Omniscient - April 27, 2011, 11:12 pm

If you're reading this you're viewing the new server. Congrats. Most of the move went smooth but I'm sure this will be a week filled with changes and oddball crap. So be patient please. I'll work hard and fast at fixing problems.

No data was lost however I reset all thread subscriptions and removed all attachments. In a couple days I'm going to enable avatar uploading again.

Thank you.

Factor8™ - April 27, 2011, 11:12 pm

That was pretty fast. :)

Lassy - April 27, 2011, 11:13 pm

Yeh, that was extremely fast.

cybr - April 27, 2011, 11:13 pm

Congratulate me some more, damn it.

CharlieSheen - April 27, 2011, 11:13 pm

Was faster than I thought, congrats on the move Omni!

g0han - April 27, 2011, 11:13 pm

Great, nice work omni!

Happy that all is going well so far

CinderGhoul - April 27, 2011, 11:13 pm

Quicker than expected. Can't wait to see how the new server works. Nice job Omni. :)

Azido - April 27, 2011, 11:13 pm

I didn't even notice that :P

Aero - April 27, 2011, 11:14 pm

That didn't even take long at all.

Emma Watson - April 27, 2011, 11:14 pm

I noticed it moved pretty quick. Thanks Omni. :)

Sync™ - April 27, 2011, 11:14 pm

Transferring was fast.

Nice work! ?

Crucifix - April 27, 2011, 11:14 pm

Holy shit, the site is so fast or am I just over excited? And yeah the switch went really fast and smoothly good job Omni.

Little_Miss_Baca - April 27, 2011, 11:15 pm

Congrats for the fast and smooth moving :)

Xerotic - April 27, 2011, 11:17 pm

Awesome. Got the Twitter feed sent via SMS 45 minutes ago. So that was fast.

The Dark Hacker - April 27, 2011, 11:17 pm

I am happy, congrats to all of you.

Shmi117 - April 27, 2011, 11:18 pm

Wow, nice. That was a pretty quick move. I personally thought it would take a lot more longer.

Tyler777 - April 27, 2011, 11:18 pm

Thanks Omni, The DNS went up really quick.

lr00tstuff - April 27, 2011, 11:19 pm

Awesome Omni

Went really quick, Thanks!

Chocolate - April 27, 2011, 11:19 pm

Really fast transfer bro. Very nice move Omni. Grats mate! ^_^

cobija - April 27, 2011, 11:19 pm

Cant wait to see what happens when the site gets heavy traffic.

Vitani's Mate - April 27, 2011, 11:20 pm

I thought it would take about 2 to 5 hours of down time.

Damn that was fucking fast.

Awesome job Omni.

The Rated R Superstar - April 27, 2011, 11:23 pm

Yay. So we can get email notifications of PMs and stuff now?

Style - April 27, 2011, 11:24 pm

That was very fast. Thanks!

ALSO: I can now view the site with chrome!

Before, Editing posts, PM-ing, and posting were quite difficult for chrome. Idk why.

I had to use firefox, not hating, but yeah. Idk if it was just me or not.

I've also noticed the site's speed increase. I now click a topic, and it loads really fast. :)

Thanks! <3

TeamDong - April 27, 2011, 11:24 pm

That was fast i was expecting days but anyhow yay!

Omniscient - April 27, 2011, 11:26 pm

Amazing that something went smooth. :)

There is still a lot of work for me to do. I wanted to get more done on this new server but it seemed like the old server was just down 3-4 times per day and it was taking up my time just keeping old server running.

If you notice right now a lot of people are online at the site. Interesting.

Qwazz - April 27, 2011, 11:26 pm

It's like a kid in a candy store!

So many bright colored sugar coated options.

On another note glad it went fast and smooth, nicely done Omni.

Crash-Override - April 27, 2011, 11:27 pm

good to know that we are on new server. But I can hardly feel any change :/

the server is LAGGY as before..

Denmark - April 27, 2011, 11:28 pm

Damn that was fast.. I hope its better and faster compared to the old one :)

Lucid - April 27, 2011, 11:28 pm

That was very quick. Thanks!

Em re - April 27, 2011, 11:28 pm

wow. that was a quick move omni:D

Your awesome <3

I have noticed it too. At this time there would be about 300 people online. But there is alot of people, But i know you have alot of work to do you are a Admin bro. How about comming over for a cup of tea? Haha

5-MeO-DMT - April 27, 2011, 11:29 pm

That was really fast and I wasn't expecting it to be up this fast.

Congrats everyone!

The Real Slim Shaddy - April 27, 2011, 11:31 pm

When will you move to new server again ? because you keep doing that I think you got plenty of spare money to spend on server.

But yeah it was quick I thought it will take ages and this new server is fast also

aadster - April 27, 2011, 11:32 pm

Nice job, it's nice to have the site so snappy. :D

Royal ! - April 27, 2011, 11:33 pm

HF is more faster loading for me then before !

v3xr - April 27, 2011, 11:34 pm

wow that was fast, nice job omni :) is it just me or does the server move alot faster now? Haven't been able to connect from my phone in a while :D

xDowwdeen - April 27, 2011, 11:34 pm

the server move was very fast. I was thinking it would be a couple of days as you would run in to problems.

Congrats u didnt.

Vitani's Mate - April 27, 2011, 11:40 pm

Man i thought that Omni would have a few problems since moving servers take a little bit of time and there could be problems n shit so i thought it would be down for like 2 hours or more. And including fuck up times, (What i meant by that is the sever comming online and offline a couple of times)

Terence McKenna - April 27, 2011, 11:43 pm

Yea, that took like 30 min if that, damn omni props.

Xerotic - April 27, 2011, 11:43 pm

I remember in December when he was upgrading a few things.. seems to be many less problems now. Things seem better off as well. Might just be my mind playing tricks, but loading seems faster.

Xch4ng3 - April 27, 2011, 11:44 pm

It's loading faster for me. Yipee.

VeNoMz - April 27, 2011, 11:44 pm

tubby1 - April 28, 2011, 12:08 am

Nice work Omni, congrats!

Omniscient - April 28, 2011, 12:10 am

Goes to show the DB server isn't the problem. As I been saying..all these issues are from the old HF web server which was over 2 years old now. That's ancient and well past our needs.

While old server would right now be at 300% CPU capacity this one is currently at 10% capacity. Major difference. Old server http was slow and causing connection hangups even to MySQL. Which is why the max connections error would prop up. It's not that MySQL was doing a query. It was just hanging..as if our own server was sending a slowloris attack.

Now serving is speedy with 12 cores, tons of ram, and other sexy stuff I did. :)

Example: <https://hackforums.net:8080/nginx/1.html>

Gonna try some real fun shit on this server.

Adonis - April 28, 2011, 12:11 am

I didn't even notice. Thanks Omni. Hopefully we get less down time now.

VanCliffeBraco - April 28, 2011, 12:16 am

When Omniscient states that he is going to make some real fun shit, that can't be good. :) Anyway, can you re-enable the avatar uploading stuff?

iWhizKid - April 28, 2011, 12:18 am

What are going to do with the old server? Will you use it or its going to die? and can i subscribe to threads again, i mean its fine to subscribe now right?

And yeah this server is alot more faster then old. Hopefully we will not face downtime now.

9 Toes - April 28, 2011, 12:21 am

That was a lot faster than I thought.

Ominex - April 28, 2011, 12:23 am

Great job Omni. Site's loading faster and I love it!

Omniscient - April 28, 2011, 12:25 am

Quote: Anyway, can you re-enable the avatar uploading stuff?

In a day or two. Just going to make some security adjustments. Well...I've already made most of them but I just want to wait before I do any extra adding to server load. Be patient.

Quote:What are going to do with the old server?

It has 2 weeks left on the rental agreement. It will be shut down and decomissioned. :)

Quote:and can i subscribe to threads again

Yes. Please be moderate about it though. So far mail is being sent well but I'm expecting some flagging in the next couple weeks as we are a new server sending thousands of emails per day. Eventually I'll have to deal with a blacklisting from a provider. Always happens. Old server was blacklisted like 5 times.

Once this all settles down then maybe I can actually find time to code some new stuff into HF. The whole sysadmin thing is becoming too time consuming especially when we went down constantly.

To The Limits - April 28, 2011, 12:27 am

It's really fast. Thanks Omni! :D

Psychotic Overlord - April 28, 2011, 12:28 am

I know everyone is commenting on how fast server was moved but be aware. I spent a week and a half on this setup. And I still have more work to do.

My favorite is definitely the addition of Nginx for our static server needs though.

The weekends are what will really give us an idea of how well this upgrade works for us. Server load is only about 20% cpu. Very reasonable and steady. Essentially we can double in traffic on this current setup imho.

Plus, I saw about 1.8K users online after HF being opened again, so that is extremely good amount of connections for "max_user_connections" attribute.

Nice, but I think I'm going to die trying to find the threads I subscribed to before :P. yawns

Ok, never mind. I give up. Too much effort involved lol.

Nice graphic, funny as hell! Honestly :3

Play Slats, Slats, Slats while watching the Gif... It is in sync and pretty fucking amazing!

Just asking how big was all the files you moved ?

Im Guessing over 1TB

MonEy - April 29, 2011, 4:36 am

Great work, man.

Keep it up! It's a lot faster now. ?

High Definition - April 29, 2011, 7:10 am

HF is lagging heavily at the moment for me.

I think it returns 1 if you have no posts or can't access the forum usually, like Members going into the L33t forums.

And a row for total would be great, as our normal postcount excludes forums.

I'll be right back, I need to huge poop.

ComX - April 29, 2011, 11:16 am

Cool Job Omni :) it was soo quick the move but it went smooth :)

mager123123 - April 29, 2011, 12:34 pm

Lol, Omni 1 word bro, AMAZING. You did it so fast, and with barely any problems. Appreciate it bro, all the best!
