Really? Look at the bottom, and the icon.

Bottom: "Status: Welcome to SoNiC DDoSer 2.0" which reminds me of this: "Status: Welcome to Double DDoSeR 2.0".

Prices= With setup and the whole shabang \$20 prety reasonable...:)
Booter + Setup + Fud Crypting the Bot 0/40 may i add= \$50

Now i don't understand this the setup and the whole shabang as you said is 20. That includes the booter i beleive and all set up. The other option is booter/setup/fud crypting. The only extra thing is crypting please correct me if i'm wrong your charging a extra 30 bucks for crypting o.o?
