Thread: [\[TUT\] How to E-Whore on Craigslist \[TUT\]](#)

One Punch Man - April 19, 2011, 12:53 am

Method privatized. Due to the increase of over-saturation on Craigslist, massive threads being created about questions that already have been answered here, and people closing/flagging these kinds of posts on craigslist/replying with nonsense to these ads because they think they're cool.

PM me for method.

Requirements:

Post count over 100

No -rep

Must post here before PMing

Use of proper grammar when PMing me

DO NOT FLAG OTHER MEMBERS CRAIGSLIST'S POST.

DO NOT SHARE THE METHOD WITH ANYONE ELSE EXCEPT YOURSELF.

METHOD NOT FOR GIVEAWAY ANYMORE. PM FOR DETAILS

Useful guide :) Watch craigslist get flooded noww though..

CheaterGuy - April 19, 2011, 8:53 am

Will definitely try this but dont ads like these get removed?

Haunted™ - April 19, 2011, 8:56 am

So , you wont be getting any chargebacks from this method.
Right ?

One Punch Man - April 19, 2011, 9:54 am

They will get removed in a matter of time, but you'll still receive customers before that happens.

Chargebacks depend on how they're sending it.

Bug Senpai - April 19, 2011, 10:11 am

Made a craigslist post the other day. You don't need to register.

One thread focused on using Chat Rooms, which I had no success on and another focused on using CL, but was badly explained.

Mine is just a more in depth tutorial, made by me, from my own words.

If you have nothing good to say, then please don't say it at all.

111 views and seven replies.

:sigh:

CheaterGuy - April 21, 2011, 12:23 pm

Damn i just tried this. I posted the ad at 1am and when i got back from school I had over 20 replies! Thanks

To get an eWhore Paypal do you recommend I use a VPN?

And just send the money to my main account? :D

It doesn't matter as long as the paypal your creating is in the US. If your going to create a Canadian one, then I do recommend using a VPN.

Send money to your main once or twice a month, not as a gift. You'll get limited if you do.

When you reply to your slaves, make sure you have something covering your IP like proXPN, just for extra protection.

Bout to get \$500 o.O

Worked for me. Got \$40 from 2 buyers.

+ Does anyone know what happens if you register your account and they have your cell#? Will they do anything with it?

beer30 - April 26, 2011, 2:01 am

They won't do anything with your number. I guess this method would work but it sounds like alot of unneeded manual work. Google "EZ autoresponder" or even "responderking".

I'm just worried because if they have my number, wouldn't they just ban me from posting using my account?

And if this violates (which it does) CL's rules/tos, couldn't they contact me? I'm sure they do this to people.

Qyte - April 28, 2011, 3:11 pm

Okay, first of all, Thanks a lot. This guide was not the first one I have tried to e-whore, but It defiantly is the most successful.

Although I have some Tips of my own that I learnt from this. (Made me \$71.78)

Firstly, you don't actually need to make an account/verify with a phone outside of the US (not sure about this everywhere but you don't in Australia)

Another point is if you actually have a sad/desperate story people are a little bit happier to pay you, and not charge back. (e.g phone bill, parents house)

Also, "Proxy up", or get a VPN, if you need a free one, use hotspot shield.

Now for Payment. I prefer PayPal but you can use what ever. When making the account make it Australian/Canadian and you don't need to verify (Except with email)

Lastly, when customers stop coming, change the city. Say your using sydney.graigslist.com.au change it to brisbane.graigslist.com.au for new customers.

Hope this post helped, least I can do.

No problem. Glad it worked for you.

I personally don't proxy because I've noticed it cuts down my browsing speed, but if you want the extra protection, go for it.

I post in various cities like NYC, Seattle, ect. But posting too many ads in different cities might confuse you. (You post in Seattle but a guy in NYC your trying to get wants a hookup. You screw up by saying a city in Seattle instead of New York.)

I'm not sure if you HAVE to make an account, but for this tutorial, I'm recommending it.

You can post three ads a day.

Post one in the morning, afternoon , and in the evening.

On weekends, post at night, one hour apart each post.

corndogs3 - May 2, 2011, 4:34 pm

What's a good reason (has to be legal) to tell my parents where I'm getting all this ewhoring money from? I told them I sold cracked minecraft accounts and they wanted me to stop since it's illegal.

Also, what cities/states do you recommend posting in? I tried big cities and small cities. For big cities, my ad stayed up longer and I got a lot more replies. For small cities, my ad got flagged really fast and I only got a couple of replies =/

Liefje - May 2, 2011, 5:29 pm

I did this and got 30 bucks out of it! So nice! I did it again but I'm not getting anything right now. Anyone know what city I can get more customers?

One Punch Man - May 2, 2011, 5:31 pm

Use big cities like LA, Seattle, NYC, ect.
Popular cities with lots of population.

Liefje - May 2, 2011, 5:40 pm

Is there a way to change the cities or do I have to make a complete new ad?

I made 300 bucks this week. MEGA NICE! Question though, some of the guys send payments and I don't get fees taken out. But paypal takes 1.17 out of some of them. So far, they've taken 7 bucks!!

Does anyone know what I can tell my "customers" which payment to click on so I don't get fee'd!!

I believe there is no way. If you can get a friend to use their phone, that can work.

Washington - May 7, 2011, 3:07 pm

How could I verify phone number, if I didn't live in US?

One Punch Man - May 9, 2011, 4:25 pm

HF rollback.

You have to get someone within the US to verify your account. Doesn't matter who it is, just make sure their not using a VoIP or a free texting app such as TextFree.

Other than this in the road, you can handle the rest.

Keep posting successes/failures!

Get two US phone #'s and use the gmail trick (putting a dot in a gmail address, ie: example@gmail.com to e.xample@gmail.com) for the other email. So when people reply, you only have one main account where you receive those emails.

Chat-Avenue. Not recommended though, waste of time. Best choice is to find your phone and verify. Its worth it.

I know my post count does not reach 100 yet, but is it still the same tutorial?
