Thread: [\[TUT\] *****?***** Image In Folder Background *****?***** \[XP\]](#)

--((HACKER))-- - April 30, 2011, 7:11 am

Hello Guys, Today I will Show You How To Put A Image In The Background Of A Folder.

This trick will help you in putting a image in your folder background

First, Go to Control panel -> Folder options -> View Tab -> Show Hidden Files and uncheck the 2 boxes below it.

Open a folder, search for a file desktop.ini (can't find it? scroll to the end of this post). You will see something like this or a bit different

```
[.ShellClassInfo]
IconFile=%SystemRoot%\system32\SHELL32.dll
IconIndex=3
```

Now add this line below it:

```
[ExtShellFolderViews]
{BE098140-A513-11D0-A3A4-00C04FD706EC}={BE098140-A513-11D0-A3A4-00C04FD706EC}
[{BE098140-A513-11D0-A3A4-00C04FD706EC}]
IconArea_Image=C:\Documents and Settings\win xp\My Documents\My Pictures\kihlo32qwe.jpg
```

Change:

C:\Documents and Settings\win xp\My Documents\My Pictures\kihlo32qwe.jpg

With your location of the image you wanna set as background.

Refresh and close the folder and check again.

In case if your folder don't have the desktop.ini file then do this to create it.

Open folder -> right click -> properties -> customize tab
change icon of the folder to any icon and you can see the desktop.ini file now.

Uninstalling: Remove the line in the file, Simple.

ENJOY... ?

01001 - April 30, 2011, 8:32 am

thanks buddy...

i tried it and it works

wezli - April 30, 2011, 8:53 am

Nice tut, thanks for this

Thnx Guys For Your Compliments...

princeshama - May 3, 2011, 2:49 am

its realy ,, working thankx

hoppinupp - May 3, 2011, 2:59 am

Can you develop it somehow to win7 ? :D:D That would be great^^

Sn!p3R - May 3, 2011, 3:17 am

i dont get man !

any screen shot please ?!

Elunesarrow - May 3, 2011, 3:23 am

hey yhanks for the trick..!!1

~~((HACKER))~~ - May 4, 2011, 3:56 am

Thnx guys for ur compliments...

but it is only for windows XP...
