Thread: [\[VB.NET\] Speech Recognition \[VB.NET\]](#)

Siy? - April 25, 2011, 1:06 am

Hello guys, this is my first tut so please dont flame =_ =

Okay, today i am going to show you guys how to use Speech Recognition in VB.NET.

What Do You Need:

Have Speech Recognition (Win7, WinVista, WinXP)

Visual Basic/Studio 2005/2008/2010

Microsoft Speech Object Library (if you update your machine, you will have it, else you have to google it)

A file i uploaded with a virus scan, if you dont trust me cause i got low posts, please gtfo. i'm trying to help you so if you dont trust gtfo. thank you.

its a verry small file.

Download: <http://www.mediafire.com/?h6ktkqggla9xerr>

Virus Scan:

<http://www.virustotal.com/file-scan/report.html?id=3b884286e6fdeab5b056e0dc3f122b6e08f6fa6060e2717527f1a7e17b9edf72-1303717546>

Quote:File name: SpeechLibrary.rar

Ok, open up Visual Basic/Studio..

New Project> name it whatever you want.

Project>Add Existing Item > Browse > SpeechLibrary.vb(the file you downloaded)

than

Project> Add References... > COM > Microsoft Speech Object Library

ok, now to enable the Speech Recognition, Add a button OR add the following code in the main form (form1).Load;

Quote:SpeechLibrary_StartSpeechRecognition()

'this code will enable the speech recognition

double click the Speechlibrary.vb (IN YOUR PROJECT)

scroll down until you see

Quote:Private Sub SpeechLibrary_COMMAND_LIST()

now i've already added an example for you guys;

```
If (program hears; Speech ) Then  
GOTO GOOGLE=D
```

```
Quote:      If SpeechLibrary_ResultToString = "speech" Then  
            Process.Start("http://www.google.nl")  
        Else  
            MsgBox("speak more clearly")  
        End If
```

SpeechLibrary_ResultToString = "speech" = What you say, what the program hears

Process.Start("http://www.google.nl") = what the program does after it hears it.

MsgBox("speak more clearly") = a messagebox that pops up if you dont speak clearly enough.

now open Speech Recognition then debug the application you made.
enable the speech recognition and say; Speech.

NOTE: if you dont know how to get to Speech Recognition, or if you have never done it before

Start Menu> Control Panel > type in the searchbox; Speech Recognition, and start the tutorial.

I DID NOT MAKE THE SPEECHLIBRARY.VB ITS MADE BY
Copyrighted Ashley M Begley

i hope it helped
this is my first tutorial on this forum
?

Emilnerd - April 25, 2011, 2:50 am

Thanks for the share m8! :D, i can't get my mic to work Though.

Blue Screen of Death - April 25, 2011, 2:57 am

wow, this is very nice. thanks for this share!

Siy? - April 25, 2011, 3:18 am

Thank you so much guys:D

-Siy

Numair - April 25, 2011, 4:08 am

Really nice share. Haven't thought about this in VB.net.

Slayer - April 25, 2011, 7:21 am

Hmm... I made to start on a click of a button, but a second after I clicked the button, I get this:

Spoiler ([Click to View](#))

[IMG]http://k.min.us/ilsv1o.bmp[/IMG]

[IMG]http://k.min.us/ilsv1o.bmp[/IMG]

Uhm, could you show me the code of the button, try adding it to the main form, make sure you added the COM reference , and make sure you added the listen code under

Private Sub SpeechLibrary_COMMAND_LIST()

Slayer - April 25, 2011, 8:07 am

(Apr 25, 2011 08:05 AM)Siyabent Wrote: [\[CITE\]](#) Uhm, could you show me the code of the button, try adding it to the main form, make sure you added the COM reference , and make sure you added the listen code under

Private Sub SpeechLibrary_COMMAND_LIST()

Reference was added, 5.0. And the code was added. >.<

willbebacksoon - April 25, 2011, 8:15 am

make sure you have configured your "Voice Recognition option" from your computers "control panel" for this to work.

(Apr 25, 2011 08:05 AM)Siyabent Wrote: [\[CITE\]](#) Uhm, could you show me the code of the button, try adding it to the main form, make sure you added the COM reference , and make sure you added the listen code under

Private Sub SpeechLibrary_COMMAND_LIST()CoInitializeSecurity may causes this exception.

Remove class

RecoContext = New SpSharedRecoContextClass

Should be

RecoContext = New SpSharedRecoContext

Diabolic - April 25, 2011, 8:39 am

This looks pretty awesome, thanks a lot for the share.

Siy? - April 25, 2011, 8:47 am

thank you so freaking much guys:O 9 posts and 3 rep:O! <33

too late i shat myself.. ò.Ó'

(° ? °) - May 10, 2011, 5:11 pm

thx so much.

Any bright sparks out there thinking of using this for solving audio captchas?

:)

WhipAddict - August 7, 2011, 3:39 pm

Thanks for taking an interest in my Speech Recognition tutorial. It took me a long time to put that together. All the incompatibilities have been updated on my tutorial as well as my website (<http://www.ashleymbegley.co.uk/CODESpeechLib.html>). Feel free to have a look. I also appreciate you referencing my name in your tutorial. Feel free to browse Around the download section of my website for some more things you could make.

<http://www.ashleymbegley.co.uk>

For anyone viewing this, you can also see the original Speech Recognition Tutorial by me at:
<http://www.ashleymbegley.co.uk/CODESpeechLib.html>

With Regards,
Ashley M Begley
