Quite a nice compilation. Have you got a virus scan of it?

jeave - April 30, 2011, 7:04 am

Because they are TROJANS I dont think a virus scan is very usefull ...

Actually They Are Source Codes Of Trojan...

So giving a Virus Scan is useless...

And there are no .exe's

Nice collection.If there are exe files dont run them.Yous study the source and compile it.No need for virus scan.
