This looks pretty amazing, reminds me of WarBot a bit. Can you setup a test for us on a free hosting site?

Why don't you go do it yourself? Too noobish to understand how to set it up?

japanman5 - April 27, 2011, 5:17 pm

the design looks really good, il give it a go.

maybeDeToX - April 27, 2011, 5:19 pm

This leaked? DAMN.. I was really hoping it didn't.

White Hat - April 27, 2011, 5:42 pm

Hmm, seems interesting. I like to GUI, maybe I could test the bot later on my free time. Of course I wouldn't use it for personal use.

zzGoWR - April 27, 2011, 5:45 pm

Ripped from OSC.

However, still nice.

Thanks :3

Xp3 - April 27, 2011, 6:59 pm

It's .NET

Purchased this awhile back, annoying it got leaked.

aadster - April 27, 2011, 7:02 pm

Took a quick glance at source, it's garbage.

If aadster said this, then it must be true. Any one who goes against the comment of the great king, will suffer great punishment.

aadster - April 27, 2011, 7:50 pm

Aside from the many functions that probably won't work correctly on a majority of machines, most of it is ripped from n0ise anyhow that got leaked a while back.

Here's a snippet from the uncrackable builder auth:

```
Code Console.WriteLine("Connecting to Auth Server.... ");
Thread.Sleep(2000);
Console.WriteLine("Validating Resller.... ");
Thread.Sleep(4000);
It's very stealthy I can't even see it making any HTTP requests.
```

HoDPUNISHER - April 27, 2011, 7:57 pm

isn't this thing the ocs?

Bulk™ - May 1, 2011, 2:30 am

In source there is file that downloads malware from one site and be runned on your computer do not use this it is BackDoored

That's the part where the crack came in.. I guess it would have HTTP requests in the non-cracked version.

Expecto - May 1, 2011, 3:18 am

Looks very good . will look forward to this

SIM-452112 - May 1, 2011, 9:21 am

Really unstable bot, crap!

GGddos - May 3, 2011, 3:45 am

hey bruvs , i fking need help i want to learn how to ddos runescape players or w.e can someone help me?

jonny6105 - May 4, 2011, 2:31 pm

could someone explain to me how this works? i downloaded the file but now i dont know what to do. link me to a video or explain please?

TheLuckyGuy - May 4, 2011, 2:53 pm

Stupid German work !

Looks fine works like shit !

lost_firing_pin - May 5, 2011, 12:58 am

Another pretty interface with sloppy coding, I've seen hookers with cleaner pussies then this code.

TITAN - May 5, 2011, 1:42 am

crap code / released not by u

Antinormality - May 25, 2011, 1:08 pm

wow microsoft security essentials :

running mad 2 virusses

Malwarebytes anti malware :

2 virusses + some other shit

dylanmillz - August 19, 2011, 8:34 am

DO NOT DOWNLOAD IT!! I VIRUS SCANNED IT WITH AVG 2011 898 FILES SCAMMED 12 INFECTIONS FOUND!

Quxik - August 19, 2011, 10:34 am

its worth nothing ... just for me maybe!

gyp64 - August 27, 2011, 8:37 am

Can i please have a fixed DL link an error just comes up, try using mediafire or something else like a direct DL thanks

ISO - August 27, 2011, 2:45 pm

Seem good but very close design as WarBot.

M2K - August 27, 2011, 2:58 pm

guys use this one

<http://vertexnet-loader.com/> much better

cka - August 28, 2011, 7:43 pm

The original is availcle for free from post mortom

ngrBot - August 28, 2011, 7:46 pm

Oh shit!

Oday heckz!

This shit is gonna go global, this is amazing.
This is bigger than LOIC!

SequenceInitiated - August 28, 2011, 10:23 pm

Apparently the meaning of the term Oday has changed.

d4op - August 28, 2011, 11:12 pm

lol haha Oday release ? you are stupid, this shit is public as hell....

and Flowz you are stupid too right ? how are u testing rar archives with sandboxie hahaha #fail

TheAnonymousFan - September 19, 2011, 9:35 am

really cool dude keep it up! man i love it!

ZZkk - January 11, 2012, 12:11 pm

could i have this please mate sdfgdsf

MyVictory - March 22, 2012, 5:07 pm

This looks so amazing :O nice design

eggsecutor - March 24, 2012, 2:21 am

Complete and utter garbage. Not worth it at all.

Mauler - March 24, 2012, 3:56 am

^ Then why post on this thread? Have you seen how old it is?

Mad4364 - March 28, 2013, 1:31 pm

Use p2p botnet ;)
