Not to be "that guy" but virus scan?

ka0 - April 26, 2011, 12:35 pm

oops sorry i'll add virus scan in 1min

BM Steal` - April 26, 2011, 12:37 pm

Is this the source are exe?

ka0 - April 26, 2011, 12:38 pm

no there are bin and souce too

VA Tragedy - April 26, 2011, 1:04 pm

Good share man! Debating whether or not to download?

E.T - April 26, 2011, 1:06 pm

Good, maybe if you add more function, and FUD it for a more longer time, you will can sell it ^^
Sorry for my bad english :/

anonym0.ous - April 26, 2011, 1:13 pm

i would download if it was coded in C# >.< nice share anyways

ka0 - April 26, 2011, 1:13 pm

@E.T Thank you very much but i have decided to stop developing this project

@VA Tragedy Thank you

@The Chosen One Don't scan the rar scan the files i don't know where it detect a virus

ka0 - April 26, 2011, 1:26 pm

ok but my files are clean you can check them

Herp

Idiot these days... IT'S A SOURCE! Just download it and check the source. Anyway, IT'S A RAT, so I guess it's normal that it's detected. ???

ka0 - April 26, 2011, 2:21 pm

Thank you Charny!!Some guys just don't get it!!

.bLaZeD - April 26, 2011, 3:16 pm

Seems nice, but the gui needs work. Also that zoner has been hitting almost everything lately.

SmokeBongLoads - April 26, 2011, 4:58 pm

I'll make you a basic GUI.
Pm me ;)

Good share. But the hardest part to do is the remote desktop and file transfer..=)

Please credit "Nathan72389" for the connection class.

Get Bytes from the file > Send the bytes over a socket > recieve them > Write bytes to file.

Get Bytes from the file > Send the bytes over a socket > recieve them > Write bytes to file.

I tried that method. It doesn't work with big files like images for remote desktop (200+ kilobytes). But it works fine for smaller files.

You could serialize the images, send them to the client then deserialize it. I made an example some months ago..

I love the theme you used. Can you tell me where did you get it? Thanks.

Ghost? - April 26, 2011, 9:25 pm

Nice share man!

Also good work!

epicdamn - April 26, 2011, 9:56 pm

I was looking for this brother thank you !

Panagiota - April 26, 2011, 10:41 pm

Thanks for sharing mate!! Seems like a good work.

ka0 - April 27, 2011, 7:23 am

Thank you all very much!!! I think i credit all coders and i want to add AeonHack for the gui!!! hope you learn from this source and if you want to ask something don't hesitate to pm me

Thank you for let me count on you

Doctor07 - April 27, 2011, 9:13 am

This looks a lot like a RAT I've seen before :S

ka0 - April 27, 2011, 10:08 am

really do you remember title?do you have a link?

CaZzUaLLv3x - April 27, 2011, 12:06 pm

it looks like Slimesbooter or another RAT i saw

ka0 - April 27, 2011, 12:12 pm

I don't know but i gave you the source which i was based maybe the GUI is like these you say

Its possibly just the GUI that looks similar :D

ka0 - April 27, 2011, 12:31 pm

It is based on AeonHack's class

SIM-62706 - April 30, 2011, 6:58 am

Thanks a lot men! but i am having a problem with the connection... :/

i have port forward to the port 68 and i config it to my ip and when i am trying to open it nothing happens... :/

any help please?

jeave - April 30, 2011, 7:05 am

Thanks for the Source

will look into it :)

Pen and Paper - April 30, 2011, 8:10 am

lol. that is a noob rat.

mine based on the same source and its much better!

look:

Giyar - April 30, 2011, 3:31 pm

bro how is the start up module thinggy? i got alot of problems with that on dark comet, alot of my slaves were gone cuz of it =(

ka0 - May 1, 2011, 6:24 am

@Multi Inject I don't care for your rat!!You are a noob and i can't see your RAT in this forum so shut up!!! I decided to stop developing this rat and i released the source what are you trying to tell us?And i am pretty sure that you have leached the code of "your" RAT

@C00kiieMonster sorry can you rephrase your question please?

epicdamn - May 1, 2011, 6:34 am

@Multi Inject then release it

ka0 - May 1, 2011, 6:39 am

@epicdamn sorry what do you mean please?

epicdamn - May 1, 2011, 6:56 am

I mean if he said that his rat is better,why he is not releasing the source? because its only buttons there,no code

ka0 - May 1, 2011, 7:37 am

Yes but he is saying his lies behind a pc

ka0 - May 1, 2011, 9:25 am

Thank you very much!!Now go cry at your corner like a puppy.OMFG NOOB

Mr.PhYsO - May 1, 2011, 10:43 am

Anyway the stub was FUD,

http://vscan.novirusthanks.org/analysis/62930a33cb052cb40017fdc1dcfaa225/c3J2ci1leGU=

But how to build a server?

ka0 - May 1, 2011, 11:59 am

Yes this was my problem.You have to make a builder for this rat which is not included i hoped i helped you

chevy1994 - May 1, 2011, 5:33 pm

just wondering, how do you open it?

ka0 - May 2, 2011, 4:32 am

With visual basic 08 why?

Thank you all for the downloads the rep and the rating

thanosfuneros - May 2, 2011, 11:41 am

Thanks , just downloading this one, seems very good RAT

ManDoR - May 6, 2011, 2:51 am

I've just one question : the server has to have port forward, or just the client ?

Nice share ;)

ka0 - May 6, 2011, 9:33 am

Pff portforward your router/modem

davis_junior - May 6, 2011, 11:08 am

Testing it now, seems cool. Thanks.

Quien - May 6, 2011, 11:21 am

I know that, please read correctly.... Is the server, like the client, has tout have portforward?

Inventor1 - May 6, 2011, 3:57 pm

No, only the client's router needs to be port forwarded.

Nice job, Thanks!

Oh my god, you are extremly idiot don't you? The simple tcp/udp class that you are using is not something illegal or malware, so that means that this doesn't get spotted by any antivirus, also you are not using any malware function, this will never be spotted as malware from any antivirus in the planet since that's not contain anything linked as malware!

But if you want this to get detected i can simply go to an antivirus website and report your server file signature as malware, since your file signature is unique!

Skids like you are the disgrace of the GREEK HACKING SCENE, don't you even know that this were going for guys like you???

thanks for the share, was debating whether to create my own rat as a bit of a challenge for my own personal use im sure this will save me alot of time if i get stuck with anything (which i am sure to do) by the way i dont mean im going to rip your source apart just examine it and maybe see where im going wrong.

Thanks for the RAT man !. Will come in handy ;)

BrainWashed - May 18, 2012, 1:32 am

I am curious; what is the point in making a RAT in .net?

DeathStar13 - May 18, 2012, 1:53 am

thx for share man... im downloading it right now!
keep it up

Looks good man but there no keylogger or remote deskop Not so useful
But a good source to learn from

manitoutou - May 18, 2012, 9:16 am

Thanks for the source, I try to understand this ;)

enanobp - May 18, 2012, 10:39 am

thanks i will try this out and chek out!

jessman420 - May 18, 2012, 12:40 pm

Thanks for sharing, I am sure this will interesting to play with.
