Thread: [Lost-Door New Owner ship](#)

Kick Buttowski - May 1, 2011, 8:05 am

Check it out here -----> <http://www.lost-door.com/owner/newowner>

Bought it off for 3.9K USD . Need developers and private version is sooo good :)

Post here if u want to help me

VipShaggy - May 1, 2011, 8:09 am

Hello mate. Congratz on your new site. I'd really love to help you and get involved with you. PM me if your interested.

graffiti - May 1, 2011, 8:13 am

just tell me who remixed that LP song . Fuckin A !

Darkalias - May 1, 2011, 8:14 am

congratz with becoming new owner of the lost-door project and gl with the site

Flighters - May 1, 2011, 8:15 am

Hmm look's nice ;)

Haven't heard of the RAT before tho.

Anyway good luck with the project.

Supreme Kai - May 1, 2011, 12:45 pm

Just to let you peeps know i'm involved in the Lost - Door product.

\$ zS \$ - May 1, 2011, 1:02 pm

Nice job man! If you need any help testing, hit me up XD

Kick Buttowski - May 1, 2011, 8:35 pm

We are now coding ad customizing some Crucial parts on client side part to make it more advanced and GUI will be same and there will be same changes in price etc . First release of private version will be FUD and we will try to keep it fud for long time but may be in future we are thinking e cant make it FUD as original coder left the project is not gonna help for sure

xvisceral - May 1, 2011, 9:29 pm

Hm, that's interesting. I knew he was selling it, didn't ever know when he would.

Da Loser - May 1, 2011, 9:39 pm

is it coded in a skid language? vb6/delphi/.net? if so Imfao you got scammed hard.

xvisceral - May 1, 2011, 9:41 pm

It's in vb6, and there is no such thing as a skid language. Delphi is very similar to C if you love C that much.

Da Loser - May 1, 2011, 9:43 pm

(May 1, 2011 09:41 PM)xvisceral Wrote: [\[CITE\]](#) It's in vb6, and there is no such thing as a skid language. Delphi is very similar to C if you love C that much.

skid languages are the retarded ones aka vb6 (#1 spot) delphi/pascal is not similar to C, its fucking retarded, and .net is just the worst, the fucking worst. then again this is HF so its common place to find skid tools coded in vb6/.net and pascal (May 1, 2011 09:41 PM)xvisceral Wrote: [\[CITE\]](#) It's in vb6, and there is no such thing as a skid language. xvisceral - May 1, 2011, 9:49 pm

Delphi is a solid language. It's only drawback is that it is pretty pointless learning it as it is not widely used.

Da Loser - May 1, 2011, 9:50 pm

(May 1, 2011 09:49 PM)xvisceral Wrote: [\[CITE\]](#) Delphi is a solid language. It's only drawback is that it is pretty pointless learning it as it is not widely used.

solid for a skid perhaps, it doesn't teach the programmer about memory management, and other important things, damn right its pointless to learn.

Kick Buttowski - May 1, 2011, 9:51 pm

mate i am not that much into coding but i love this Project so i bought it and Private edition is sold to more than 100 people even it is 130 Euros . So what happens if we decrease price ?

xvisceral - May 1, 2011, 10:04 pm

Definitely need to lower the price, or you will not make your money back for a year

Kick Buttowski - May 1, 2011, 10:12 pm

i am sure i cant make 3.9k within an year its tough with BS here :P

anyways i want to ask you a question can u please add me on Buddylist ?

witchitized - May 1, 2011, 10:14 pm

(May 1, 2011 10:04 PM)xvisceral Wrote: [\[CITE\]](#) Definitely need to lower the price, or you will not make your money back for a year

He didn't spend \$3900 on it.

Oussami was asking for \$900, and I'm sure he was willing to go lower...there's no way this guy paid \$3900 when oussa OPENLY advertised his asking price of \$900.

Kick Buttowski - May 1, 2011, 10:26 pm

900\$ for source code and for website copyrights and everything so he will not be giving it or selling it to anyone

xvisceral - May 1, 2011, 10:30 pm

Well, either way, if you think \$3900 is a lot to make in a year...you need to set higher goals

Yes, you are my main competition. It will be nice to have competition again. Since Albertino has

been gone, it's been really only us in this department

I won't add you to my buddylist to help you, you are my competition. ?

Kick Buttowski - May 1, 2011, 10:37 pm

I want to ask you something ? Just a simple question

xvisceral - May 1, 2011, 10:42 pm

So ask it here. Why not..?

D??M! - May 1, 2011, 11:07 pm

Never been a fan of Lost Door but the site is nice. Good luck.

Supreme Kai - May 2, 2011, 12:34 am

en.wikipedia.org/wiki/Lost_Door_RAT

qqhf - May 2, 2011, 2:58 am

Sadly both scammers are competing against each other.

Tubz - May 2, 2011, 3:40 am

Lost-door was really unstable, I hope you improve the base before you start selling.

Kick Buttowski - May 2, 2011, 4:05 am

Private edition of Lost-Door is 98% stable as the original coder says but while testing we found it stable but not 98% whats he said . Stable then RAT's on HF thats for sure

Supreme Kai - May 2, 2011, 8:03 am

The public version is just to let people see how it works, so its unstable ofcourse why would we make the public version as stable as the private one ?

The public and the private version are complete different coded they only have the same look.

And we tested lost-door private version and it's more stable then every rat in HF.

It didnt cost 130euro(Will lower the price for sure) for no reason.

The sales will start this week.

D??M! - May 2, 2011, 8:53 am

Stability isn't really a 'feature' you should remove on the public version, if anything stability is one of the few things the public version should have. I agree your public version should have significantly less features than your private one, but no one is going to pay close to \$200 USD for the private version when the public version is so weak.

Fix the public's stability and just remove most of the features.

Supreme Kai - May 2, 2011, 8:58 am

We will release the last public version of Lost Door soon.

And we are going to lower the price it will be very cheap

Stenography - May 9, 2011, 4:28 pm

(May 1, 2011 09:39 PM)Zyzz Wrote: [\[CITE\]](#) is it coded in a skid language? vb6/delphi/.net? if so Imfao you got scammed hard.

Now i understand why you got -82 rep, Nuff' said.

And about the topic, im impressed you bought it for 3,900\$, its plenty of money, bud.
If you need help with RunPE, coding, Sick GUI, anything you want, i will help you only because i respect you.
PM me mate ! :D?

idonotcare - May 9, 2011, 5:17 pm

(May 1, 2011 09:39 PM)Zyzz Wrote: [\[CITE\]](#) is it coded in a skid language? vb6/delphi/.net? if so
Imfao you got scammed hard.

And i bet that you couldn't even code a rat in a "Skid langue"
Not even that. So i think that the skiddys pwnd your asshole.

\$ zS \$ - May 9, 2011, 6:04 pm

Would you be letting more people test it? I've been waiting and never got a reply :(

Cute - May 9, 2011, 8:26 pm

I just talked with Kick Buttowski he is telling that oussamiO scammed him by asking more money and he said no and oussamiO even changed the details on website . So please beware of oussamiO his friends on this site dont even know the true story so beware of them and now lost-door was customized a lot and released as Artemis you can check it on Premium Sellers Section

He told me to tell this

deadaccount01 - May 9, 2011, 9:53 pm

(May 9, 2011 08:26 PM)Shinchan Wrote: [\[CITE\]](#) I just talked with Kick Buttowski he is telling that oussamiO scammed him by asking more money and he said no and oussamiO even changed the details on website . He told me to tell this

No, Kick Buttowski was fooled into thinking it was worth 3.9k..and now he regrets purchasing it. As soon as he purchased it oussamiO logged off and aint been back on.

Cute - May 9, 2011, 11:15 pm

He told me the same on MSN . beware of oussamiO he is such a loser i think almost everyone on his MSN know the story

BlackHops - May 10, 2011, 12:14 am

Wow that's pretty expensive

MiserAble - May 10, 2011, 5:36 am
