this is a great fucking keylogger. thanks so much [ZERO] once again. i've come back to thank you because i've already hacked like 12 runescape accounts in 2 days lmfd. (yes i said laugh my fucking dick off) :)

You should definitely make a payed version of this with more stealers, i'd pay for that! i've just started learning vb.net coding so i can't code like this but i'm sure i'll get there. I'm great at coding HTTP and JAVA :P

the one problem i've had with this keylogger is that when your victim runs it multiple times, the stealers don't steal anything and it sends so many logs at once. :S

cant hurt to put out there

i love when it tries to send the logs avg pops-up a message and says if i want to give it permission to access the internet. its not only on yours it is on every keylogger
