.bLaZeD - April 18, 2011, 12:49 am
.Net ghost lol.

Give me a minute or too, ill see if I can do it.

EDIT: Correct me if im wrong, it combines user and serial to get a final output of an encrypted Rijndael text?

DragQueen - April 18, 2011, 1:07 am

ok this is bad crack me
bcz i need to give a string / int to decrypt
ur byte and it can be anything
and in fail u just show me a label
u dont compare nothing
so this cant be a crack me
call it decrypt me ...

Blue Screen of Death - April 18, 2011, 1:08 am

(Apr 18, 2011 01:07 AM)DragQueen Wrote: [\[CITE\]](#) ok this is bad crack me

so this cant be a crack me
call it decrypt me ...
if you are so good, why don't you crack it?

DragQueen - April 18, 2011, 1:11 am

i dont know what username he use to crypt his byte[]
funny isnt ? and i dont know what word length he use
so how u plan to crack it ?
and the genius use reflection to load his byte
so on fail byte decrypt u go into catch section
and u see label ... Oh funny one

Nazworth - April 18, 2011, 9:35 am

Hey I just woke up. Wanted to know how your making out :)

pr0t0typ3 - April 18, 2011, 9:38 am

This is not a CrackMe. It is more a bruteforce me as nothing else is possible. That does not mean that it is special good or something it does just mean that it is impossible to do without brute-forcing.

Nazworth - April 18, 2011, 11:16 am

(Apr 18, 2011 09:38 AM)pr0t0typ3 Wrote: [\[CITE\]](#) This is not a CrackMe. It is more a bruteforce me as nothing else is possible. That does not mean that it is special good or something it does just mean that it is impossible to do without brute-forcing.

You have a point Mr. pr0t0typ3 :)

idonotcare - April 18, 2011, 11:34 am

So am i right that as long as he doesnt gives the data our with which he encrypted it (Username & Serial) its not "Crack" able?

So the first time you sell it on the marketplace it will be crackable again? :)

Correct me if i am wrong.

Nazworth - April 18, 2011, 11:39 am

(Apr 18, 2011 11:34 AM)MarcelCoder Wrote: [\[CITE\]](#) So am i right that as long as he doesnt gives the data our with which he encrypted it (Username & Serial) its not "Crack" able?

Correct me if i am wrong.

Yes, you can't crack this without the key. There is a way to do it, but it's extremely difficult.

1337x1337 - April 18, 2011, 11:48 am

Anti-KObac XD hahahah damn funny

Ethereal - April 18, 2011, 11:49 am

Why can't you just patch the encryption code?

Nazworth - April 18, 2011, 11:50 am

(Apr 18, 2011 11:49 AM)Ethereal Wrote: [\[CITE\]](#) Why can't you just patch the encryption code? Because it won't work. You can try, but It won't decrypt it correct.

Ethereal - April 18, 2011, 11:54 am

(Apr 18, 2011 11:50 AM)[R]elapse Wrote: [\[CITE\]](#) Because it won't work. You can try, but It won't decrypt it correct.

So what you're saying is that the rest of the program is encrypted, and when you log in correctly, it decrypts it? If that's true, the key is there.

Or is the User/HWID is used to decrypt the data?

Nothing is uncrackable.

Nazworth - April 18, 2011, 11:59 am

Nothing is uncrackable.

Yes nothing is uncrackable, No one will be able to Brute force the key is a reasonable amount of time, and The Username & Serial is not stored in the application itself.

pr0t0typ3 - April 18, 2011, 12:13 pm

(Apr 18, 2011 11:54 AM)Ethereal Wrote: [\[CITE\]](#) So what you're saying is that the rest of the program is encrypted, and when you log in correctly, it decrypts it? If that's true, the key is there.

Nothing is uncrackable.

The username and password (which is unknown is used as a decryption key for the appplication which will be invoked after you decrypted it using the write key)

1337x1337 - April 18, 2011, 12:19 pm

(Apr 18, 2011 12:13 PM)pr0t0typ3 Wrote: [\[CITE\]](#) The username and password (which is unknown is used as a decryption key for the appplication which will be invoked after you decrypted it using the write key)

I also know a program what is using this way, it's called PrevX Anti-virus, i tried to debug it and some other ways but it's really good protected. (I'm a beginner @ cracking)

NiTrO

pr0t0typ3 - April 18, 2011, 12:22 pm

NiTrO

Get one valid login and dump it from the AppDomain it was loaded to, not a hard task.

Pen and Paper - April 18, 2011, 1:38 pm

lol. ill give it a try.

right now i just see - CodeDom,DES & Rijndael Encryptions.

nice shit :)

hope to find something...

idonotcare - April 18, 2011, 1:53 pm

Bro, you wont get it when kobac & proto didn't

All you need is 1 valid login to crack the app but since this guy isnt going to give some usernames + serials out you cant crack it^^

Its not even a secure protection since the only thing you need is 1 valid login to crack it.
(Correct me if i am wrong)

besimbicer - April 18, 2011, 1:54 pm

relapse bruteforceME have a pack ?

Nazworth - April 18, 2011, 9:16 pm

(Apr 18, 2011 01:54 PM)besimbicer Wrote: [\[CITE\]](#) relapse bruteforceME have a pack ?
What are you talking about?

besimbicer - April 19, 2011, 2:16 pm

(Apr 18, 2011 09:16 PM)[R]elapse Wrote: [\[CITE\]](#) What are you talking about?
my bad english dont know full english learn okay??

Nazworth - April 19, 2011, 2:19 pm

(Apr 19, 2011 02:16 PM)besimbicer Wrote: [\[CITE\]](#) my bad english dont know full english learn okay??

I'm really sorry, but I don't get what your trying to tell me ?

PPDP - April 19, 2011, 2:45 pm

I think he means a patch?

Banks? - April 19, 2011, 3:07 pm

I think he is trying to ask if you used a packer on this. Other then that, I have no clue.

Nazworth - April 19, 2011, 3:09 pm

(Apr 19, 2011 03:07 PM)Banksy™ Wrote: [\[CITE\]](#) I think he is trying to ask if you used a packer on this. Other then that, I have no clue.

Yea, I would answer him. I feel bad, but theres nothing I can do for him ?

The Penguin - April 19, 2011, 3:42 pm

so...wait, whats the point to this?

Nazworth - April 19, 2011, 7:41 pm

(Apr 19, 2011 03:42 PM)The Penguin Wrote: [\[CITE\]](#) so...wait, whats the point to this?
To brute force it obviously? But idt you would be able to. :P

Stenography - April 20, 2011, 1:11 am

WoW dude no one can crack it here xD

Nazworth - April 20, 2011, 6:16 am

(Apr 20, 2011 01:11 AM)PolarX Wrote: [\[CITE\]](#) WoW dude no one can crack it here xD
Top secret methods, lol :)

stefsot - April 20, 2011, 6:32 am

(Apr 20, 2011 06:16 AM)[R]elapse Wrote: [\[CITE\]](#) Top secret methods, lol :)
And this technique can't be cracked -.-
I use the same for my sProtector.

Nazworth - April 20, 2011, 6:42 am

(Apr 20, 2011 06:32 AM)stefsot Wrote: [\[CITE\]](#) And this technique can't be cracked -.-

Yea, I tried it out yesterday. It's cool :)

The Penguin - April 20, 2011, 7:07 am

(Apr 19, 2011 07:41 PM)[R]elapse Wrote: [\[CITE\]](#) To brute force it obviously? But idt you would be able to. :P
i gathered so much but then that would make it a "brute force me" not a "crack me" which is what Kobac does... that's all i was saying, no offense.

Nazworth - April 20, 2011, 7:09 am

(Apr 20, 2011 07:07 AM)The Penguin Wrote: [\[CITE\]](#) i gathered so much but then that would make it a "brute force me" not a "crack me" which is what Kobac does... that's all i was saying, no offense.
Did you read the title of the thread? "BruteForce Me v5.2"

Mr.TwEaK - May 5, 2011, 6:43 pm

I would love to give it a try but i wouldnt know what im doing lol, I cant crack or brute for shyt!! lmao but nice release I really wanna see someone crack it xD.

-TwEaK
