Thread: [Need help setting up a RAT.](#)

a303 - August 16, 2009, 11:03 am

Hi,

Could someone help me setup a RAT?

I have read through a few tutorials but I am completely lost.

I'm not sure if my server is configured properly.

I will +Rep you and give you a Steam Account with Left 4 Dead if you do.

If you're interested PM your Msn.

Thanks.

BUMP!

I will also give a Brazzer Account to the person that will help me setup.

This is what I've done so far.

I set up an account at no-ip & made a new host.

I entered my host name in the server builder & configured it the way shown in antonstd's Tutorial.

Is that all I've to do?

I am using Lost Door 4.1 by the way.
