and a few others finish the features, then post, get advise and improve.

hxkd

Slayer - April 15, 2011, 12:09 pm

Add filesharing to Chat application, but make it a bit more advanced.

shadow1992 - April 15, 2011, 12:19 pm

(Apr 15, 2011 10:45 AM)s3v3red Wrote: [\[CITE\]](#) No point in discriminating, the money in your pocket does not determine your skill

Yes men,totally agree with you! Some people here steal some money, pay them here and they think because they become l33ts that they know everything and that they are gods!

At least not all l33ts act like this!

BaussHacker - April 15, 2011, 12:24 pm

Quoted for the truth.

Well all who's interested PM me.

YceBoy2k11 - April 15, 2011, 12:51 pm

That would be sick.

It's an OPEN project. I think I know what you are trying to say but you should know there are quite a few LQ L33t or Ub3r members and there are quite many normal users that help people a lot. Making some other requirements like post count and rep would be understandable opposing to requesting a membership as there are members that can't afford a L33t or Ub3r membership.

Now back to the main subject. I'm ok with anything you guys are going to do. I'll PM you for your MSN as soon as I get some time. Other than that, I'm looking forward to this and I have quite a few ideas already :).

Xylon - April 15, 2011, 1:02 pm

Lets do a HF filesharing application! it would be awesome to have! there you could upload keylogger etc, and much other things!

ManDoR - April 15, 2011, 1:24 pm

Hum... I've created a chat like MSN but in vb.net... If you want the source PM me

BaussHacker - April 16, 2011, 11:44 am

Anymore peoples who will join?

Add my mail.
