Thread: [\[TuT\]Surfing Anonymously / Proxies\[TuT\]](#)

The Unknown - April 29, 2011, 2:33 pm

Well I was just browsing this section and I saw lots of request for Free VPN, well here, lets begin.

1) You can Hardly find a working free VPN, I once found one actually WHICH ONLY HAD ONE PROXY so I think this is not a VPN, so what am saying here, if you need a 100 % good and working VPN you need to buy one from trusted sources. Now seriously [censored] is a good VPN, that's the only Free VPN I ever found, so you can use it

2) Now I will be teaching you and telling you how to find a FULLY UPDATED 100 % WORKING PROXIES List for FREE, and how to install these stuff.

1- Go here and enjoy the Fully Updated Free Working Proxy List:

http://www.ip-adress.com/proxy_list/

2- Now choose one with Type = "Anonymous", and follow me so you know how to install it.... Well as you know we have many Browsers but here I will be telling you about Firefox as it is the most used.

Go to Tools ----> Options ----> Advanced ----> Settings

There, select "Manual proxy configuration" add the proxy you chose then click "use this proxy server for all protocols", then click "OK" and you're done.

Now wait for like 10 seconds maybe less and begin surfing the internet from a different location which means if you are traced you won't be caught.

That's it, I just liked to do this to explain to some of you about VPNs and Proxies.

Thanks for Reading.

Cyber-Security - April 29, 2011, 2:35 pm

I use a vpn ([censored] is good). But this is good too!

T@kU - April 29, 2011, 2:40 pm

Most of these proxies probably keep logs so you can still be traced back to your IP address unfortunately...

The Unknown - April 29, 2011, 2:42 pm

Anyone running any sort of public facing server keeps logs. Bet on it.

Genjishin - April 29, 2011, 3:04 pm

I have to try this first. um, question does using proxies slow your internet connection? or surfing?

T@kU - April 29, 2011, 3:06 pm

Thank you...

And yes using some proxies can slow your internet connection down considerably

From a little to a lot, depending on how far away you are frm the proxy server/

phybe? - April 29, 2011, 3:58 pm

Thanks for the tutorial. This will be quite useful when needed.

Stay Plural - April 29, 2011, 4:01 pm

[censored] is beast, for a free VPN. :D

Thanks for this tutorial! I use chrome though :/

The Unknown - April 29, 2011, 11:52 pm

Proxies slow a little bit your internet connection and this change value each time, and I mean with this, if you chose a proxy very far from your place the conx will go slow, opposite if you choose a proxy near from your place

cyberflexxx - June 5, 2011, 8:45 pm

i love using vpn it work better than proxy, proxy lag

pidnas - June 7, 2011, 12:16 am

use dial up connection...The ip on internet can't be traced out.Because most of the dial up conncection use dynamic ip for Client..Same ip is allocated to different users,but not at the same time..DHCP protocol is used there.Which doesn't keep any MAC address of ur pc.It keeps record about subnet ,gateway,client allocated ip and alloaction time.

14th - June 8, 2011, 1:15 am

If those public face servers keep logs.. Then this will be of no use...

Is it?

Though the information was very helpful!

I'm so amazed..

now.. How about that [censored]..?

Does that keeps logs as well?

Anonymous.7654 - June 8, 2011, 3:18 am

Thanks for Tutorial Man,good info.

used.syringe - June 8, 2011, 3:44 am

dont use even elite proxies, it can be traced back because they all keep logs.use tor

The Unknown - June 9, 2011, 12:16 pm

(Jun 8, 2011 03:44 AM)used.syringe Wrote: [\[CITE\]](#) dont use even elite proxies, it can be traced back because they all keep logs.use tor

still... your proxy will be detected but not your location cose if proxy detected, then your fake location will be detected so you will be safe

sqid - June 9, 2011, 1:00 pm

All the public proxies keeps logs... [censored] does as well. So if you want a free solution you might as well use proxpn, it's a great free VPN and all ports are open (you can RAT trough this)

But seriously go spend 5 bucks on a decent VPN, they errant that expensive.

Sir Cyrano - June 9, 2011, 1:13 pm

Is proxy better than VPN how hidemyass??

The Unknown - June 11, 2011, 11:28 am

(Jun 9, 2011 01:13 PM)Cyrano Wrote: [\[CITE\]](#) Is proxy better than VPN how hidemyass??

VPN is a program that choose a proxy and install it for you, while you can install your own... and hidemyass is good

Basics. - June 11, 2011, 12:11 pm

Meh I dislike waiting in the queue for my turn on [censored]. Nice tutorial though.

rxki - June 11, 2011, 2:17 pm

Great tutorial, but i use [censored] VPN. For a free VPN, it's badass.
