You don't have permission to access //hub.php on this server.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

keepgetting that error

Because the host your using is blocking that function.

Basicly find a new host.

g0dspeak - April 26, 2011, 7:14 pm

Who's your host? And how long are you trying to boot for?

extremehacks - August 17, 2011, 11:21 pm

idk shell booters are out of date. their shitty but good for 20 sec offline thats about it..
