L0CKERZ PLAY SCRIPT - MASTERED

Presenting L0ckerz PLAY Script. A revolutionary Win32 Program that farms for maximum PTZ on spam. It watches All spam Videos for users so they don't have to browse through the videos themselves. These videos can be watched while the user is away or doing work on the computer. If at anytime those Pesky Captchas appear, The bot will be able to solve them using built-in solvers for a steady rate of PTZ increasing.

Features:

- Watches Videos Silently
- No streaming/buffering. Videos are always played ASAP
- Remembers Password and Email
- PTZ Counter
- Constantly Updated
- Bypasses Advertisements (Saves time watching!)
- Free Captcha Solver
- Does NOT use Internet Explorer (Lag FIX)

Sounds Good, Where can I download it?

You can download

[/lyOt1A\]L0ckerz PLAY Script](#)

A Trial edition is available if you are skeptic about this at first and then the FULL download a long with captcha support will be available. Note that it is free however it might take a minute of time from doing an email submit or survey. (An alternate solution is to purchase it for \$5.00). To purchase through paypal, select the CPALEAD box, and click on paypal option when the widget opens. The site will display any news about the bot and what has been going on recently. My contact information is also there and you can get at me through Email or on HF.

Change log:

V.2.0 Was released.

V.2.1 - Disabled Decap atm and renabled manual until further notice. Incorporating captchagone once its ready.

V.2.2 - spam Updated their Login procedure. The bot has been updated to not give the error.

FAQ:

What version of NET. Framework do I need?

You do not need any version of NET. Framework to work. Currently this program runs on any Windows Platform

Sometimes I crash on the first video? Even after I restart

One or two videos that are corrupted on spam such as an episode of The Homes or Celebrity Question - Curren\$y Will crash the bot. To solve it, you will have to go on spam.com -> PLAY -> Select "Videos I Haven't Watched" and manually watch the first video that is on the playlist.

Sometimes It only watches One or Two videos and it crashes?

If you are on Windows 7 or Vista. You will have to Run it as administrator (Right Click-> Run as Administrator)[/color]

How long will the \$5 I paid for the product, last?

For the lifetime of the product.

More answers will be updated as they are asked or if needed.

Feel free to PM me regarding any questions.

PM ME IF YOU HAVE BOUGHT IT OR DID A SURVEY. I NEED YOU TO DO THIS, INORDER TO KEEP A CHECK ON THE NUMBER OF PEOPLE CURRENTLY USING THIS BOT! Kindly follow it :).For people having problems in completing the surveys, I suggest using a USA proxy, and clearing your cookies before doing any survey. You can alternatively buy it for \$5 aswell.

Yup, that is why I have given two options, for people who don't have enough money can do the survey. People who don't like surveys can pay, as simple as that. :)

Its used for the site named L0ckerz. They basically give you PTZ for watching videos, which you can redeem for different prizes. This bot automates that process for you.

Thanks for the vouch bro. Report any bugs, if found.

And nope.

ODDSAC - May 2, 2011, 7:57 am

did a sharecash survey for it, said there was an update, but it said something about trial version?

Question about L0ckerz:

All you need is points to redeem items? Or do you need cash along with points?

Um nope, you just need to accumulate enough points.

(May 2, 2011 03:31 PM)Rawe Wrote: [\[CITE\]](#) umm what does that mean???

It means the small anti-virus flags some of these as a threat but they are not real viruses. For example, the program downloads the captcha. They assume its a virus

ODDSAC - May 3, 2011, 5:21 am

only thing i can fault about it is that when it finds a captcha it has to rewatch the video, and with a 790 second video thats quite a pain :P

although, getting 500ptz per video is nice :P

Works great so far. Very easy to use and a simple GUI. Though, I agree on the Bid Bot thing, would make things much easier. Also, do we have to pay/do a survey again if a new update comes out?

Nope, you don't have to do a survey for the update or even pay again.

The problem with the bid bot is, that If everyone has one, no one has one. Because everyone will be bidding on the same item, which makes it useless and again it will be based on luck other than anything else. That is why bidding bots are not public.

ODDSAC - May 4, 2011, 3:12 am

some people are definately using bid bots, im instantly getting outbid on stuff like instant-zlist and anything else in high-rollers

How reliable is the bot filling in the captcha?

zoh - May 12, 2011, 7:11 am

Still selling this guys. ?

migasangelo - May 12, 2011, 8:16 am

bought it :D

made 750 pointz in 10 minutes

migasangelo - May 15, 2011, 6:01 am

problem, captcha don't work...

every time i use the bot, the first video gets captcha and the bot doesn't get pointz, i go on firefox watch videos manual, and every video gets captcha...

this will be fixed soon? please say something, or i have to charge back...

xkhaosmasterx - May 15, 2011, 6:25 am

I got this today and I have to say that it works absolutely amazingly. The only problem that I've found is that it will get stuck on one video and keep trying to get the pointz on it and won't move to a new video. I solved it by watching the video manually and then just reopened the program and let it run. :D.

I will look into your problem, kindly send me your msn over PM. And just btw, If it gets stuck on a particular video, you need to go over and watch it manually, that is the solution to it.

WhistlingWilly1 - May 15, 2011, 10:00 pm

Vouch for this bot :)

Just bought earlier today, (hate surveys) was downloading and botting within 2 min

Works great all ready up like 1k ptz

Thanks, koolhunk :D

(oh and i noticed i get stuck on a video also, if that happens to you just copy the string of gibberish and past it in google and it should have the video there example- :NzbtpdSgS2qzQvemjQUU0yImAvLpQVmg)

Enter the captcha manually. How can't you read what the captcha says? :o

migasangelo - May 16, 2011, 4:33 pm

because sometimes they are hard.... and i am not a master in english...

btw, thanks for the update

the update didn't solved the stuck on captcha, lol...

migasangelo - May 18, 2011, 6:32 am

i got a solution for my problem, how about add a settings menu and i can choose manual or auto captcha input, so, if i am getting problems with auto captcha i can put it manually until the captcha

problem is not solved

Anyone else having problems with this randomly stop working, keep getting the windows error saying it has stopped responding.

kaswar - June 3, 2011, 2:41 pm

Sometimes it glitches on a few videos. If it keeps occuring. try going to the first video on the section

"Videos I Haven't Watched" and watching the first one.
