It does. May be you should try now. ?

I can't believe you added a bit.ly [WARNING: potentially infected] link to redirect to your forum. That isn't really HQ you know.

But the forum looks good, a never before seen MyBB theme.

It looks...professional tbh.

Goodluck,
Cane.

What's wrong with bit.ly [WARNING: potentially infected]? It's just a URL shortner. It's not a PTC.

I know. But redirecting with bit.ly [WARNING: potentially infected] after having a TLD domain is just wrong IMO.
