Thread: [Question about using fake webcam clips for ewhoring...](#)

Joeym84 - April 20, 2011, 7:10 am

Ok so I was wondering if anybody found it easier to show the guy a pic of a hot chick with her clothes still on, then just show them a video of the same girl showing off the goods? Instead of pretending that's she's actually on a webcam. I mean I can find tons of clips of webcam girls but all of them are watermarked with some adult link from whatever site their on, which I have no idea how to get rid of. And there isn't much gradualism in most of the videos. They all start out pretty much with their clothes off. How have any of you doing the fake web cam clips managed to get rid of these issues??

And have u tried just showing them the video of the hot chick?

enVisiOn - April 20, 2011, 7:14 am

If the watermark is at the bottom, use ManyCam or WebcamMax.

Capture just above the watermark with the screen select part.

In order to get these videos, we go to an adult website and hire a camgirl for like an hour and have her do the things that we request.

Comment above has got it absolutely correct, just cut out the watermark if it's not in a compromising position.

And no not alot of the webcam videos have alot of typing - so edit the video and put the little bit of typing in a loop sequence, and use it for as long as you need to. If you find a video of a girl chatting topless.. Why not use it? Maybe tell them your topless and horny to talk them into it, or even better there might be a part where they are covering their tits with their hands... Loop it and use it as a 'preview' I bet they would love something like that.

Remember you don't need your videos to be too 'gradual' because these pervs are paying for exactly that. The quicker that video shows nudity and action the happier they will be.

He brought up issues and asked how we got around these issues. I mentioned what I did to get around certain issues. No gradualism, then chat loop. Watermark, edit it out. Don't respond to pictures, use a good preview.

Didn't mention the video idea because it's insane as not many people will believe its you, and would think you just downloaded it off the net (which you would have).
