Thread: [Why Not Ban \[censored\] here?](#)

Whiz4rd - April 29, 2011, 5:44 am

Well , I'm almost pissed off, first i was viewing a tutorial there in RATS section then suddenly i downloaded everything needed , and is about to do it suddenly after clicking the spoiler (which contains a picture where tutorial is in there) [censored] pic has blabla bla.

Second time around searching in the graphics section , found some photoshop effect , followed it but another tiny pic showed and i was on the rush to make a banner for my upcoming website. and i was like fffuuuuuuuuuuuuuuuuuuuu!!!

third time around searching on the Hacking Tutorials : I said 1 more thread that has [censored] and i'm going to post a thread at the rules and announcements news and feedback section, and here i am so pissed off about those [censored] uploaded photos.

Please do upload your images at imageshack.com
and other picture uploading sites. because tiny pic is too damn sh,.t

Sorry if i have a bad day , because of [censored]!.

Excalibur - April 29, 2011, 5:46 am

[censored] banned pictures here

imageshack will delete photos eventually

<https://imgur.com>

is the best site at the moment

dmXsta - April 29, 2011, 5:46 am

I agree here, [censored] is so annoying and should be banned!

Kick Buttowski - April 29, 2011, 5:48 am

[censored] should not only be banned here but should be closed i lost all my Album :(

Barnmeister - April 29, 2011, 5:49 am

i use photobucket, because i have everything set up, it takes about 30 seconds each to get my photos on but i dont do tutorials so yeh, wouldn't know whats best aye

Joey Tribbiani - April 29, 2011, 5:52 am

Because the tutorial is probably very old cause like 6 months back, [censored] was very popular and used in all tutorials.

Also, if you had done a little search before making this, you could have found this :-

<https://hackforums.net/showthread.php?tid=998436>

None or at least 99% of the new tutorials don't use [censored].

Whiz4rd - April 29, 2011, 5:53 am

Good to know many people here are also pissed off to Tiny Pic. And Guys if you know any Picture uploading site please do share it to all. and if possible why not make a HF Pic Uploading Site? where in only members are allowed to upload on it? Much Easier to think of? but hard to make . why not try that HF Community Project? HF Picture Uploader .com / .net / .org / etc., ? see

Gold - April 29, 2011, 5:55 am

[censored] is unreliable it's the OP's fault when posting a tutorial.

Z?us - April 29, 2011, 5:56 am

I hate them, honestly it's not expensive to buy more space.

101 - April 29, 2011, 5:57 am

I use "min.us"

Pretty easy and fast + reliable!

Whiz4rd - April 29, 2011, 6:00 am

@Joey : Well Thats a good Source . Hope that it will be sticky on each forum so that it will have an announcement on where to post they're pictures or where they could upload it . Btw. Fat joe? xD

@Gold : Well As Joey Said it was good back few years ago . but still not that good . enough'

@ Zeus : You really hate them not only you but more of us many of us. and many many more of us. but use the one the joey posted

imgur will always be the best site, and the new fags use minus but it blows

(Apr 29, 2011 06:01 AM)Gold Wrote: [\[CITE\]](#) Then stop following tutorials a year or so old.

offtopic: Pussies -3 when I'm limited, lol
ye a bunch neg rep'd me too

They all going to delete it when I revenge rep them their all like that.

spyshadow - April 29, 2011, 6:02 am

Why would you ban someone for uploading an image on a suckish server? that's their call...

Whiz4rd - April 29, 2011, 6:09 am

@Spy Shadow : To whom do you refer that comment?

@gold : by the way good to know you've got your Ub3r. i just recently read it on the News of this week.

he wants to ban the link or make it change to spam, like a filter just like \$harecash and such, because tiny pic deleted all images hotlinked to hf within a day

I just -3 them and move on, CUZ I CARE BOUT REPUTATION!

Whiz4rd - April 29, 2011, 6:14 am

@ Mike ; ooh i see , filtering them? good point, but wouldn't it be great if HF have it's own Picture Uploading Site? Where in only us (members) can view it, it will have galleries of this user, photos upload by that user something like that .

by the way can't + rep or - rep someone i am not yet l33t. still making it out to upgrade :D.

uploading sites rape the CPU so i've heard lol.

I'd like it though.

Whiz4rd - April 29, 2011, 6:19 am

@Mike : Is that so? Well atleast I gained support on this thread. Tiny Pic must be banned :D

Well thanks to every one who had put they're comment in here. Going' to sleep now its 10:38 pm here on PH. Good Night Every body gotta' continue this topic tomorrow . Good Night.

VanCliffeBraco - April 29, 2011, 6:33 am

Suggestions are closed mate, but I use "imgur.com" or "min.us". :)

who cares, it should be banned

Stenography - April 29, 2011, 7:37 am

I think those people need to get -rep for that

Or give them +10 warning lvl.

Quiet. - April 29, 2011, 7:41 am

All Omni has to do is put in a word filter for [censored] and whenever a link is typed in, it would say spam instead. Kind of like shitcash.

Lionel Messi - April 29, 2011, 7:50 am

yeah, time on time again people use [censored]. They never get it.

Quiet. - April 29, 2011, 7:51 am

OP, just put this in the original post:

"Short version, [censored] is useless, and in order to make people stop using it, Omni can put in a word filter for '[censored]' so the URL's will get replaced with 'spam'."

Lightangel - April 29, 2011, 9:28 am

Sorry mate but suggestions are closed and I do not think Omni will worry about that because they are many threads discussed about not using [censored].
