Thread: [Ronda Ocx 2011 K&JR > 8211\[OCX Installer\]](#)

pepon - April 29, 2011, 9:01 am

Ronda Ocx 2011 K&JR **8211[OCX Installer]

I have seen many comments from users having problems when they want to run applications and can not be for lack of OCX.

This program installs all necessary Ocx codejocks to run programs compiled in Visual Basic, Since many of these programs need to libraries beyond those included with Windows by default.

With that I think any tool crypter programmed in VB or throw an error. Since there are all functions necessary for its operation.

[img]http://www.imagengratis.org/images/2ao1ua.png[/img]

Added support for multilanguage installation * 8211 (22 languages)

Automatically minimize Ocx Manager to make use of the Registrar Ocx Dll (manual) from the Panel

*Install 81 + 2 DLL OCX components

Install Codejo ~ 3.ocx

*Shortcuts Group: Start / All Programs / Ronda ~ 2011 Ocx

If installation is difficult, try to disable UAC

Start> Control Panel> User Accounts> Turn on or off User Accounts Control ** 8230, and uncheck the box: * 8221; Use User Account Control UAC 8220
