Thread: [Websites I've gotten!](#)

The following websites I've hacked whitened a space of a day using my own method.

<http://payingeveryday.com/>
<http://joomlachat.org>
<http://www.osninjas.info/>
<http://tonrak.net/>

Any domains good? <3

Not bad man, I like your deface page a lot. It's pretty clean. Wasn't too keen on the mouse follow text though, thought it was a bit too much.

The first domain is a pretty good one.
Do you own the domains or did you just hack the site?

Once again, not bad.

I've got full access over <http://joomlachat.org> but the others are otherwise over Filezilla and/or forum(s).

It's a pretty good domain. If you go to the Joomla community forums I bet you could sell it for like \$10/15 pretty easy. Depends on the domain length (too lazy to check.).

I cannot be asked to sell since it's hacked and the domain owner can get it back anytime so, I don't want to risk the chance <3
