Thread: [\[XP\] Some Good Programs Are Hidden \[Windows 7\]](#)

~~((HACKER))~~ - May 1, 2011, 2:45 am

Hello Guys Today i will show you some Good Programs which are Hidden in your Computer.

Let's Start:

First Go to Start --> Run and type the Following commands.

Private Character Editor = eudcedit

i Express = iexpress

Disk Cleanup = cleanmgr

Dr Watson = drwtsn32

Windows Media Player 5.1 = mplay32

Character Map = charmap

Direct X diagnosis = dxdiag

Object Packager = packager

System Monitor = perfmon

Program Manager = progman

Remote Access phone book = rasphone

Registry Editor = regedt32

File signature verification tool = sigverif

Volume Control = sndvol32

System Configuration Editor = sysedit

Syskey = syskey

Microsoft Telnet Client = telnet (XP)

Microsoft Telnet Client = Start --> Control Panel --> Program --> Activate Or Inactivate Windows Futures --> Telnet Client --> Ok (Windows 7)

ENJOY... ?

jamesgates1 - May 1, 2011, 2:46 am

thanks for the knowledge and i shall use it :)

Thanks, James.

Try it...They all works...

Xylon - May 1, 2011, 4:44 am

Nice bro didn't knew about all of them btw you can activate telnet in WINDOWS 7 like this
start>control panel>Program>Activate or inactivate windows futures>telnet client>ok

You should add it here :)

MouseDesign - May 1, 2011, 4:47 am

I knew about most of these, quite basic. Good for the beginners though.

The Decoder - May 1, 2011, 4:49 am

Bro Nice share...Lets try It..

ThankZ
